

Features of Pageant Intrinsic as a Fungicide

An aerial photograph of a vast agricultural field during sunset or sunrise. The sky is filled with warm, orange, and yellow hues. A bright, almost blinding sun is positioned in the upper right quadrant, casting long, dramatic shadows across the dark, textured landscape below. The horizon line is visible in the distance.

Chase Agricultural Consulting, LLC

Pageant - fungicide characteristics

- ❖ Broad-spectrum (leaf spots, powdery and downy mildew, rust, crown rot and root rot)
- ❖ Long-term prevention
- ❖ Eradication
- ❖ Adjuvants not always needed
- ❖ Controls tough diseases
- ❖ Controls new diseases

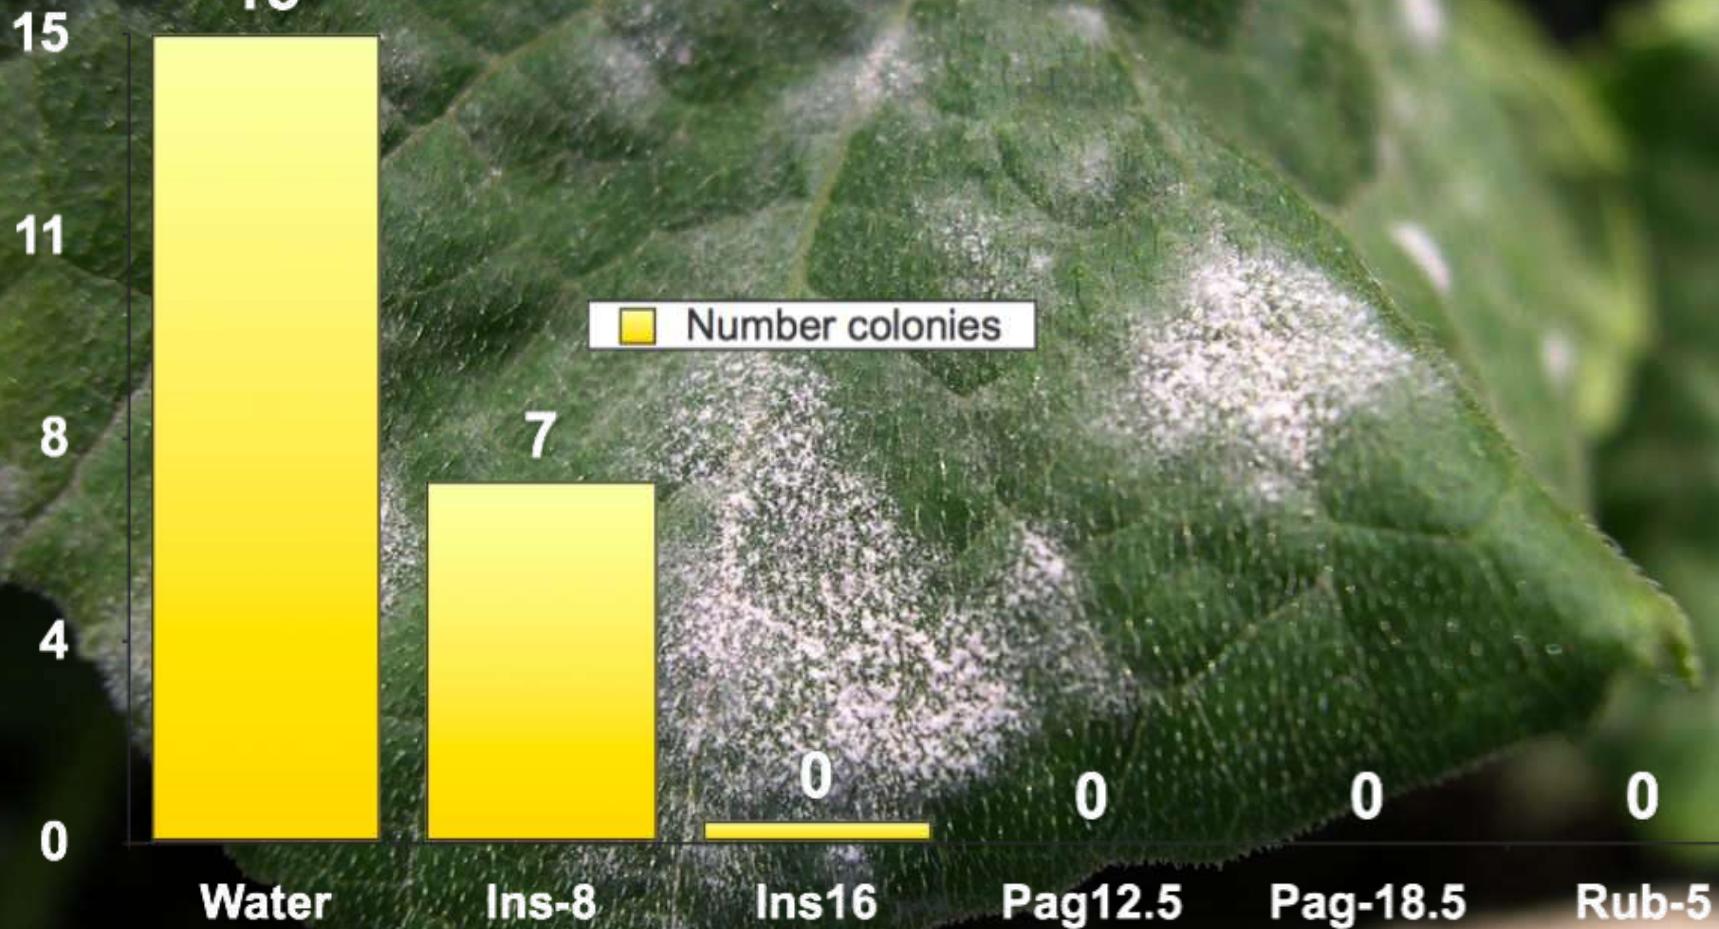

Broad-Spectrum

Pageant Efficacy

Disease	Efficacy
Alternaria leaf spot	very good to excellent
Anthracnose	very good
Black Spot	good to very good
Botrytis blight	very good to excellent
Cercospora leaf spot	very good
Cylindrocladium	good
Downy mildew	very good to excellent
Fusarium stem rot and wilt	some to good
Myrothecium leaf spot	some
Phytophthora crown rot	variable (none to very good)
Powdery mildew	very good to excellent
Pythium root rot	variable (none to good) able
Rhizoctonia stem rot	excellent

