June 12, 2020

TO: Prospective Bidders

FROM: Deborah Drum, Department Director

SUBJECT: Advance Notice of Palm Beach County, Florida
North County Comprehensive Shore Protection Project,
2020/2021 Nourishment of Jupiter/Carlin and Juno Beach Segments

The Palm Beach County Board of County Commissioners is currently planning to construct its next beach nourishment of the North County Comprehensive Shore Protection Project (NCCSPP). The project, located in northern Palm Beach County immediately south of Jupiter Inlet will place approximately 1.4 million cubic yards of sand along about 18,300 feet of shoreline. Sand placement will occur along two shoreline segments: (1) the Jupiter/Carlin shoreline (R13 to R19, about 5,500 feet); and (2) the Juno Beach shoreline (R26 to R38, about 12,800 feet). The approximate location and extent of these shoreline segments are depicted on the attached Figure.

Beach quality sand for the project will be obtained from an offshore borrow area located about 1.5 miles northeast of Jupiter Inlet. The approximate location of the offshore borrow area relative to the project segments is shown on the attached Figure. It is anticipated that the project will be constructed by hopper dredge.

The County expects to advertise this project for bid in late-July or early August 2020 and execute an agreement with the selected dredging contractor no later than October 2020. Construction is permitted to begin as early as November 1, 2020 and must be completed prior to May 1, 2021.

If you have any questions regarding this Advance Notice, please contact Coastal Resources Program Supervisor Andy Studt at 561-233-2539 (AStudt@pbcgov.org).
