## RE: GoldCoast Logistics FLUA FLUA Amendment Policy 3.5-d Review Round 2022-24-A

Dear Ms. Lercari:

Palm Beach County Traffic Division has reviewed the Land Use Plan Amendment Application Traffic Analysis for the proposed Future Land Use Amendment for the above-referenced project, revised July 2023, pursuant to Policy 3.5-d of the Land Use Element of the Palm Beach County Comprehensive Plan. The project is summarized as follows:

| Location:              | NW corner of the intersection of Sta                                       | ate Road 7 and La Reina Road                                                 |  |  |  |  |  |  |  |  |
|------------------------|----------------------------------------------------------------------------|------------------------------------------------------------------------------|--|--|--|--|--|--|--|--|

| Density/<br>Intensity: | 0.15 FAR 0.45 FAR                                                          |                                                                              |  |  |  |  |  |  |  |  |
| Maximum<br>Potential:  | Nursery (Garden Center) = 5<br>acres<br>Nursery (Wholesale) = 1.33 acres   | General Light Industrial = 96,508<br>SF<br>(Using max FAR = 0.35)            |  |  |  |  |  |  |  |  |
| Proposed<br>Potential: | None                                                                       | Warehouse = 67,550 SF<br>General Office = 28,952 SF                          |  |  |  |  |  |  |  |  |
| Net Daily<br>Trips:    | -144 (maximum – current)<br>-180 (proposed – current)                      |                                                                              |  |  |  |  |  |  |  |  |
| Net PH<br>Trips:       | 64 (59/5) AM, 57 (6/51) PM (maxin<br>50 (44/6) AM, 49 (8/41) PM (prope     |                                                                              |  |  |  |  |  |  |  |  |
|                        | indicates typical FAR and maximum uses and intensities/densities anticipat | 10                                                                           |  |  |  |  |  |  |  |  |

Based on the review, the Traffic Division has concluded that the proposed amendment will have a negligible impact on traffic. The Long Range analysis

Natalia T. Lercari, P.E. July 10, 2023 Page 2

suggests reduced impact, while Test 2 analysis shows insignificance on the roadway network. These findings <u>meet</u> Policy 3.5-d of the Palm Beach County Comprehensive Plan's Future Land Use Element at the **maximum potential density** shown above.

Please do not hesitate to reach out with any questions or concerns at 561-684-4030 or DSimeus@pbcgov.org.

Sincerely,

AC

## **APPENDICES**

APPENDIX A Palm Beach County Data

## Introduction

McMahon, a Bowman company, (McMahon) has completed a traffic analysis associated with the Future Land Use Atlas (FLUA) amendment application for a site located at the northwest corner of US-441 and La Reina Road, in Palm Beach County, Florida. The study parcel, which includes a total of 6.33 acres, is located within Parcel Control Numbers (PCN) 00-42-43-27-05-067-0283 and 00-42-43-27-05-067-0281. The site location is graphically depicted on **Figure 1**.

The current future land use designation for the parcels is Agricultural Reserve (AGR). The proposed future land use designation for the parcels is Industrial Commerce (CMR), with a maximum FAR of 0.35.

The traffic analysis evaluated the potential traffic impact of the proposed land use amendment on the surrounding roadway in accordance with Palm Beach County's *2022 Future Land Use Atlas Amendment Instructions*.

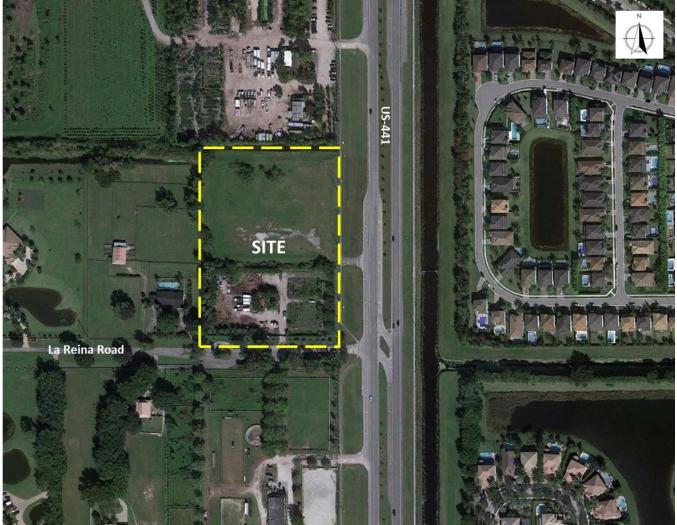

Figure 1 Site Location

## **Trip Generation Analysis**

#### **Current Future Land Use Designation (Maximum Development Potential)**

The current future land use designation for the parcel is AGR. The subject parcel is 6.33 acres. Based on coordination with Palm Beach County, five (5) acres was designated as Nursery (Garden Center) and 1.33 acres was designated as Nursery (Wholesale). Using information obtained from Palm Beach County, dated July 25, 2022, trip generation analysis was performed for the maximum development potential under the current future land use designation. Land Use 817, Nursery (Garden Center), and 818, Nursery (Wholesale), were used for analysis purposes. Results of the trip generation analysis, summarized in **Table 1** and **Table 2**, indicate that the maximum development under the current future land use designation generates 567 daily trips, 14 AM peak hour trips, and 40 PM peak hour trips.