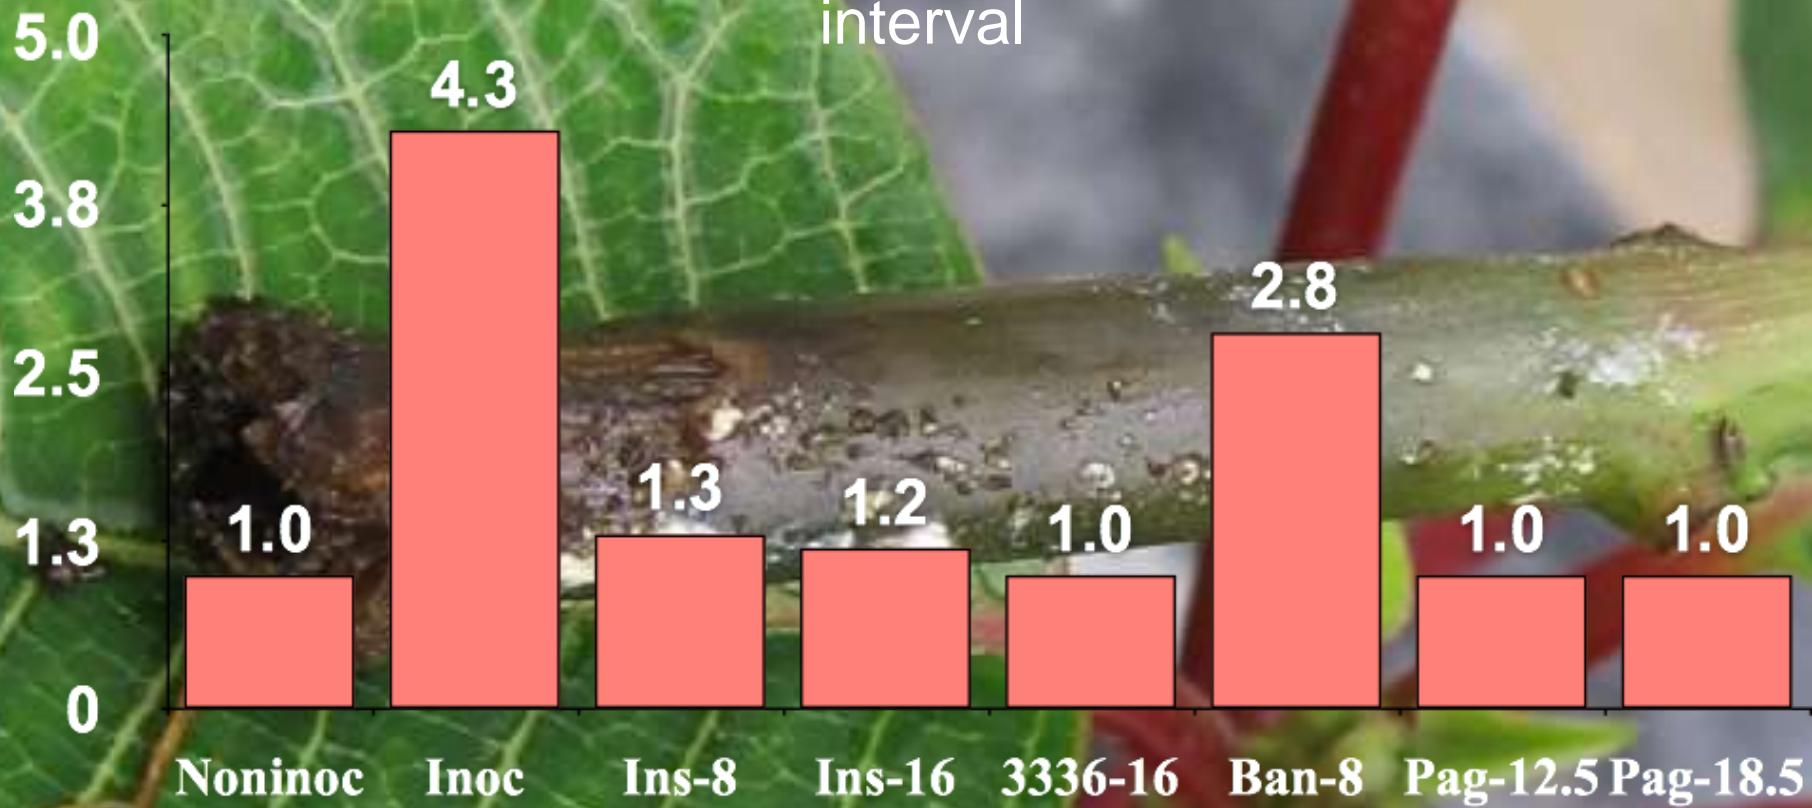

Prevention of powdery mildew on Gerbera

Nine sprays on a
7-day interval

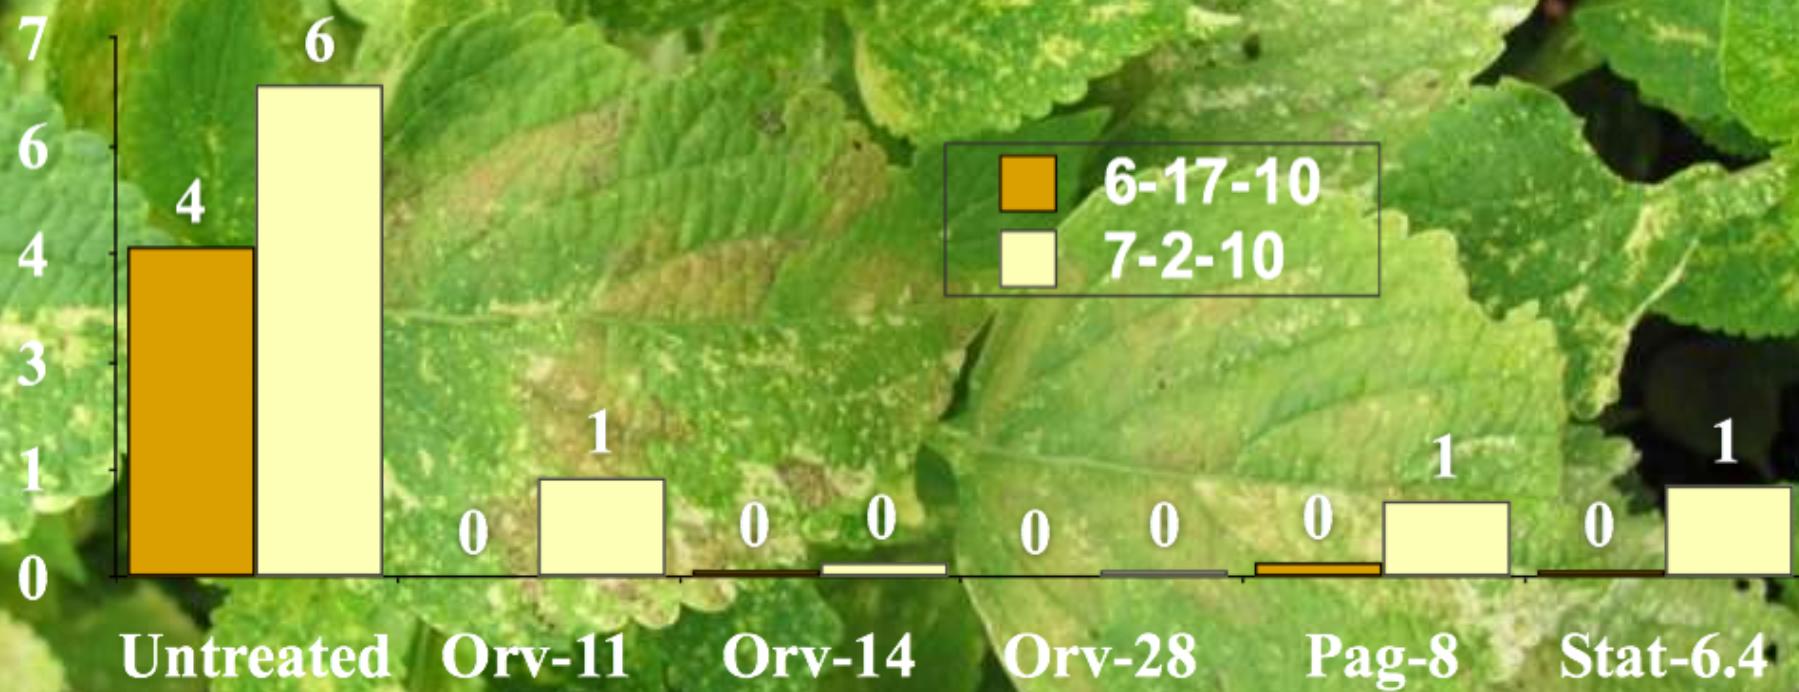

Rhizoctonia cutting rot control on Poinsettia

Two sprays on a 7-day interval

