## 10125552

### MAKO BREATHING AIR COMPRESSOR

1. Road test + "C" inspection. service generator engine. Service air compressor engine.
2. Remove starter from on board Diesel generator.
3. Remove battery cables start testing of batteries as per "low voltage " Elec system performance test.
4. Bad battery fail load test- remove + reinstall (2) new batteries.
5. Compressor engine coolant.
6. Low voltage performance test.
7. Water filter housing (coolant) leaking-remove clean surface. Install new gasket + secure (T) to specs 18 ft. lbs. torque. coolant service.
8. Air dryer service.
9. Laptop had problem reading ECU. spent time (W) E. Erke/E. Orlando fixing problem. laptop working now.
10. Rear brake, rotor pad disassemble for replacement. Inspect, clean, +install new parts. Reassemble brake+adjust brake travel.
11. Front + rear sensor ABS fault-Diagnose fault, clean, inspect, check cabeling ohmes as per manual+adjust air gap.
12. Install starter in generator + test run-(OK).
13. Front wheel hub + tire only-clean wheel\_hub assembly.
14. Swap into on call truck, fuel + check stock.
15. Generator exhaust + air comporessor exhaust piping-cut ,disassemble.
16. Mud flap missing-cut=install new mud flap.
17. L-rear reflector missing. clean area = install new reflector.
18. Wind Shield wiper blades-install new wiper blades.
19. Dome light out-found blown bulb+corroded ground. clean ground connection+replace bulb.
20. Clean work areaa. Oil+dirt on floor. Check+start unit in yard for weekend on call.
21. L-2+L-3 light out-replace one bulb+found one wire chafed, spliced wire+reconnect.
22. Power steering system service.
23. Battery charge indicator inop-diagnose found ground connection corroded+green indicator bulb blown. Replaeced indicator assembly+clean ground connection
24. Bumper breakaway nut missing+bent -remove damaged bolts+install new ones.
25. Cables+wires hanging along frame rail-secure all wires+cables along frame rail.
26. Cutting+fiting exaust system piping.
27. Fabricate complete new exhaust system for Ger set.
28. Wrong caliper issued in manufactures box-remove caliper+reinstall correct one, also readjust slack adjuster
29. R&R A/C+engine belts.
30. Fast adapt transmission+road test.
31. Fast adapt transmission+road test.

### MAKO BREATHING AIR COMPRESSOR

1. C-Inspection. 2. C-Inspection. 3. Service generator. 4. Service Compressor. 5. Repair RRI Tire leak and LRI tire leak. Air all tires to manufactures specs, tighten valve stem nuts, replaced valve ext for LRI tire. File down stem to correct size. 6. Replace wiper blades. 7. Rebuild d ryer.

8. Replaced compressor discharge hose. Hose too short. Cut all tire straps, repositioned fitting at dryer, R&R clamps. Connect hose, protect hose and tie strap back up. 9. Diagnose problem with a uto - eject. Found corrosion in auto eject. 10. Install new auto eject. Drill out frozen bolt. Cut out and clean body of silicone. Splice wires. Replaced broken cover. Test operation of auto eject (ok)

11. Replaced L Frt door weather strip. 12. Replaced R frt door weather strip.

13. Replaced roof clearance bulb. 14. Replaced LF door trim. R&R panel.

15. Replaced RF door trim. R&R panel. 16. Diagnose problem with light tower strobe in/op remove cover for wiring. Replaced bad wiring splice and heat shrink connections. Order parts. 17. Remove tower light frame and broken len pieces. Order new frame and lens. 18. Diagnose problem with tower going into stowed position. Found sensor out of position. Re-position sensor. All fasteners on cover frozen. Cut off fasteners to remove cover.

19. Diagnose problem with tower not retracting. Found vehicle air must be close to 100% in order for solenoids to dump air.

20. R-2 compt light in/op. Remove light fixture no wire connector on light. Fish wire connector out of inner panel. Test light ok. Wiring not correct. Hot on ground lead. Check wires at relay not problem. Somewhere in harness.

21. Replaced bulb L Frt marker. 22. Replaced cracked marker lens and bulb (LR).

23. Tighten tool brackets. 24. Straighten out bent diamond plate rear compt.

25. Remove rear air brake hose (checking). Found checking not hose but paint. Re-install hose. No hose in parts. 26. Reposition brake hoses rubbing on diff.

27. Remove front switch panel and removed switch for rear lights. LED out. No switch in parts dept. Install switch back in panel and install panel.

28. Diagnose camera in/op. Remove camera cable and trace to center consol. Remove consol cover. Checked power and ground. Trace blue wire to electrical panel. Trigger for reverse/500 tryed camera II imput no good. call tech support. Monitor internal relay bad. Disconnect trigger. Reinstall panel and consol cover. Switch camera for reg view and not mirror view at camera.

29. Piercer not rotating. Remove piercer - found piece

**Workorder: V71160**

**In Date:** 11/24/2014

**Meter Reading:**

**Close Date:** 12/15/2014

**Problem?**

Starter on air compressor does not engage all the time. It clicks clicks and then it will engage.

**Task performed:**

1. Battery failed load test-replace batteries. Note: these batteries are under cab body and have no slide out battery tray-very difficult to get to cables-after battery removal, clean all cable and wire ends as they looked like they were never done(REFER TO w/o 71359 FOR CHARGED OUT PARTS)
2. Alternator output would not hold load from AC and emergency lighting-replace alternator(REFER TO w/o 71359 FOR CHARGED OUT PARTS)
3. Belt tensioner making noise and was light on tension-replace belt tensioner
4. Battery compartment door latches broken-no latches available-found two old latches around shop disassemble and make two useable latches-install in door and adjust to fit..
5. Check out problem with starter-trace wiring back from starter to ignition switch-pull down control panel to gain access to ignition switch wiring-found problem at connection of compound switch-repair also tightened switch in panel

**Problem?**

initial shift from N to D is hard, check for harding shifting while driving

**Task performed:**

1. Road test and perform a fast adapt program with Steve.R our shop foreman on passenger side with computer while i drove-now shifts ok but noticed a slight vibration/shutter when under acceleration.
2. Both center support bearings worn out-disconnect and remove all three section of drive shaft-pull apart center bearings from shafts and press on new ones-reassemble drive shaft and reinstall in vehicle-also check U-joints while apart-all seems ok.
3. Check engine light on-on dash and engine has codes-replace both cam sensors in back side of engine front cover between cover and air compressor.
4. Brake assemblies-check out all componets-make parts list and give to parts dept. wash up all reusable parts and componets-start reassembly with new part available-knock out all studs from left side to install new rotor-press back in studs-assemble hub caliper etc on left side only-finish brake job on right side.
