Presented to the Executive Committee  
of the Palm Beach County HIV Care Council

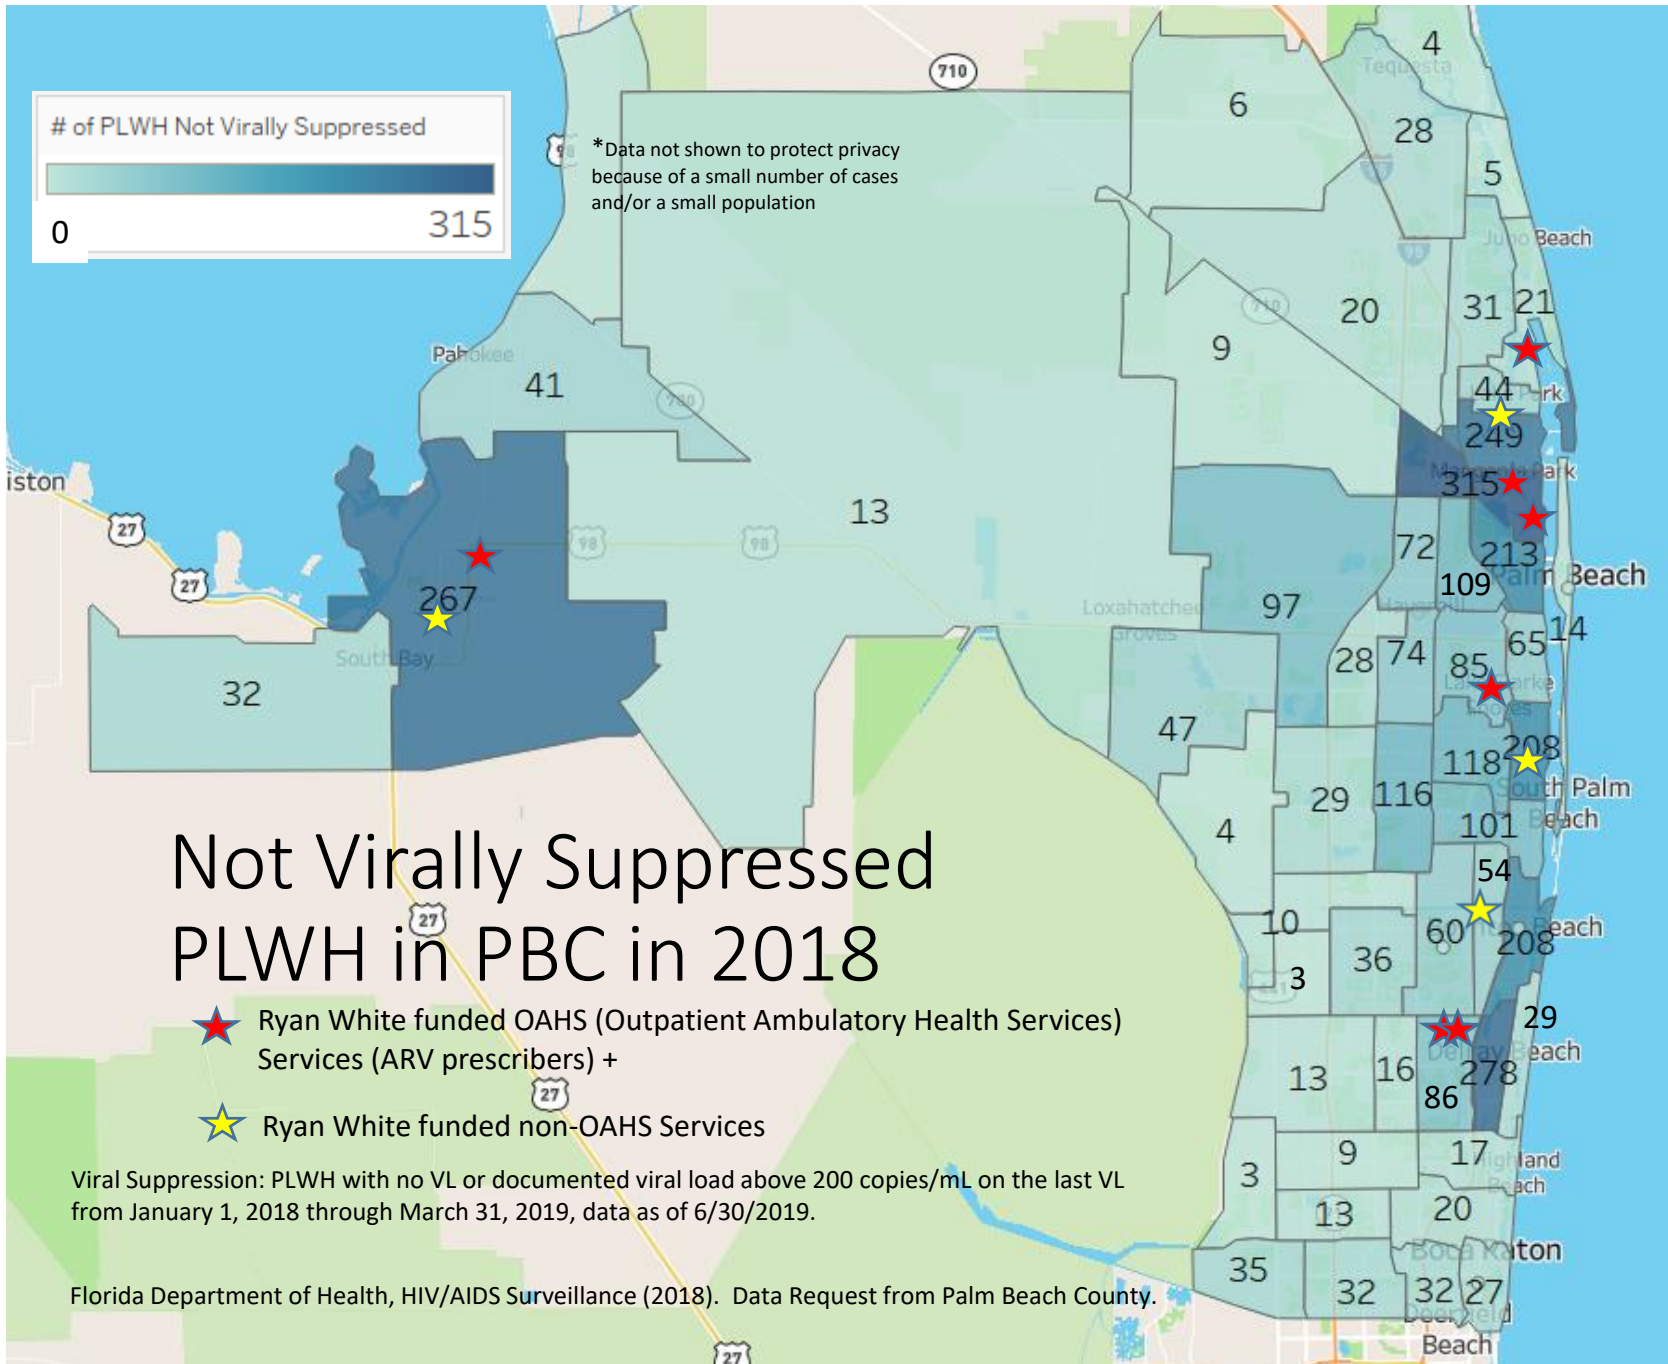

December 12, 2019

# Data Reporting Requirements to Florida HIV Surveillance

Practitioner Notification					Laboratory Notification					
Reportable Disease or Condition	Timeframe (see page 8)				Evidence of current or recent infection with etiological agents and all associated testing results performed should be reported (e.g. species, serogroup, serotype, and antimicrobial susceptibility *2 results)	Submit isolates or specimens for confirmation *1	Timeframe (see page 8)			
	<i>Suspect Immediately</i>	<i>Immediately</i>	Next Business Day	Other			<i>Suspect Immediately</i>	<i>Immediately</i>	Next Business Day	Other
Human immunodeficiency virus (HIV) infection				2 weeks	Repeatedly reactive enzyme immunoassay followed by a positive confirmatory test (e.g., Western blot, IFA). Positive result on any HIV virologic test (e.g., p24 AG, nucleic acid test [NAT/NAAT], viral culture). All viral load (detectable and undetectable) test results. *14, 15					3 days

Laboratories are required to submit test results electronically. For information about electronic laboratory reporting (ELR), please contact the Department’s ELR liaison at [ELR@flhealth.gov](mailto:ELR@flhealth.gov). Practitioners conducting in-house laboratory testing should review the laboratory reporting guidelines as well as practitioner guidelines to ensure compliance to aid in an effective and timely public health response.