Prevention of Downy mildew on Coleus

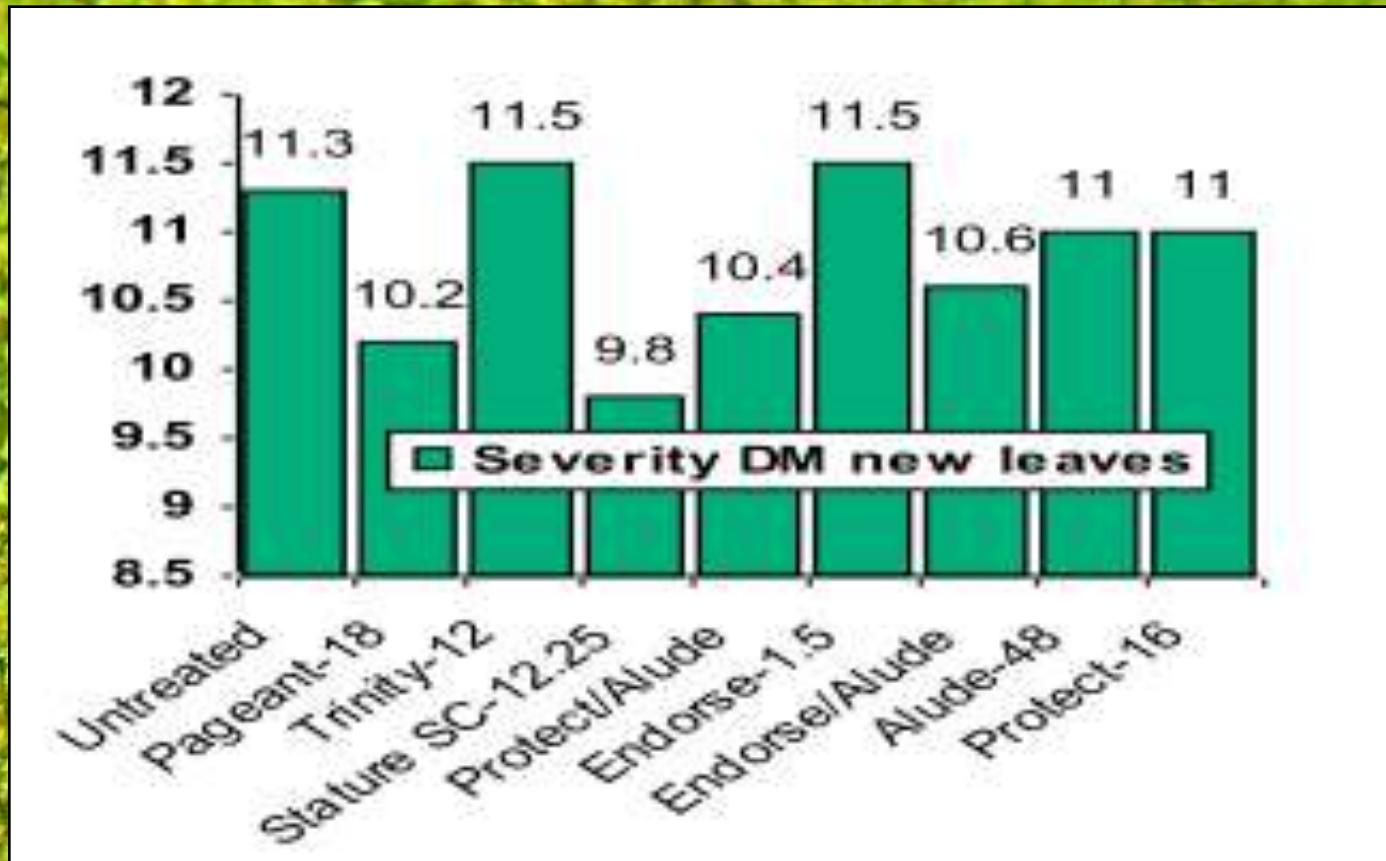

Daughtrey, Cornell University

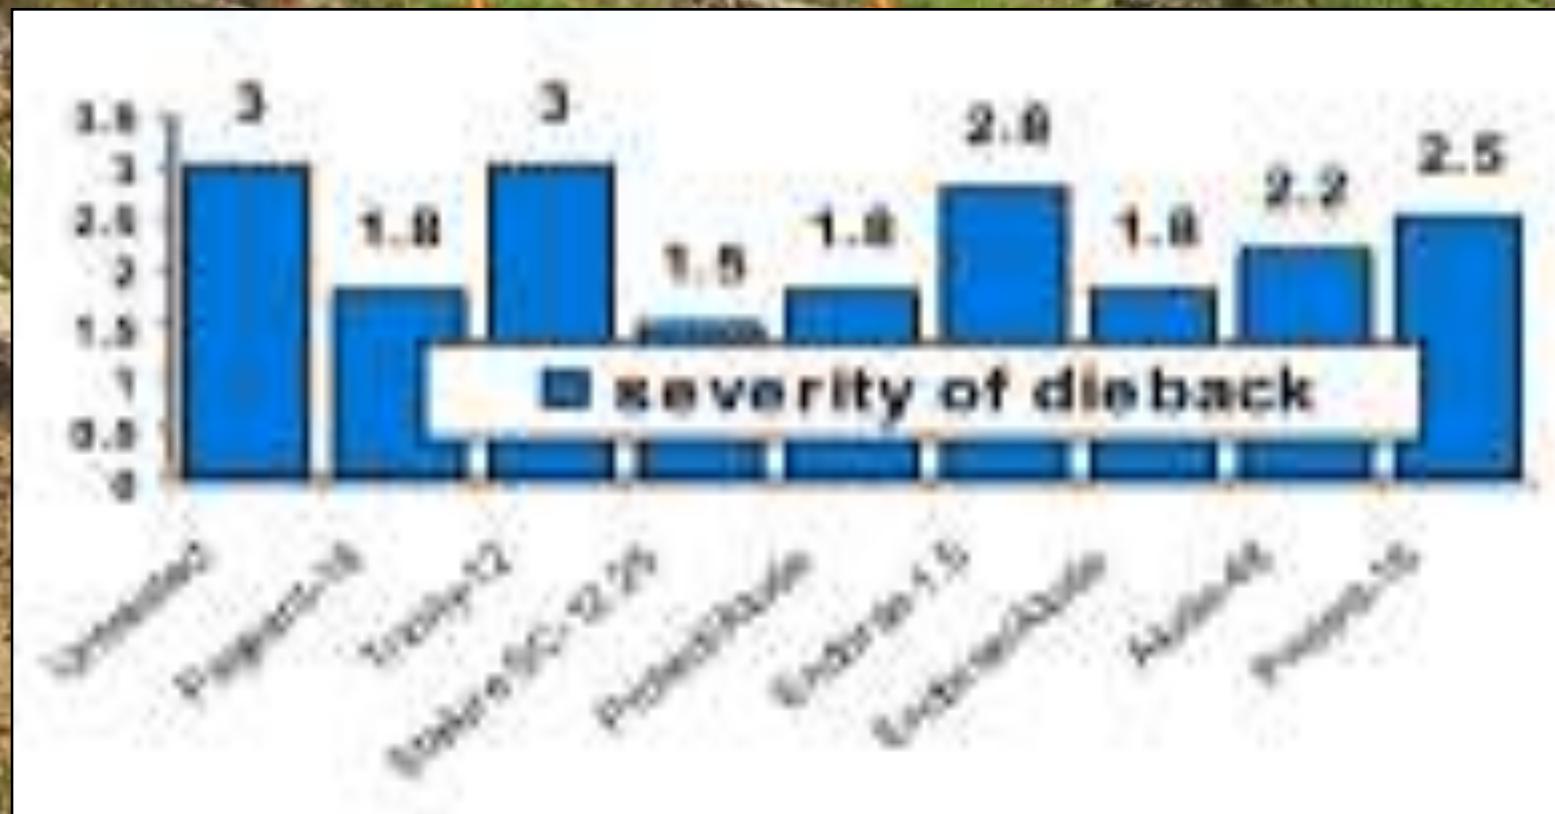

Long-Term Prevention

Controlling Downy Mildew on Rose

