	Carwash (Automated)	PBC	Lanes >4 ^g	600	50%	50/50	32	50/50	60

Footnotes

- a) From the 11th/Other edition. 12th edition has low sample size
- b) Weekend peak hour rate = 11.20 per 1,000 S.F. with a 47/53 directional split
- c) Landscape Services acreage consists of overnight vehicle and equipment storage as well as areas (covered or uncovered) for chemicals, fertilizers, landscape materials (excluding plants) and other items needed for day-to-day operations. Not included are drive aisles, customer/employee parking, structures shared by nursery and landscape services, facilities that solely serve the onsite landscape activities or any nursery growing areas.
- d) Based on Daily to PM ratio for ITE Code 937 (Coffee Donut Shop + DT)
- e) FP=Fueling Position. Use both FP and Convenience Store size in estimating trips using the provided equation. Note that no internalization between the gas pumps and convenience store, as per ULDC Article 12, should be applied to estimate the net trips.
- f) Use PM rates
- g) Lanes refer to number of stations after the wash tunnel where cars are being manually dried/cleaned/waxed etc. Rates are for 1 Tunnel. For more than 1 Tunnel, consult with the County
- h) If the strip retail plaza contains a Coffee/Donut shop, then a separate trip generation shall be calculated for the Coffee/Donut shop

Modification History
3/2/2020: Added Landscape Services, modification history, edited formatting
7/25/2022: Updated with ITE TG Manual 11th ed information
5/4/2026: Updated with ITE TG Manual 12th ed information. New PBC rates for Carwash
