Locomotive Engineer @ CSX | Bachelor's in Business Management

## Summary

At CSX, our focus on operational efficiency is paramount, and as a locomotive engineer, I am at the forefront of this initiative. My academic background in business management from Warner University and expertise in logistics have been instrumental in driving cost savings and improving safety standards. These skills were honed through a commitment to lean principles and a continuous improvement mindset, contributing to significant fuel savings and operational enhancements.

Collaboratively, we've achieved a reduction in fuel expenses and optimized switching operations, delivering substantial over-time savings. Embracing my role, I ensure meticulous adherence to CSX and FRA regulations, safeguarding the transit of customer products. My competencies in industry standards and vendor relations, underpinned by certifications in Lean Six Sigma and Global Logistics, undergird the value I bring to our operations and customer service.

---

## Experience

### CSX

2 years 2 months

#### Locomotive Engineer

August 2024 - Present (4 months)

Louisville Metropolitan Area

My responsibilities as an locomotive operator for CSX entails the safe and efficient operation of locomotives as well as inspection and monitoring of all locomotive systems. My chief responsibility in road freight service is adherence to CSX/FRA rules and regulations and the assurance of safe transit of customer products.

#### Accomplishments

- Improved switching operations resulting in OT savings of \$200,000

- Improved customer service via increases of crew availability & resource allocation
- Reduction in fuel expenses of \$300,000 for the crews that I lead

#### Conductor/RCO Operator

October 2022 - Present (2 years 2 months)

Louisville, Kentucky, United States

I began working for CSX in 2022- I started my career as a Trainmen and have worked my way up into a Conductor position. As a conductor, I am responsible for the cars, equipment & crew members under his/her charge. I am the 1st and last person to handle, inspect, verify, and document our consist; As the ranking crew member I am responsible for the planning, operation, and safety of all crew members under my charge. Responsible for communication and adherence to FRA regulations.

#### Accomplishments

- Reduced fuel consumption on local switching jobs- which resulted in a 27% reduction in fuel usage.
- Took part in CSX “switching school”; developed my skills & improved my proficiency. Resulting in a 25% increase in terminal efficiency.

#### Applied Maintenance Supplies & Solutions

Account Manager

October 2019 - October 2022 (3 years 1 month)

Mobile, Alabama, United States

During my time with Applied, I worked my way up from a management trainee to an account manager! The journey has come with its fair share of accomplishments and growth opportunities; My responsibilities are prospecting, solution selling, scheduling, and project management.

#### Accomplishments

- Increased revenue of current client base by 45%, resulting in an annual increase of \$100,000 in my first year. Using the 5 phases of agile project management: Envision, Speculate, Explore, Adapt & Close.
- Planned, developed, and led the creation/implementation of our service project with the “Cooper Group”- Resulting in a revenue increase of 1.2 million dollars, resulting in the largest single client accusation in the region.

#### Mcguire welding

Welding Operator

November 2017 - November 2019 (2 years 1 month)

United States

Fastenal Company  
Inside Sales Specialist  
August 2017 - November 2018 (1 year 4 months)  
Lake City, Florida

Enterprise  
Management Trainee  
January 2015 - May 2015 (5 months)  
Lake Wales, Florida, United States