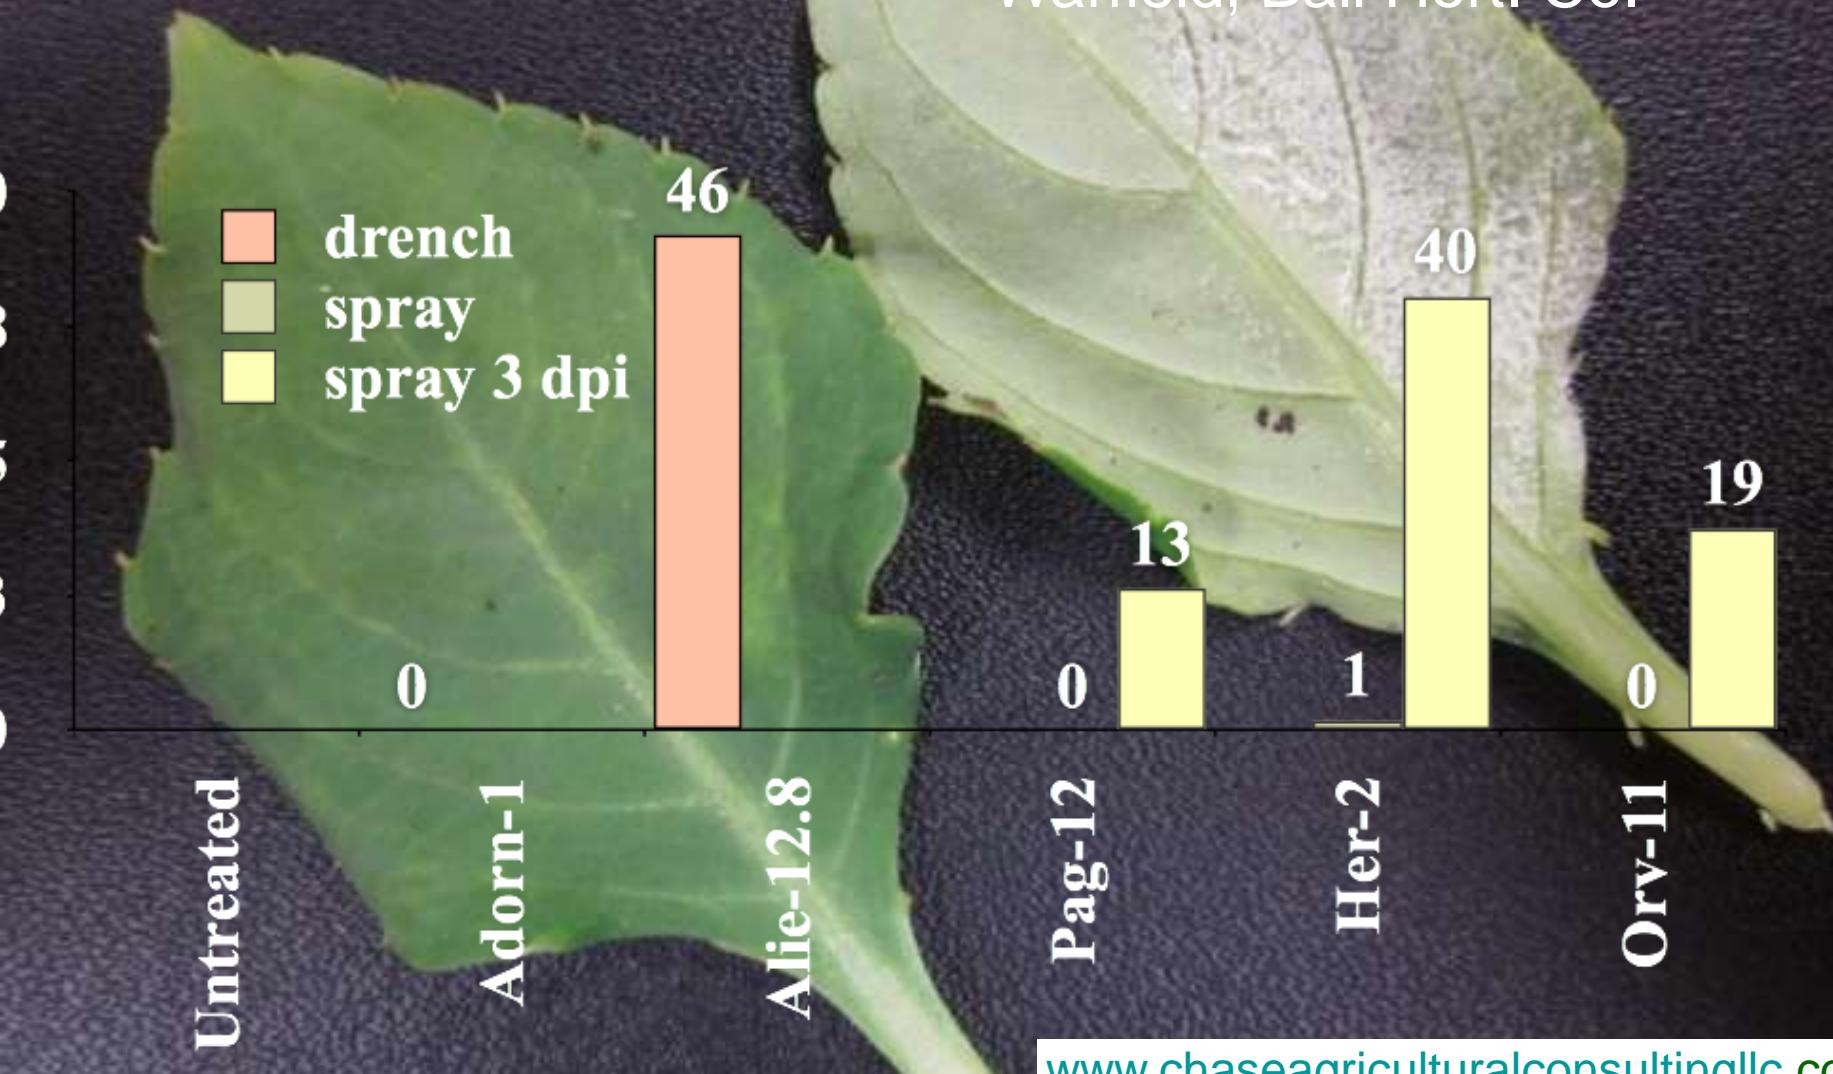

Four sprays on a 7-day interval

Long term prevention of dieback on rose

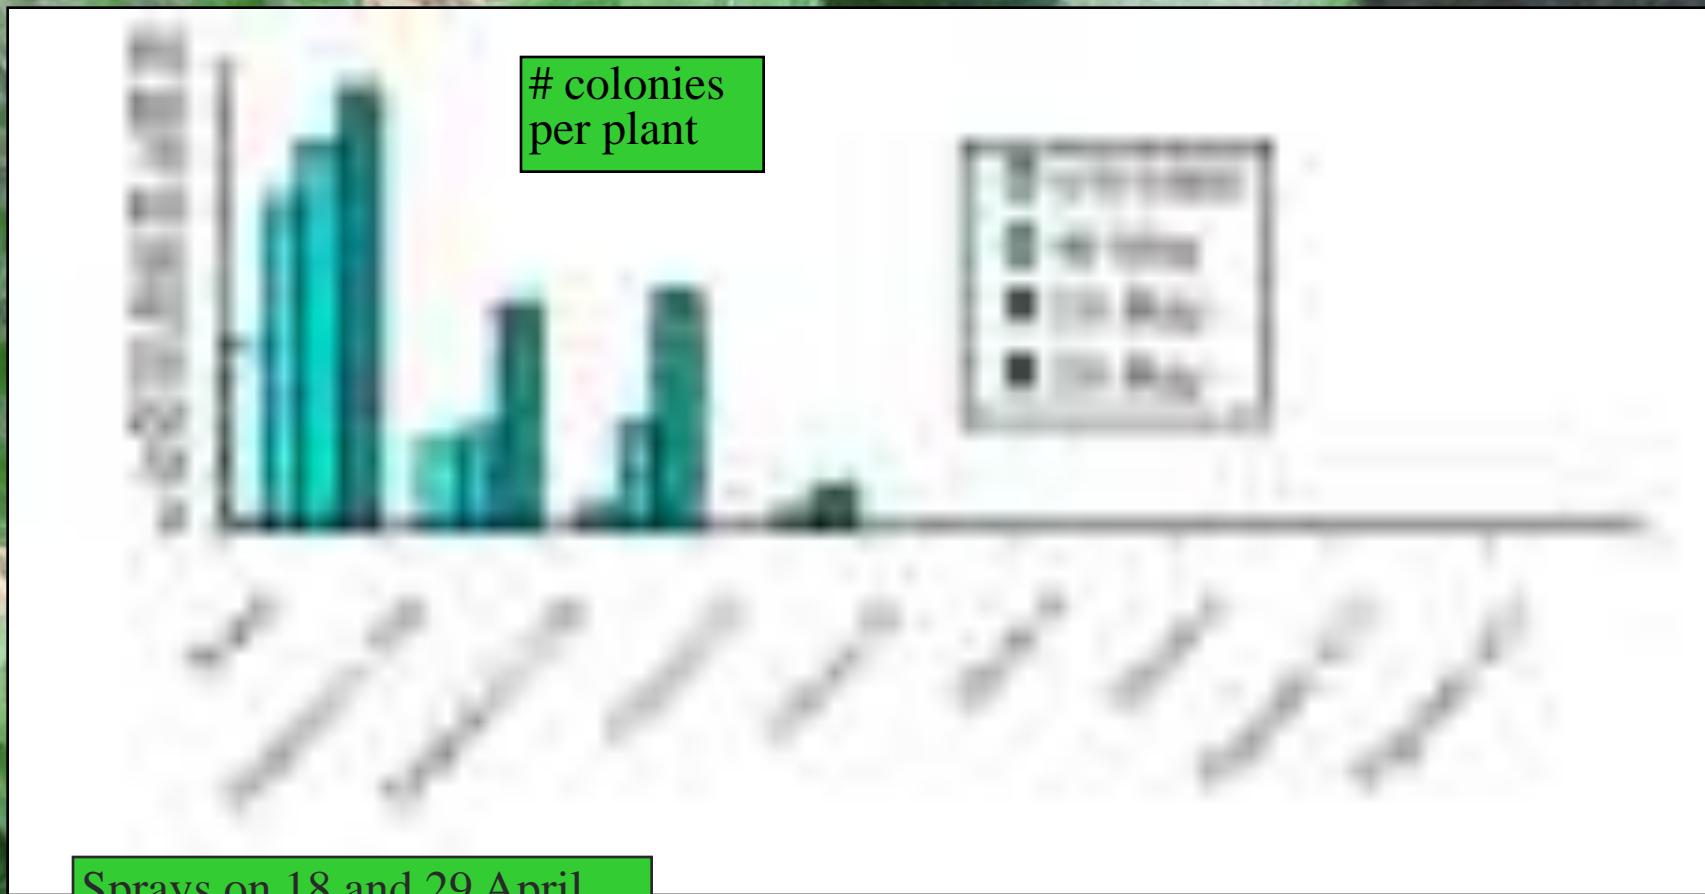

Prevention of Downy mildew on Impatiens

Warfield, Ball Hort. Co.

