Re: Justification to utilize Avail Technologies, Inc. as a Sole Source Supplier for Parts, Components, and Services for PalmTran

To Whom It May Concern,

Per your request for information concerning acquisition of piece components, parts, entire system kits, software, or services from Avail for the Palm Tran Automatic Vehicle Locating System and Automatic Passenger Counting Devices.

Avail provides Intelligent Transportation System (ITS) solutions exclusively to Public Transit Properties which are engineered to meet each customer's specific needs and requirements. The solution provided by Avail to Palm Tran was engineered to conform to Palm Tran's specific requirements as outlined in their RFP # 08.015/DL. The delivered AVL System is comprised of hardware and software components engineered to our exact specifications and integrated and tested by Avail to assure optimum performance and the highest level of reliability. The reliable operation and maintainability of the entire system is dependent on the interoperability of each component of the system and therefore it is important that only Avail provided parts, components, and software are used in the AVL System to ensure that the system continues to perform at the required level of reliability and accuracy.

Due to the nature of our system as deployed at Palm Tran, Avail is considered to be the sole source developer, manufacturer and supplier of this software, hardware, equipment and their related components, parts and services. It is to be noted that these prices represent "Most Favored Customer Prices" and Avail warrants that the prices charged to Palm Tran will be equal to or less than prices charged to other customers for similar parts or components. This pricing remains valid until October 31, 2027.
