5. Service power steering.
6. Change front tires.
7. Mount two tires.
8. Battery fail load test so I remove old battery, replaced with new battery, cleaned battery box and terminals.
9. Found battery box would not open, had to remove latches to open and clean slides, replace latches and handle ass. and cleaned slides and lube, slides worked good.
10. started to make back slides draw work need new latches and clean slides, replaced latch and clean and lub slides.
11. put LED tire pressure low flasher, put extension on inside tire on rear and hose on outside tire on rear so fireman can see LED flasher.
12. started remove trans. cooler and lines. Finish cooler and lines. Finish trans. cooler and lines.
13. R&R bolts, and had to remove fan to put the smallest belt on.
14. R&R warning light on left rear side, because 30% of the light was out. Took light off and found no plug, so I cut wires and put a plug on.
15. repaired wire in center console and put in lum to protect wire.
16. Top off coolant and ATF after changing cooler and lines.
17. Remove inlet relief valve. Found bad stem in valve rebuild valve, found treads bad in hose holding SV sensing valve so i had to put a keen sert thread repair, replaced 3 fittings and installed both valves.
18. tighten up passenger side and air pack bracket.
19. started vacuum test after repairing inlet relief valve found hose reel valve leak R&R hose reel and tested, found deck gun valve leak R&R deck gun and tested. Found recirculator valve leaking R&R recirculator valve.
20. Did vacuum test could not get more than 17" of vacuum so got other gauge and found gauge bad. Then it would go to 24" vacuum but would not hold found both primer valve leaking R&r both rimer valves did vacuum test and it went to 24" and did not hold.
21. R&R tank to pump valve and rebuild put back on and vacuum test still fail so I grease all halp valve found two grease zerks leaking replaced zerks and pass vacuum test.
22. Check nozzle holders on step and two would not work R&R two nozzle holders.