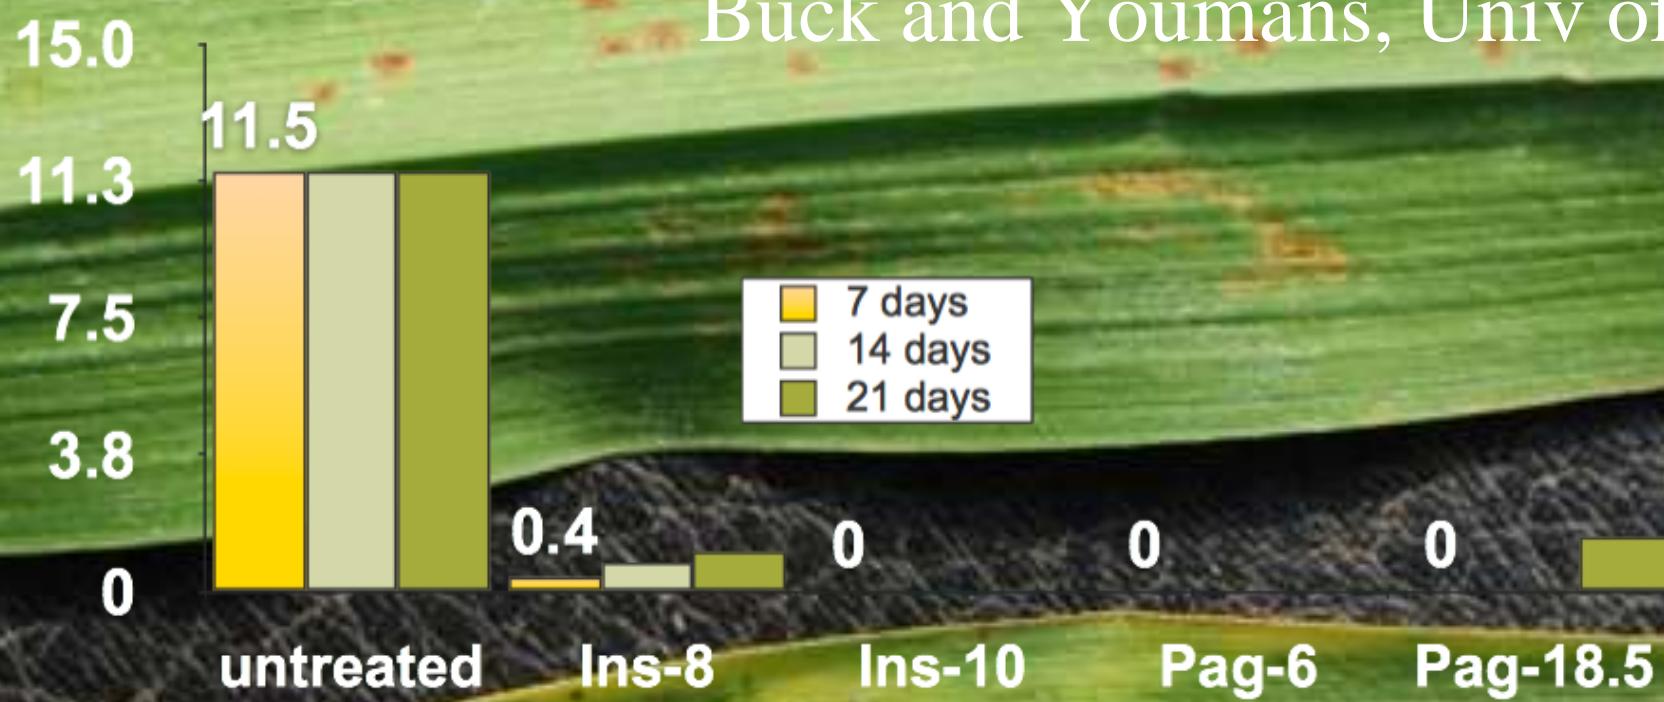

Long-term prevention of Gerbera powdery mildew

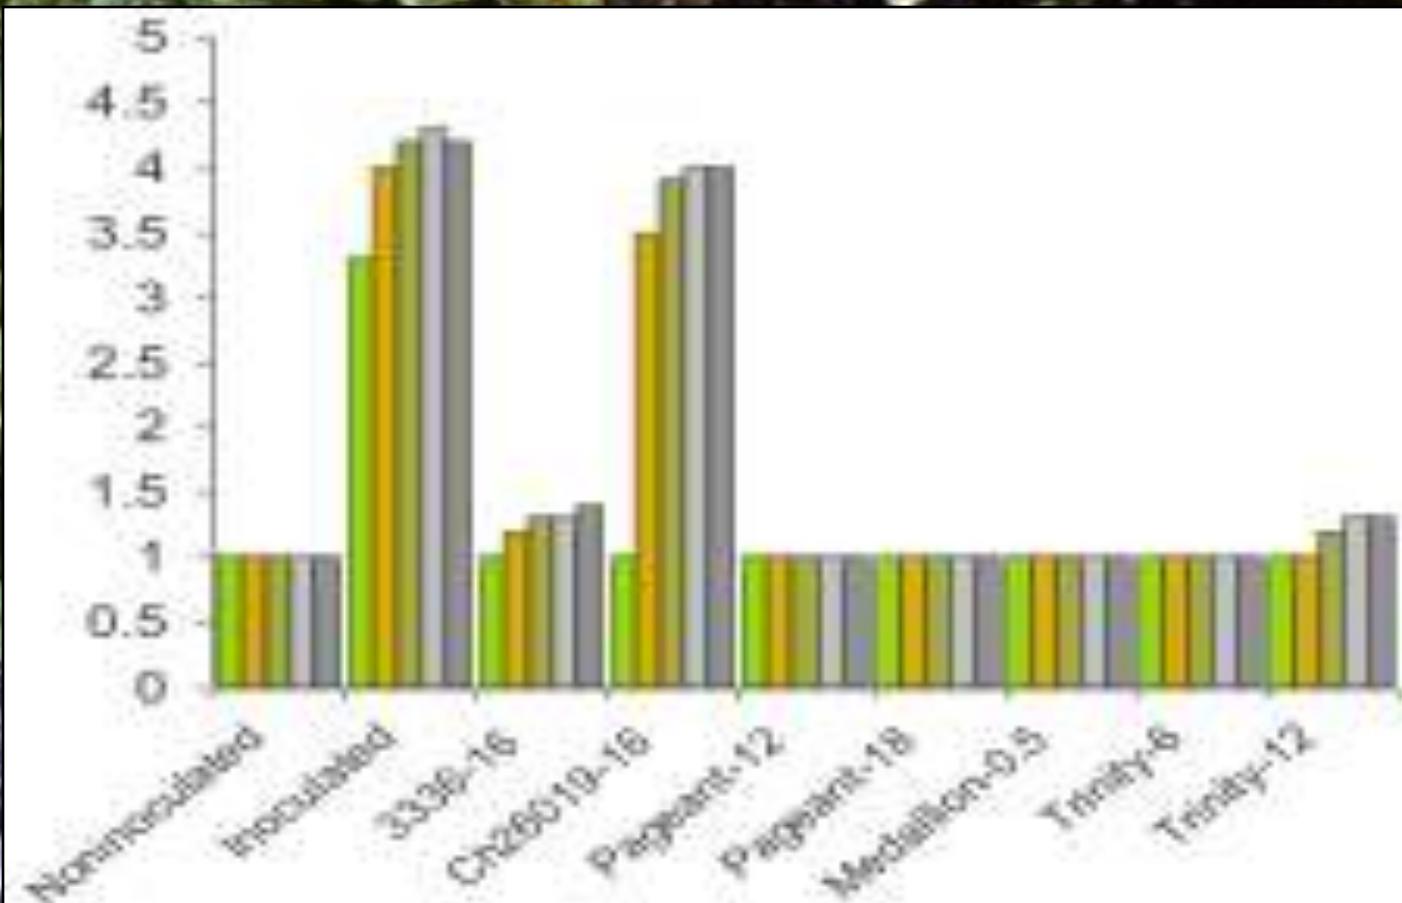

Longterm Prevention of Daylily Rust

Buck and Youmans, Univ of GA

Longterm Prevention of Rhizoctonia Stem Rot on Impatiens

Adjuvants not always needed

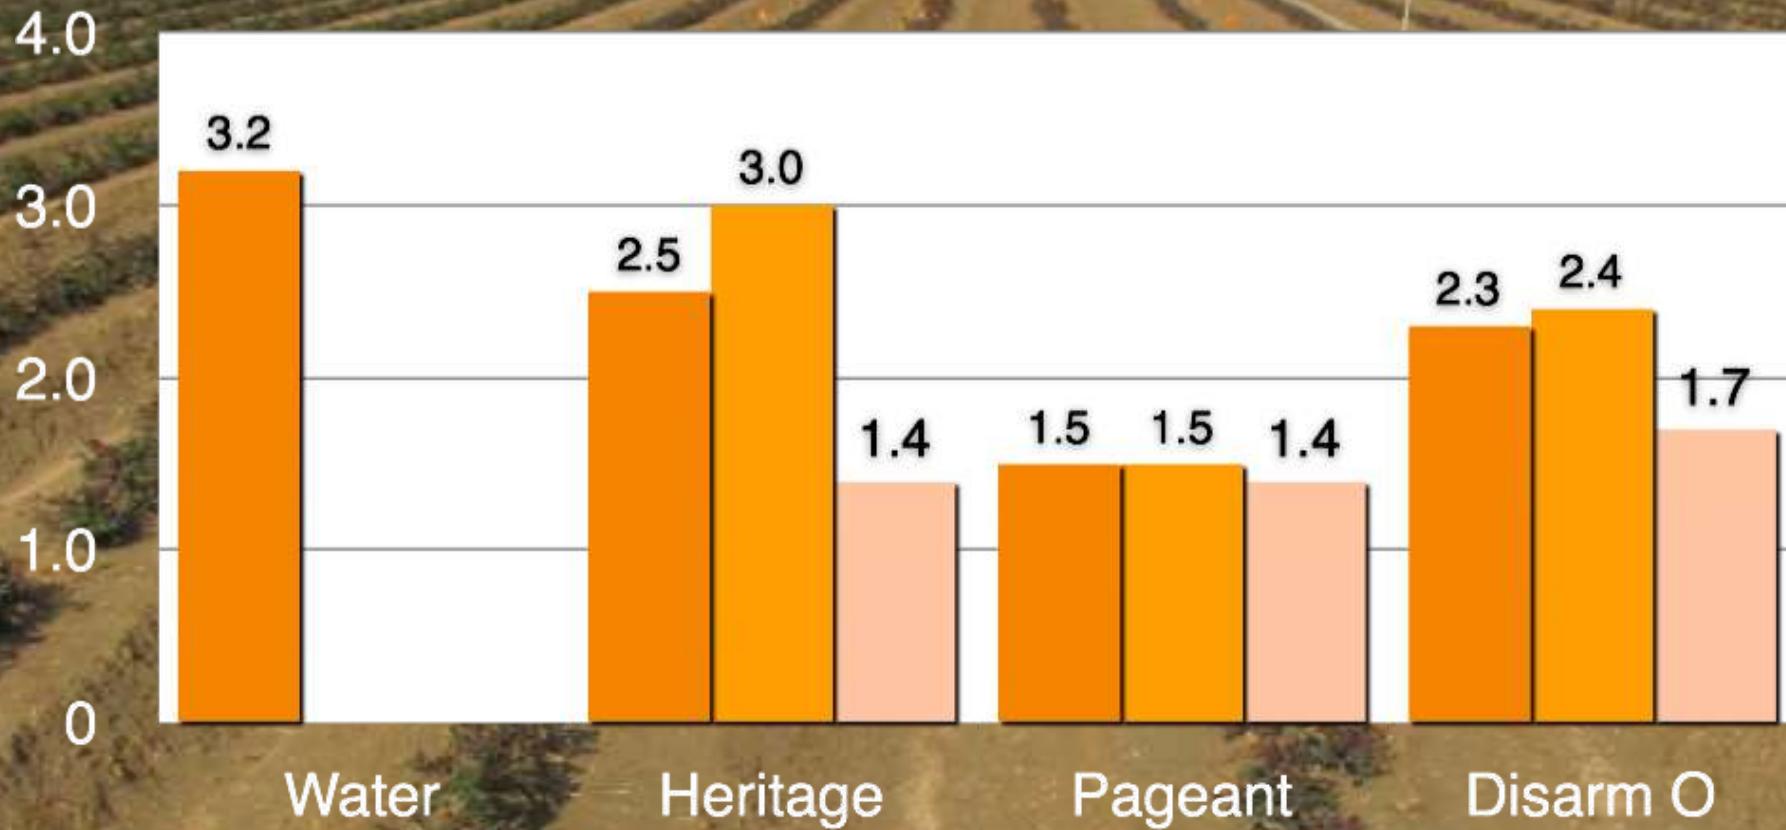

Hypericum rust control

Treatment	Rate/100 gal	Alone	With Latron B 1956
Water	—	16.1 b	Not tested
Compass O	4 oz	4.7 a	1.8 a
Insignia	4 oz	11.8 b	13.3 b
Heritage	4 oz	4.6 a	0.8 a
Pageant	4 oz	2.2 a	2.2 a

Powdery mildew control on rose with strobilurins

(with Gary Osteen)

