

PALM BEACH COUNTY TRAFFIC DIVISION HISTORIC TRAFFIC GROWTH TABLE

CURRENT YEAR – 2018

(2018 counts must be used in traffic studies received by the Traffic Division on or after July 2, 2018)

This document was developed as supporting data to be used in traffic impact studies seeking to demonstrate compliance with Article 12 of the Unified Land Development Code, the Traffic Performance Standards. This table shows historical peak season daily traffic counts from 2013 to 2018 as well as a calculated growth rate for each count station. A 3-year timeframe was used to calculate the historic growth rate shown.

For the purposes of this report, the default time frame should be 2013 – 2018. Where a growth trend other than a compounded rate appears to be appropriate for a given count station, this may be proposed and will be considered for use in a traffic impact study on a case-by-case basis.

Engineering judgment should be exercised in the use of the growth rates presented, particularly in the following cases:

1. Where negative growth rates were caused by opening parallel road facilities, construction activity, or other extraordinary circumstances.
2. Where extraordinarily high growth rates resulted from new road improvements, opening of a high traffic generator (e.g. a regional mall), or a low initial count.
3. For projects with a lengthy build out period (5 years or more), an area-wide growth rate may be considered per Article 12 of the ULDC.
