LIBRARY SERVICES ELEMENT

I. INTRODUCTION

A. Purpose

The purpose of the Library Services Element of the Palm Beach County Comprehensive Plan is to ensure the provision of library services to residents. This Element is optional, as it is not required by Chapter 163, F.S. The standards set in this Element will guide the future development of the Palm Beach County Library System (Library System). The County is responsible for the funding and operation of the Library System through the Palm Beach County Library District. The Library System is the community's primary agency for storage and retrieval of information. The Library System is an institution available to all residents regardless of economic or educational level, physical handicap, race, creed or national origin. It provides access to information, ideas and cultural expression objectively and is dedicated to representing all viewpoints on issues. The Library System is instrumental in developing a sense of community and local pride in the County by providing a forum for discussion of issues important to the community as a whole.

B. Assessment and Conclusions

In 1989, the Library System was comprised of eleven locations totaling 112,290 square feet, which represented 0.22 square feet per capita. An additional 104,660 square feet was added as a result of the Library Expansion Program I, which was completed in 1997. This ambitious expansion program increased the number of facilities to fourteen and the square feet per capita to 0.36.

In 2002, voters overwhelmingly approved the issuance of bonds to help fund the Library Expansion Program II. The $104.7 million program was funded with income from the sale of bonds, impact fee revenues, and operating budget transfers. Scheduled for completion in 2013, the second phase will bring the number of branches to seventeen, add 170,965 square feet, and raise the facilities level of service to 0.49 square feet per capita. Despite these efforts, the Library System remains far below the nationally accepted service level of 0.60 square feet per capita. Similarly, additional increases in the holdings, information technology access, and professional and other staff levels are necessary to achieve State-recognized standards and to keep pace with growth. A Phase III of the Library Expansion Program (LEP III) will be necessary to address these concerns.

To ensure that needs are met, the Library System utilizes a planning methodology based on its mission statement, that helps align the Library System’s long range plan, performance measures, budget document, and the goal, objectives, and policies of this element. This methodology is applied on an ongoing basis and provides for public participation.
