FERRARA AERIAL LADDER PUMPER

1.-5. "C" inspection.
 6.AC filter in back was missing a holder, part did not have one so i got one out of part truck and charged both front filter. Seal them with alum. AC tape.
 7. Remove and replace transmission cooler.
 8.Service Transmission
 9.Service T-case, found a little water in T-case.
 10.Service dryer. Check valve and purge valve.
 11 .Tor. U-bolts.
 12.Check code for engine. Found coolant level code. Clear the code to see if it will come back.
 13.Tested radiator cap. Found it bad remove and replace radiator cap.
 14-16.Put track on jack stall and start rear brake job. Remove all rear tires, both rear axles and hub drum ass. had a very hard time removing hub seal. Clean up all part and got one side shoe back on and remove one wear ring on drivers side.
 17.Finish clean up both sides of brake. Remove wear rings and install shoes on both sides. Went to parts and order seal driver and wear ring driver.
 18.Got seal driver and wear ring driver. Installed wear ring ,had to drill out seal driver to fit on our tool pull both hubs together and installed seals. Install hub on truck and axles. Pull tires on but found one tire on passenger side flat because of nail in tire so John M Scott a tire man coming.
 19-20.Found brake were wrong. Brake would not adjust. Remove drums, showed Art.Found right shoes and installed. Drum adjust brake and test drove brake, right good.
 .Check engine cooler. Found fitting bad remove and replace fitting.
 21.Check seat belt found a piece of card board in ratchet. Remove and belt was good.
 22.Check door alarm. Found light on dish under plugged. Plugged light in. I got Scott to open all the compartment for alarm and light in the compartment and all worked.
 30. Assist with compartment and alarms.
 31.Check pump panel light. Found bad grounds and broken wires. Remove all old light and put new LED light on.
 32.Check step light. Found two had bad bulb and one loose ground. Remove and replace bulb. Tighten up ground connection.
 33.Check dome light. Found one with bad bulb and one with bad diode. Remove and replace bulb. Replace light ass. on light with bad diode.
 34.Check light bar. Found bad bulb. Remove and replace bulb. Sealed top og light ass. with silicone.
 35.Check stabilizer light pig tail bad. Remove and replace light pigtail
 36.Remove and replace cable on waterway/ rescue lock pin.

FERRARA AERIAL LADDER PUMPER

1. A- Inspection.
2. Check out steering - Check steering U-joints, mid-shaft transfer box- (seems ok) tired ends- Drag link ends- (all seem ok)- Wheel bearing and king pin looseness- (all seem ok) only the steering gears seem to have some looseness- will monitor until next C-Insp.
3. Check engine lt. Comes on and off while driving- Mostly while accelerating- Hook up computer and found several eng codes- Mostly from last year- Low coolant level show 187 times- erased all codes and road test. No check eng LT. came one again.
4. Both left and right side- MID -body turn/marker LTS inop- Install two new LT fixtures and wire in.
5. All light lens on back of vehicle were very dull- Buff out all LT. Lenses on back of vehicle.
6. Failed batt test- Replace all batts.
7. Power steering fluid leaking from top of reservoir replace seal and tighten properly- Also hose leaking at pump- Remove and cut off bad end- Reinstall and replace with new clamp filled level- wash off all oil residue from side of eng.
8. R/Rear cab door step light- inop- Light was lying on cab step- was going to reinstall but all the mounting ears were broken off - Get new LT. fixture- Wire in and reinstall in side of step.
9. Check out coolant leak from right side of eng.- Found two bad hose clamps for oil cooler. Replace these clamps- Note: access to these clamps was very difficult.
10. R/Front cab door weather strip fell off frame- This weather stripping is not what belongs on this door frame- Original absolute- Modify this weather stripping to work and install.
11. R/Side down rigger LT. inop- LF had no power. Trace back wiring and found broken wire- Make wiring repairs- Retest- light dull- Found bulb was turning black- Replace bulb - Now ok.
12. Has bad water leak from pup cooler A- Top Eng.- Found both fitting at bottom of cooler bad and plastic lines. Both about 8' was also bad- Lines were brittle from eng. Heat- replace about 16' of line across eng and down frame.
13. Front A/C only blows warm- Check out freon charge and was completely empty- Charge system with half charge and check for leaks- Check out under dash evaporators, Hoses and all front components- Trace lines down frame to condenser - (behind rear axle) Found that high pressure line about 3/4 back had two previous splices installed- One splice was wrong, fitting to hose size and was leaking badly- Just about all of the 1/2 chager I put in to check was leaked out- Replace entire hose from compressor to condenser and all new fitting . Also while at condenser I noticed how plugged up with road and dirt debris- Air flow was very minimal- Clean out condensers from this debris- Now has good air flow.

Engine not running properly

Task performed:

1. Went to head out. Check truck, had no power act like filter were bad. Talk to driver, he said Tommy changed filter the day before so call Tommy and he said he found a lot of oil in filter. He thinks injectors are bad so I took drive to shop to get spare engine. When check the truck out and I went back to headquarters to help switch truck but go call to go to shop ST45.

