   V 5  Correcting Deficiencies
V 1. Training During Non-Emergency Times

V 1. Identify how key workers will be trained in their emergency roles during non-emergency times

- Review of this CEMP is an ongoing, year-round task
- Emphasis on hurricane preparedness is regularly discussed from the beginning of Hurricane season in June

Training is about teaching the staff about the plan

- In-services, staff training, or meetings are examples of training
V 2. Employee Training Schedules

V 2. Identify a training schedule for all employees and identify the provider of the training

- Schedules should provide dates, or months, or a pattern of regular occurrence (i.e. monthly, quarterly, annually)
- Training and exercise schedules may be combined
V 3. New Employee Trainings

V 3. Identify the provisions for training new employees regarding their disaster relate role(s)

- All key staff and resident care staff are required to read and understand the CEMP
- Orientation and job specific training of all new employees includes disaster training
- Key employees and all resident care staff are educated about the Fire Alarm System, notification and evacuation
- Questions and concerns are directed to the Administrator or Executive Director
V 4. Annual Basis Schedule

V 4. Identify a schedule for exercising all or portions of the disaster plan on an annual basis (Hurricanes, Fires and all other hazards)

- Monthly fire drills serve as an exercise that cover partial or full evacuation
- Fire drills, elopement drills, table tops, etc. are examples of exercises
- Exercises test the ability of the staff to execute the plan as envisioned by you

Drills are an exercise, not a training
V 5. Correcting Deficiencies

V 5. Establish procedures for correcting deficiencies noted during training exercises

• How are your exercise results and feedback implemented into the plan?
• How are new trainings implemented to correct staff misunderstandings of your vision of the plan?

This is about the plan, not the staff performance
