***Palm Beach County Unified Local Mitigation Strategy***

The purpose of the Palm Beach County Unified Local Mitigation Strategy (LMS) is to develop and execute an ongoing unified strategy for reducing the community's vulnerability to identified natural, technological, and human-caused hazards. The strategy provides a rational, managed basis for considering and prioritizing hazard-specific mitigation options and for developing and executing sound, cost effective mitigation projects. The LMS also provides a basis for justifying the solicitation and use of local, state, federal, and other monies to support hazard mitigation projects and initiatives. The Palm Beach County Unified LMS believes broad community support, including ongoing public and private sector involvement, is very important to the success of the program.

Palm Beach County (PBC) has had an increasing number of stakeholders preparing to incorporate the LMS as part of their Floodplain Management Plans in accordance with the CRS Coordinator's Manual Activity 500 – Flood Damage Reduction Activities, specifically, Activity 510 – Floodplain Management Planning. Several communities have worked with PBC Public Safety Department's Division of Emergency Management, the Building Division of the Planning, Zoning, and Building Department, and private contractors in efforts to identify the resources necessary to accomplish planning initiatives. Currently, the majority of our municipalities use the LMS for their floodplain management plan in addition to unincorporated Palm Beach County.

### 2. Describe how this annual progress report (not the credited Plan) was prepared and how it was submitted to the governing body, released to the media, and made available to the public:

The status of all mitigation projects and success stories were reported and discussed at the quarterly LMS Working Group and Steering Committee meetings (open to the public).

#### LMS Steering Committee Meetings

- February 15, 2023
- May 25, 2023
- August 23, 2023
- October 25, 2023

#### LMS Revisions Sub-Committee Meetings

- June 7, 2023
- July 26, 2023
- August 16, 2023
- October 18, 2023
- November 19, 2023

#### LMS Working Group Meetings

- March 15, 2023
- June 21, 2023
- September 27, 2023
- December 13, 2023

At two (2) of the four (4) Steering Committee meetings and after discussion of the status of each project, the Prioritized Project List (PPL) was updated. The PPL was then posted on the DEM website once approved by the Steering Committee and was made publicly available for review at [2023 Fall Prioritized Project List \(PPL\).pdf \(pbc.gov\)](https://discover.pbc.gov/publicsafety/dem/PDF/2023%20Fall%20Prioritized%20Project%20List%20(PPL).pdf)

All general meetings were publicized through media releases, social media platforms, and posted announcements. See Annex 3 for media release example. The minutes for each LMS Working Group and Steering Committee meetings are posted on our LMS webpage for public view at [readyabc.com/LMS](https://readyabc.com/LMS)

or

<https://discover.pbc.gov/publicsafety/dem/Sections/Planning-Local-Mitigation-Strategy.aspx>

We have provided copies of this report to our governing body and local media. The governing board for the CRS is the LMS Steering Committee. A copy of this progress report has been posted to the homepage of the Palm Beach County Division of Emergency Management website for public review. A media release announcing the report and posting has been executed.

**3. Provide a description of the implementation of each recommendation or action item in the action plan or area analysis report, including a statement on how the project was implemented or not implemented during the previous year:**

Each of the 109 action items on the 2023 Project Prioritized List (PPL) in the LMS were reviewed by the LMS Steering Committee during the 2023 LMS PPL Update. The status updates are included in the tables in Annex 1 and Annex 2.

Major progress in the LMS program during this reporting period includes:

- The LMS is currently undergoing the revision process. The LMS Revisions Sub-Committee met five (5) times in 2023 to update the document. One (1) significant change made was the inclusion of a fourth question to break scoring ties during the evaluation process. The fourth question added is: Which project has the highest Benefit/Cost Ratio? The question was then moved to Question #1 as cost effectiveness is of paramount importance in mitigation spending.
- The LMS Program is working with PBC Planning, Zoning, and Building (PZB) Department to produce a Watershed Master Plan (WMP) for credit under the Community Rating System (CRS). PZB applied for and was awarded grant funding thru the Watershed Planning Initiative under the Hazard Mitigation Grant Program (HMGP), as approved by Florida Division of Emergency Management.
- Quarterly Meetings were held for the LMS Working Group (4), LMS Steering Committee (4), and the CRS User Group (4). There were two (2) meetings of the LMS Evaluation Panel to evaluate, score, and rank new projects for the Prioritized Project List (PPL).
- PBC continues to use the LMS WebEOC portal in capturing community submission packages for the Prioritized Project List (PPL). A total of 109 projects are active on the PPL.
- The LMS Newsletter was published three (3) times in 2023. These documents are sent out to the LMS Working Group, available to all municipalities to be displayed in their public spaces, and posted online at [readyabc.com/LMS](https://readyabc.com/LMS) or <https://discover.pbc.gov/publicsafety/dem/Sections/Planning-Local-Mitigation-Strategy.aspx>

- PPL Mitigation projects continued to be funded from previous disasters, including those of flood mitigation projects. See Annex 1 for updated projects in progress for Hazard Mitigation Grant Program funding.

**4. Discuss why any objectives were not reached or why implementation is behind schedule.**

The Program for Public Information (CRS Activity 330) Committee met five (5) times to complete the PPI. However, a quorum was not met each time precluding progress on completion. At present, the consultant, procured by the Building Division of Planning, Zoning, and Building Department, is finalizing the document which should be available for approval at the next PPI meeting scheduled for Thursday, March 28, 2024.

**5. What are the recommendations for new projects or revised recommendations?**

The LMS PPL continues to operate on its normal schedule. New projects are scored and ranked by the LMS Evaluation Panel and adopted by the LMS Steering Committee. The review periods occurred in April/May and September/October of 2023. Five (5) of the 21 projects added in April/May 2023 period and five (5) of the 12 projects added in the September/October 2023 period were dedicated to mitigating flood issues within the respective communities. Projects that were on the list for more than five (5) years at the time of the bi-annual reviews were purged after contacting the respective communities for updating or removal. New PPL projects are listed in the table found in Annex 2.

**6. Summarize any flooding that occurred during calendar year 2023.**

The LMS ranks floods at the top of the list of identified hazards because of their projected impact potential across the entire spectrum of community exposure and services. Florida, and especially PBC, is highly susceptible to localized flooding. Inland and coastal flooding are the most likely types of floods frequently affecting communities across the County. The tropical rainfall pattern in the county coupled with the hurricane season (June 1 through November 30) makes PBC particularly vulnerable to flooding, especially later in the hurricane season when the water table is high and the ground is saturated from impacts of cyclones and rain events. PBC received 73.97 inches of rain in 2023, 12.22 inches above normal. The following flooding advisory statistics were noted for CY 2023:

Areal Flood Advisories:	89
Areal Flood Watches:	8
Flash Flood Warnings:	3
Flash Flood Watches:	0
Coastal Flood Watches:	0
Coastal Flood Advisories:	3
Coastal Flood Statements:	18
Tropical Storm Warnings:	0

**7. What impact did the flooding have on repetitive loss areas?**

This office did not receive any reports of flooding from repetitive loss property area owners. The rainfall average was 12.22 inches above the normal rainfall average in 2023 throughout unincorporated PBC. The County was limited to minor street flooding. No structures were reported as flooded during any of 2023 rain events.

## Annex 1: PPL Project Progress

As part of this annual progress report preparation process, the LMS Coordinator prepares an update on the status of all active county flood mitigation projects from the state. The most current update to projects submitted for Hazard Mitigation Grant Program (HMGP) funds for Hurricane Ian (4673) and Hurricane Nicole (4680) that were awarded funds are listed below. A total of \$7,673,818.63 in total project costs.