THE HYDRAULIC OUTRIGGERS/ STABILIZERS WILL DRIFT OUT ABOUT 1.5 INCHES AFTER RETRACTING THEM CAUSING THE RED LIGHT INSIDE THE CAB TO FLICKER ON AND OFF. HYDRAULICS MAY NEED TO BE BLED. THE TRUCK ALSO NEED A CHARGER FOR THE SAFETY PAD OR A CIGARETTE LIGHTER PORT INSTALLED TO PLUG IN THE EXISTING CHARGER THAT WE HAVE.

05/30/2017 SERVICE REQUEST / 12: BROKEN / REPAIR
JUST WANTED TO GIVE YOU GUYS A QUICK LIST OF SOME THINGS I FOUND SINCE IT LOOKS AS IF WE ARE KEEPING THIS TRUCK AT 73 FOR A WHILE. NO EMERGENCIES... MAYBE YOU COULD LOOK AT A FEW OF THESE THINGS THE NEXT TIME YOU ARE OUT THIS WAY, THANKS... *PUMP PANEL LIGHTS ARE INOPERATIVE *FOAM GAUGE GOES OUT WHEN THE PRIMER IS PULLED (NOT A BIG DEAL) *THE STEERING HAS A WEIRD BINDING FEELING WHEN TURNING AT SLOW AND/OR NO SPEED... NOT A PROBLEM AS LONG AS ALL LOOKS WELL TO YOU GUYS *THE RIGHT FOG LIGHT IS INTERMITTENT... USUALLY COMES ON WITH A TAP *THE TIC CHARGER ISN'T CHARGING THE TIC... NOT A BIG DEAL THOUGH AS THE SPARE CHARGES *THE MASTER STREAM NOZZLE WILL NOT RAISE ELECTRONICALLY, IT WILL RAISE MANUALLY WITH THE SUPPLIED KEY *THE RESCUE/WATERWAY MANUAL SELECTOR WAS BENT AND WOULDN'T GO INTO RESCUE MODE. I BENT IT A LITTLE TO ALLOW IT TO GO INTO RESCUE MODE WHICH IS WHERE WE USUALLY LEAVE IT. IF ALL LOOKS WELL TO YOU GUYS THEN NO WORRIES. *I CAN'T GET THE REAR WORK LIGHTS TO COME ON, OPERATOR ERROR? I TURNED ON THE MASTER, TURNED ON THE WORK LIGHTS AND THEN MADE SURE THE INDIVIDUAL LIGHTS WERE TURNED ON AS WELL... STILL WOULDN'T COME ON? *THE OUTRIGGERS SEEMED TO CREEP OUT A LITTLE ON THEIR OWN AFTER USING THEM TODAY? *THE R-4 COMPARTMENT NEEDS SHOCKS (DOOR WON'T STAY UP) *THE L-5 COMPARTMENT HAS A BROKEN SHOCK... THE DOOR IS FREE SWINGING NOW. *IS THERE ANY CHANCE WHEN YOU GUYS COME OUT THIS WAY THAT YOU COULD BRING AN ASSORTMENT OF VELCRO STRAPS (DIFFERENT LENGTHS) AND THE STEEL MOUNTING STRAPS? IF YOU COULD DROP OFF AN ASSORTMENT, WE COULD USE WHAT WE NEED AND RETURN THE UNUSED PORTION. WE NEED TO WORK ON EQUIPMENT CONFIGURATION AND GET IT SET BACK UP LIKE IT USED TO BE WHEN WE HAD IT YEARS AGO. THANK YOU VERY MUCH! CHARLIE

06/08/2017 SERVICE REQUEST / 12: BROKEN / EXCHANGE - NEW
JUST A FEW MORE THINGS THAT HAVE POPPED UP SINCE THE LAST REQUEST... 1. WE SEEM TO HAVE SOME KIND OF ANOMALY WITH THE FOAM SYSTEM... WE ARE GETTING FOAM IN THE BOOSTER TANK. THIS MORNING AFTER RUNNING THE PUMP, THE FOAM TANK WAS OVERFLOWING. IT WAS REPORTED TO ME THAT B-SHIFT HAD A SIMILAR OCCURRENCE. IT SEEMS LIKE THERE MUST BE AN OPEN PATHWAY FROM ONE TANK TO THE OTHER? 2. THE NOZZLE WILL NOT RAISE AGAIN. LAST SHIFT I JUST WIGGLED THE CONNECTOR AND IT STARTED WORKING, THIS SHIFT THAT DIDN'T WORK. IT LOOKS LIKE IT NEEDS TO HAVE THE CONNECTOR REPLACED FOR THAT MOTOR. 3. THE DRIVERS SIDE LOW BEAM HAS A CRACK/MOISTURE IN IT... ANY CHANCE OF GETTING REPLACEMENT LED LIGHTS NOW THAT THIS TRUCK WILL BE HERE FOR A WHILE NOW? 4. THE #2 CROSSLAY PRESSURE GAUGE NEEDLE FELL OFF. 5. THE RIGHT SIDE REAR CAB/ROOF MOUNTED STROBE POD GOES ENTIRELY OUT FOR SEVERAL MINUTES, COMES BACK ON FOR A FEW SECONDS AND THEN BACK OFF FEW A FEW MINUTES, ETC. 6. THE PANEL LIGHT UP ON THE TURNTABLE CONTROLS HAS A BULB OUT. 7. THE REAR LADDER COMPARTMENT DOOR NEEDS SHOCKS NOW TOO 8. THE REAR LADDER COMPARTMENT DOOR NEEDS TO BE ADJUSTED... IT'S SETTING OFF THE DASH MOUNTED COMPARTMENT DOOR STROBE WARNING LIGHT WHEN DRIVING. THE LATCH LOOKS LIKE IT MAY BE A JOB TO ADJUST. 9. CAN WE HAVE THE OLD TURNTABLE MOUNTED ALUMINUM BOX OFF THE OLD L73?

