ARE YOU PROPERLY PREPARED?

This year, everyone will need to take all normal precautions, with one additional consideration. You will need to include COVID-19 into your family plan.

- Socially distance while sheltering.
- Properly care for family and friends who are part of the most vulnerable group.
- Provide masks or facial coverings and hand sanitizer for all family members.

Normal Preparations include having three to five days of: canned food, bottled water, batteries, flashlights, prescription medications, pet food, etc.

Check all of your household protective equipment. Now is the time to replace defective or old storm shutters/hardware.

IMPORTANT REMINDER:

All Palm Tran employees are considered essential and vital to the success of our evacuation plan. All staff should be aware of their responsibilities should Palm Tran be called upon.

Be sure all of your personal contact information is current. This information is very important as Palm Tran will use this information to contact you with storm updates and job assignments.