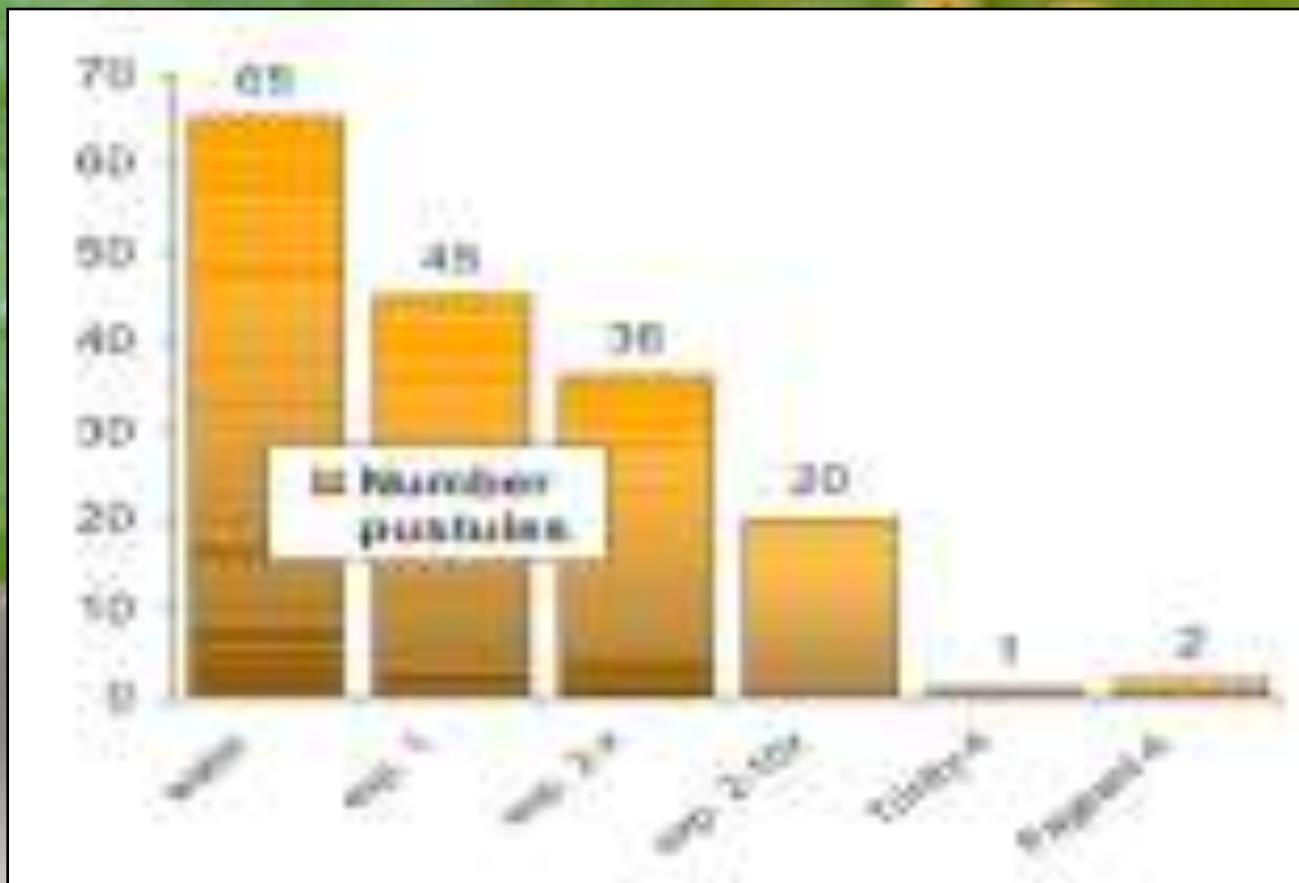

Dark orange = alone, medium = Bond MAX and pale = Franch

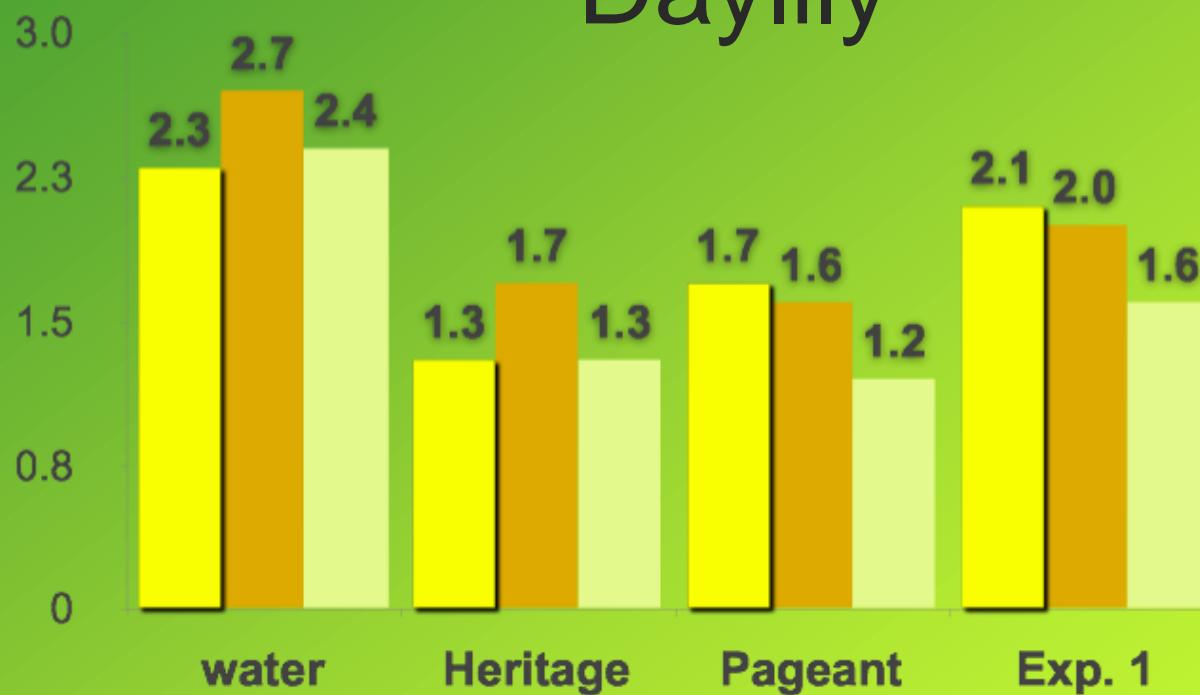

Good Eradicant on Some Diseases

Eradicating Rust on Bellis

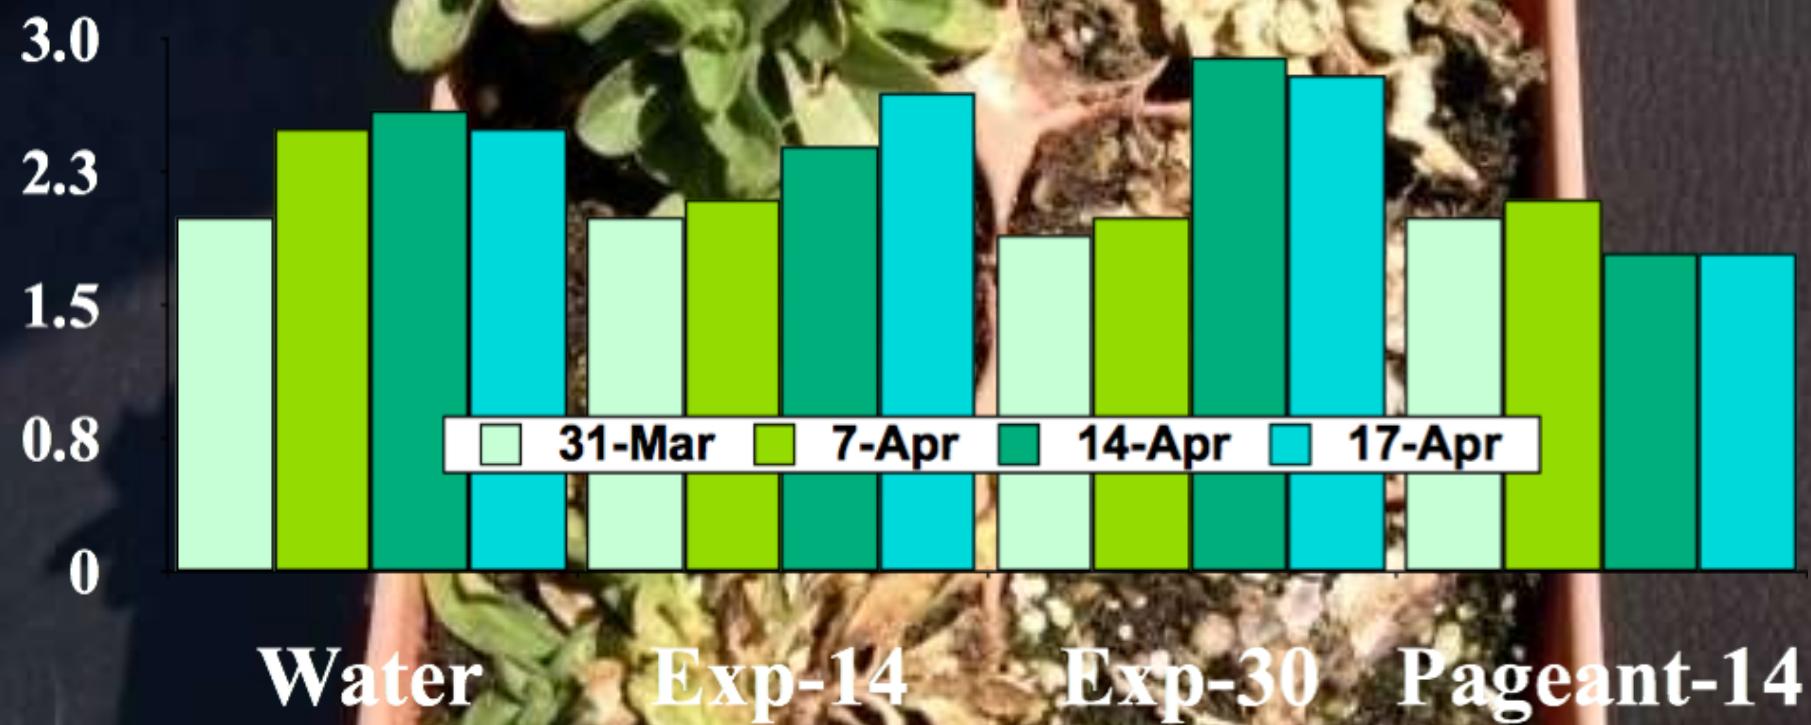

Eradicating Rust on Daylily

Three sprays on a 7 day interval

Eradicating Sclerotinia blight on Lobelia

Controls Tough Diseases

Heritage	8 oz	4 (drench)	0 b	75 ab

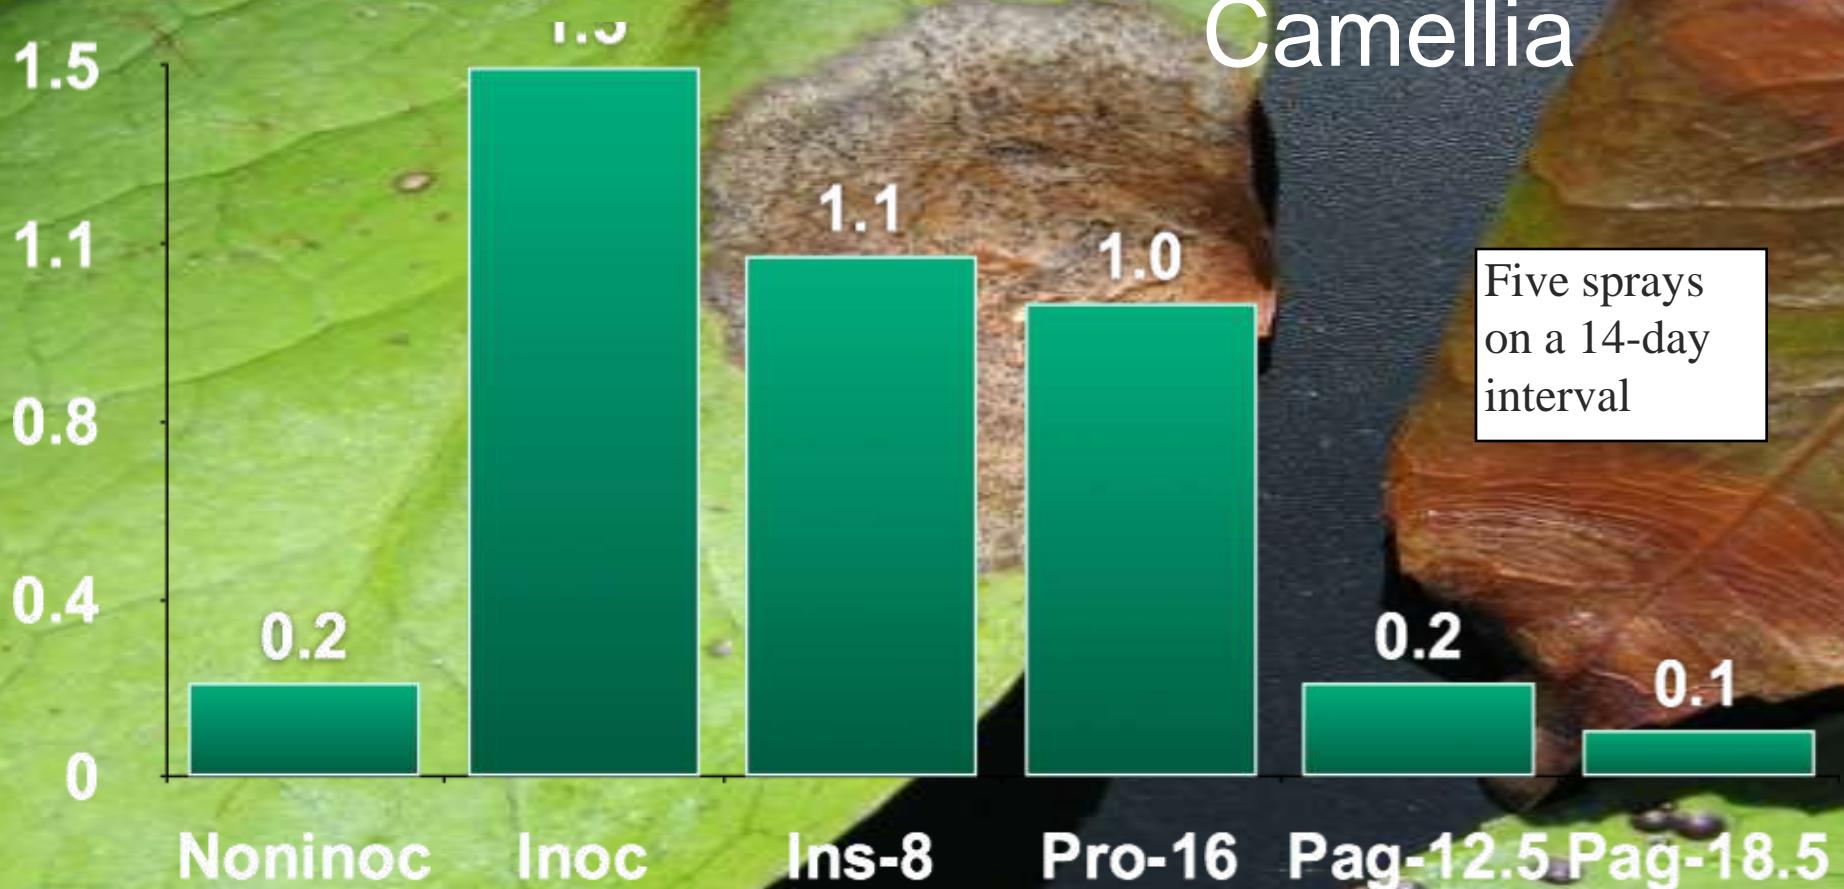

Prevention of Sclerotinia blight on stock – Wegulo University of Nebraska

Prevention of Phyllosticta on Euonymus

Prevention of Colletotrichum Anthracnose on Camellia

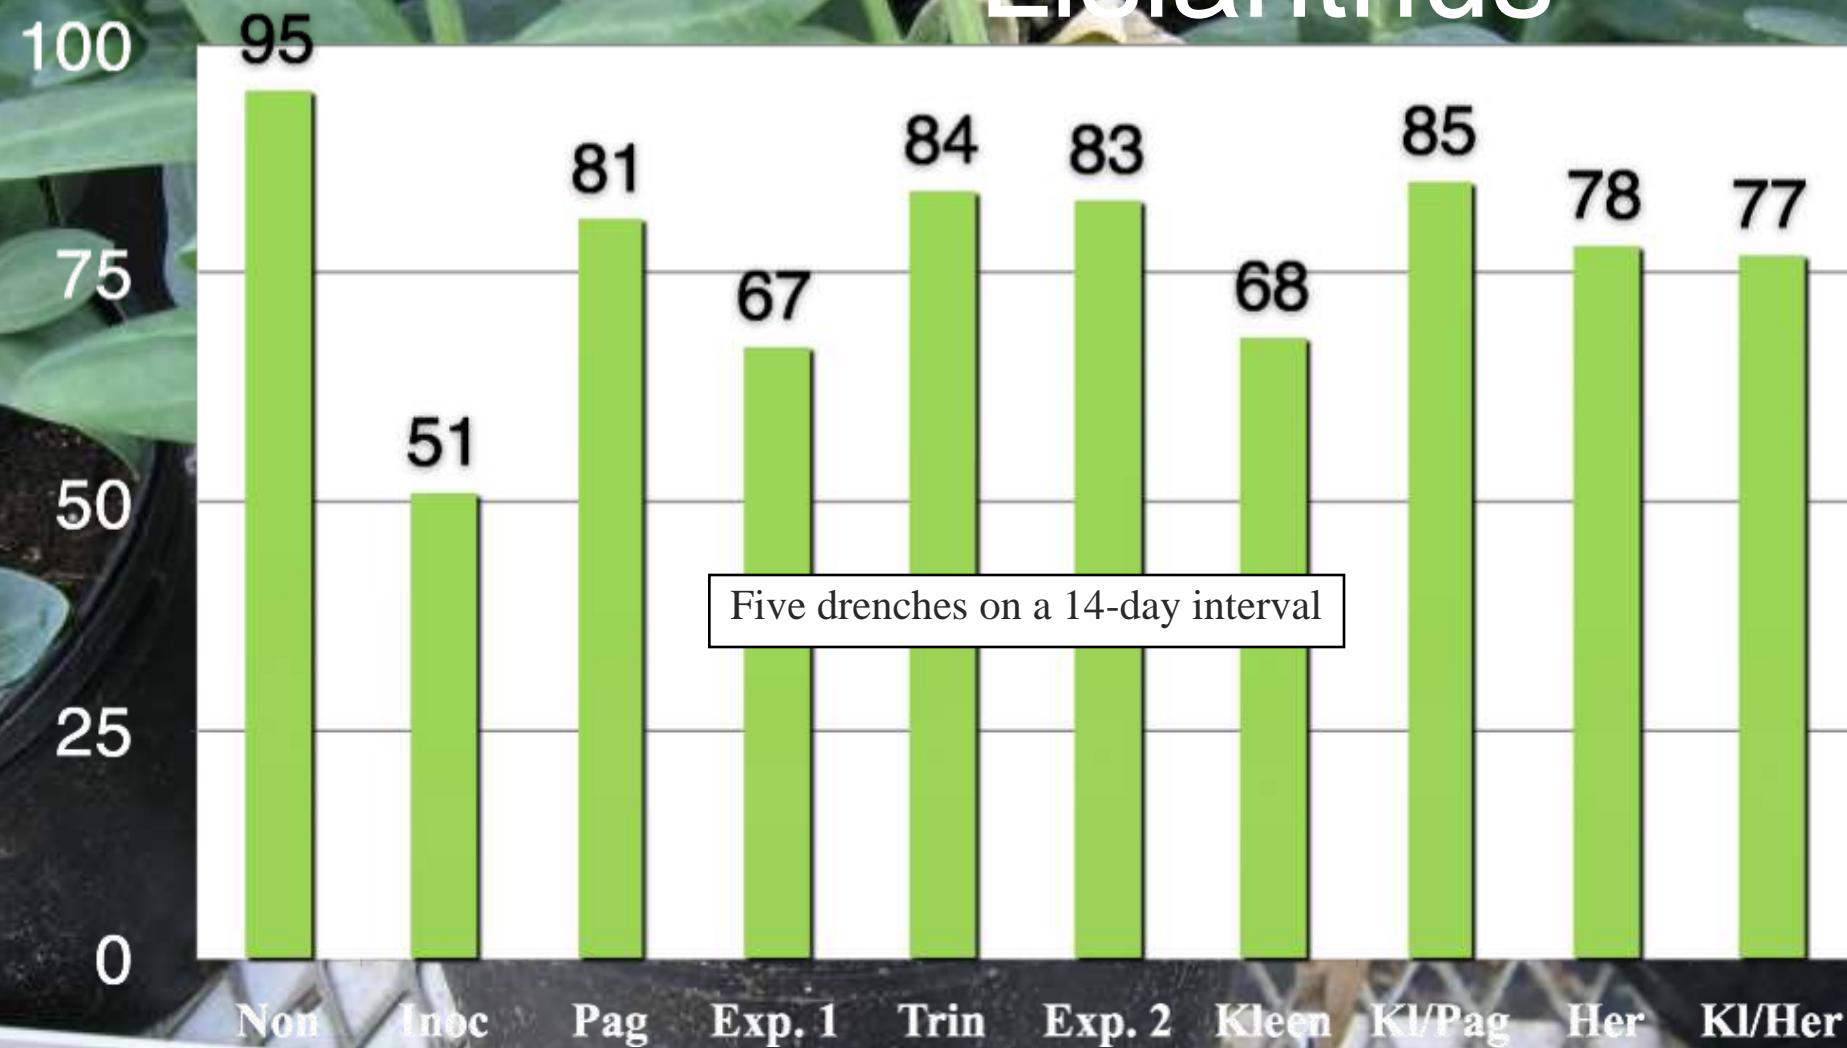

Control of *Colletotrichum* on cyclamen

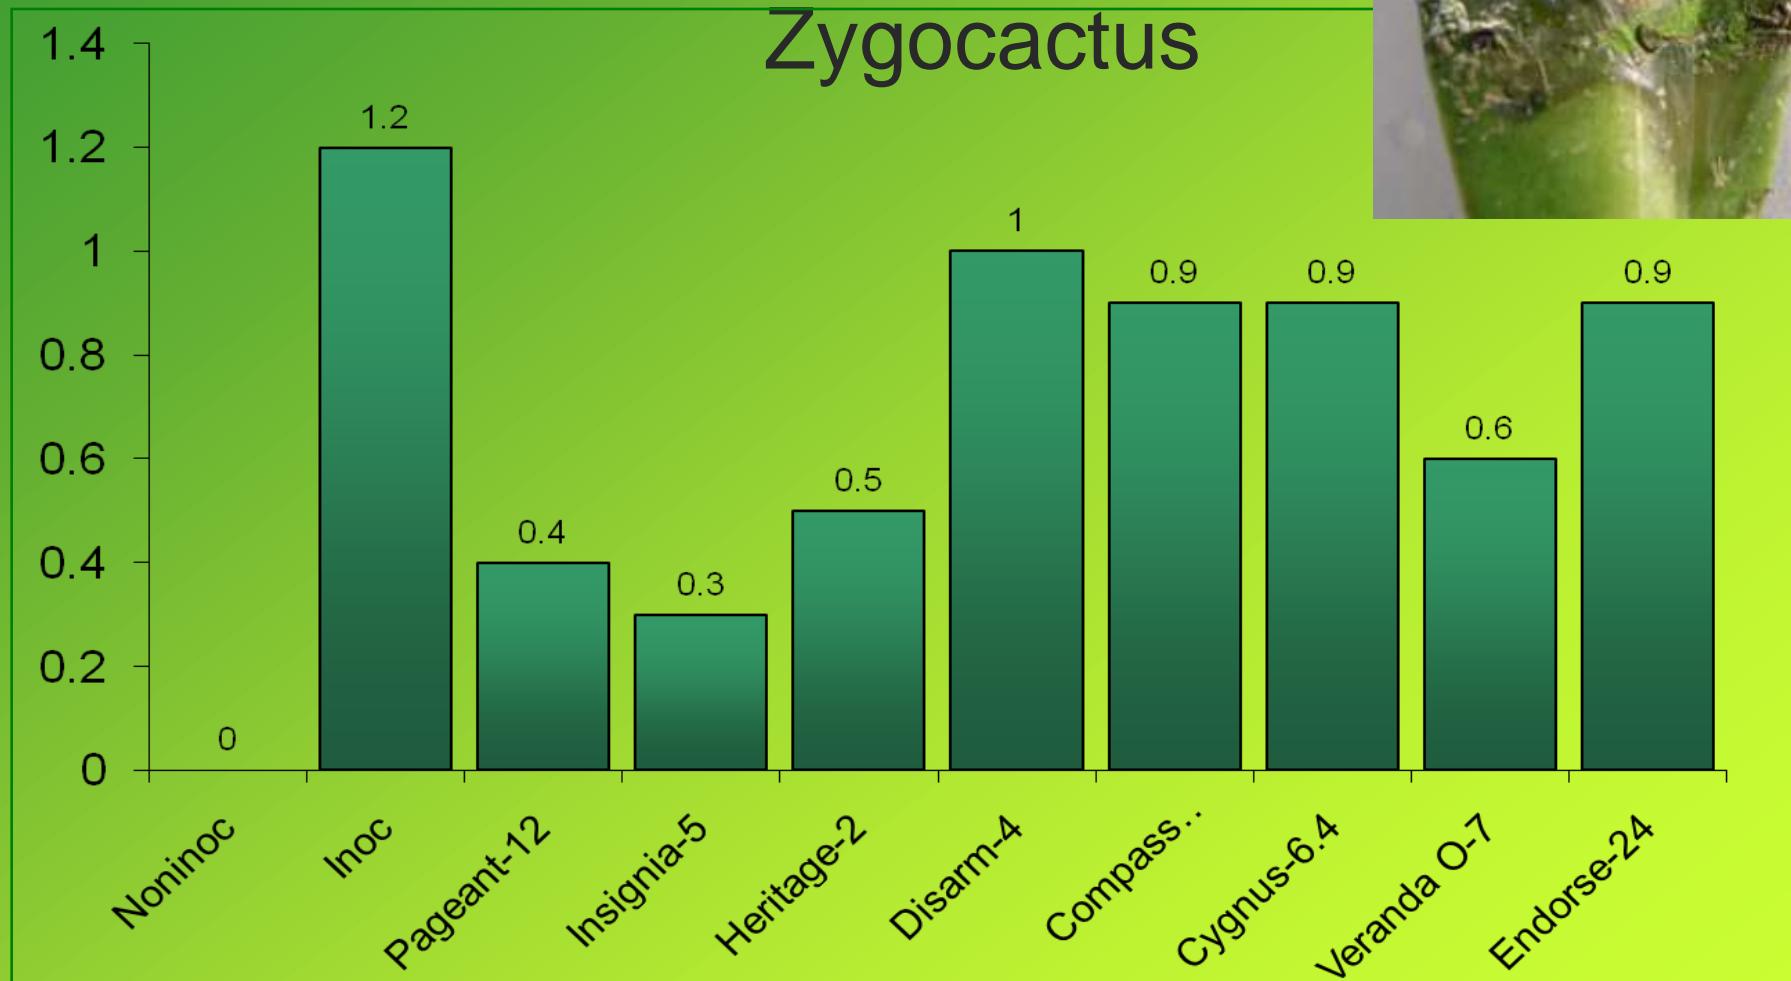