06/12/2017 SERVICE REQUEST / 23: NOT CONNECTED / EXCHANGE - NEW REPLACED AUX AC SYSTEM WIT SERVICE REQUEST: NEED AN ELECTRICAL FAN PLACED IN THE REAR SEAT AREA FOR THE PARAMEDIC. DUE TO THE REAR AC NOT WORKING AND THE HOT TEMPERATURE CONDITIONS.

06/26/2017 SERVICE REQUEST / 38: SHORTED / REPAIRED UP TRANSISTOR REPLACED WITH RELAY FOR T
1. THE MASTER STREAM IS STILL NOT GOING UP AND HAS TO BE RAISED MANUALLY... THE NEW HEAT SHRINK CONNECTORS LOOK GOOD... MUST BE ANOTHER PROBLEM NOW? 2. THE MASTER STREAM NOZZLE PATTERN CONTROL WORKS BUT IT IS REAL SLUGGISH AND SOMETIMES WILL NOT WORK WITH WATER FLOWING... IS THERE ANY CHANCE WE CAN SWAP OUT THE NOZZLE WITH OUR OLD TRUCK? THAT NOZZLE WORKED GREAT! 3. THE RIGHT FRONT HEADLAMP (THE NEW LED LAMP) HAS HAD MOISTURE IN IT SINCE THE FIRST C-SHIFT FOLLOWING THE INSTALLATION... IT'S JUST GETTING WORSE. THE LAMP DOES NOT HAVE ANY VISIBLE DAMAGE. I KNOW THIS LAMP IS EXPENSIVE... IS THIS LAMP UNDER WARRANTY? 4. THIS TRUCK HAS THE NORMAL BELT SQUEAL... I BELIEVE IT WAS ALWAYS CAUSED BY THE ALTERNATOR BELT WHEN WE USED TO HAVE IT? IT'S NOT BAD BUT IT IS GETTING A LITTLE WORSE EVERY SHIFT. 5 THE RIGHT SIDE SCENE/POLE LAMP IS OUT. I DON'T SEE ANY DAMAGE BUT THE BULB LOOKS TO BE DARK IN COLOR. 6. CAN YOU SEND US OUT A FEW MORE OF THE LONG VELCRO STRAPS. WE USED THE ONES PREVIOUSLY DELIVERED AND STILL NEED TO MOUNT AND SECURE A FEW MORE THINGS. SORRY TO BE A PAIN BUT YOUR HELP IS TRULY APPRECIATED BY ALL OF US ON L73!!! RESPECTFULLY, CHARLIE BOUCK

SERVICE REQUEST / 18: LEAKING / EXCHANGE - NEW

TYPE PROBLEM INTO DESCRIPTION... L73 ASSIGNED GENESIS HYDRAULIC CUTTERS (10186842) SUSTAINED A BROKEN GUARD WHILE UTILIZING FOR EXTRICATION TRAINING ON 2/21 (C-SHIFT). THE CUTTERS ALSO HAVE A KNOB USED FOR HANDLE ADJUSTMENT THAT NEEDS REPLACEMENT (THE KNOB ITSELF IS BAD AND WON'T TIGHTEN). THE UNIT IS ALSO MISSING THE PLASTIC PROTECTIVE COVER THAT GOES OVER THE CONNECTION END OF THE TOOL... ALSO MISSING THE HOSE END DUST COVERS. THE HOSES ALSO HAVE HOSE OUTER JACKET DAMAGE FROM USAGE... NOTHING APPEARING TOO SIGNIFICANT. IS IT POSSIBLE TO HAVE A SPARE SET OF TOOLS BROUGHT OUT AND/OR HAVE OUR CURRENT TOOLS EVALUATED FOR MAINTENANCE? ALSO... THE POWER UNIT SEEMS TO "BOG DOWN" WHILE CUTTING UNDER A LOAD SIGNIFICANTLY MORE IT DID IN IT DID IN THE PAST... TO THE POINT WHERE IT OCCASIONALLY STALLS THE ENGINE. THANK YOU, CHARLIE