# HIV Care Continuum Definitions

- Persons Living with HIV: The number of persons known to be living with an HIV diagnosis (PLWH) at the end of 2018
- Ever in Care: PLWH with at least one documented Viral Load (VL) or CD4 lab, medical visit, or prescription from HIV diagnosis through 3/31/2019
- In Care: PLWH with at least one documented VL or CD4 lab, medical visit, or prescription from 1/1/2018 through 3/31/2019
- Retained in Care: PLWH with two or more documented VL or CD4 labs, medical visits, or prescriptions at least three months apart from 1/1/2018 through 6/30/2019
- Suppressed Viral Load: PLWH with a suppressed VL (<200 copies/mL) on the last VL from 1/1/2018 through 3/31/2019

# HIV Care Continuum in Palm Beach County 2018 by Race/Ethnicity

59% of all PLWH in PBC are Black/African-American

62% of all PLWH out of care in PBC are Black/African-American

64% of all PLWH not virally suppressed in PBC are Black/African-American

## HIV Care Continuum Palm Beach County 2018 by Black/African-American and Haitian-born

32% of all black/African-American PLWH in PBC are Haitian-born

38% of all PLWH out of care black/African-American in PBC are Haitian-born

34% of all black/African-American PLWH not virally suppressed are Haitian-born