Treatment	Rate/100 gal.	# spots 8-24-11
Water Noninoculated	-----	0.0 a
Water Inoculated	-----	71.7 c
Trinity	4 oz	35.0 b
Trinity	8 oz	42.9 b
Trinity	12 oz	28.5 b
Trinity	24 oz	30.1 b
KleenGrow	12.5 oz	69.2 c
Pageant	18 oz	3.3 a

Fusarium wilt on Lisianthus

Prevention of Fusarium Stem Rot on Zygocactus

Two sprays on a 7 day interval

Controls New Diseases

Downy mildew on
coleus, impatiens
Boxwood blight
(*Cylindrocladium*)

The impatiens downy mildew, *Plasmopara obducens*, has been present in this country since at least 1897, when it was reported from Vermont on wild relatives of today's flower crop. Both *Impatiens pallida* and *Impatiens capensis* can host this disease; these species grow as wildflowers all over the Eastern United States

Impatiens Downy mildew

Daughtrey, Cornell University

The problem now striking the horticultural industry in the United States dates back to 2004, one year after the problem was first reported from the UK. A few greenhouses in NY and other states reported the problem in 2004, but the disease did not cause serious losses.

In October 2011, a disease of boxwood new to the United States was identified as boxwood blight, caused by the fungus *Cylindrocladium pseudonaviculatum*. To date, boxwood blight has also been found in Connecticut, North Carolina, Virginia, Maryland, Rhode Island, New York, Massachusetts, Ohio, Oregon, and British Columbia.

It is not known how the pathogen was introduced into the U.S.

The pathogen has since been found on *Pachysandra* in Connecticut.