#### **Proposed Future Land Use Designation (Maximum Development Potential)**

The proposed future land use designation for the parcel is CMR, which has a maximum FAR of 0.35. Given that the subject parcel is 6.33 acres, the maximum intensity under the proposed future land use designation is 2.2155 acres, or 96,508 square feet. Trip generation analysis was performed for the maximum development potential under the proposed future land use designation. Land Use 110 General Light Industrial was used for analysis purposes. Results of the trip generation analysis, summarized in Table 1, indicate that the maximum development under the proposed future land use designation using General Light Industrial generates 423 daily trips, 64 AM peak hour trips, and 57 PM peak hour trips.

#### **Proposed Future Land Use Designation (Proposed Development Potential)**

The proposed development for the study parcels includes 67,550 square feet of warehouse and 28,952 square feet of office. Land Use 150 Warehouse and Land Use 710 General Office were used for analysis purposes. Results of the trip generation analysis, summarized in Table 2, indicate that the proposed development under the proposed future land use designation generates 387 daily trips, 50 AM peak hour trips, and 49 PM peak hour trips.

#### **Current versus Maximum**

Based on the trip generation analysis summarized in Table 1, the net difference in trips between the maximum development potential under the current future land use designation and the maximum development potential under the proposed future land use designation is a decrease of 144 daily trips, an increase of 50 AM peak hour trips, and an increase of 17 PM peak hour trips.

#### **Current versus Proposed**

Based on the trip generation analysis summarized in Table 2, the net difference in trips between the maximum development potential under the current future land use designation and the proposed development potential under the proposed future land use designation is a decrease of 180 daily trips, an increase of 36 AM peak hour trips, and an increase of nine (9) PM peak hour trips.

## **Radius of Influence**

#### Five Year Analysis – Year 2028

The project will have a radius of influence of a half (0.5) mile, based on the Traffic Performance Standards (TPS) requirements as defined in Article 12 of the Unified Land Development Code. **Figure 2** identifies the major thoroughfare roadways within the radius of influence for the five year analysis.

#### Long Range Analysis – Year 2045

The project will have no significant impact based on Table 3.5-1, Significant Impact, of the Palm Beach County Comprehensive Plan Future Land Use Element.

## **Project Access and Distribution**

The proposed site will be served by one (1) full access driveway connection to La Reina Road and one (1) right-in, right-out driveway connection to US-441. La Reina Road connects to US-441 via a left-in, right-in, right-out connection.

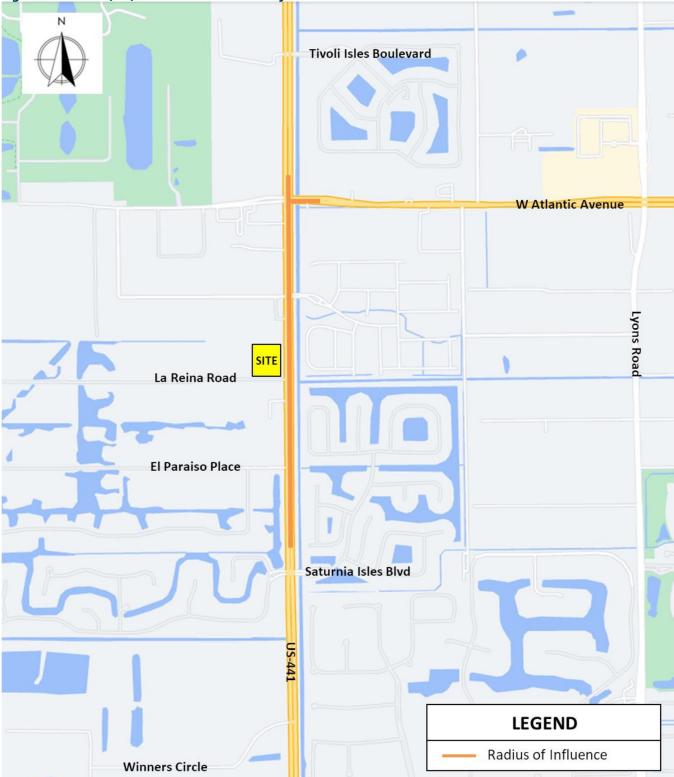

The distribution of project traffic was based on a review of the existing roadway characteristics, existing land uses, connectivity of the surrounding roadway network, and location of major roadways. Driveway distributions were determined based on a review of available access to and from the site.

The trip distribution percentages were applied to the net new peak hour trip generation to determine the project assignment on each of the roadway links within the project radius of influence. **Figure 3** graphically depicts the traffic distribution onto the surrounding roadway network within a half (0.5) mile of the site and the distribution at the proposed driveway connections.

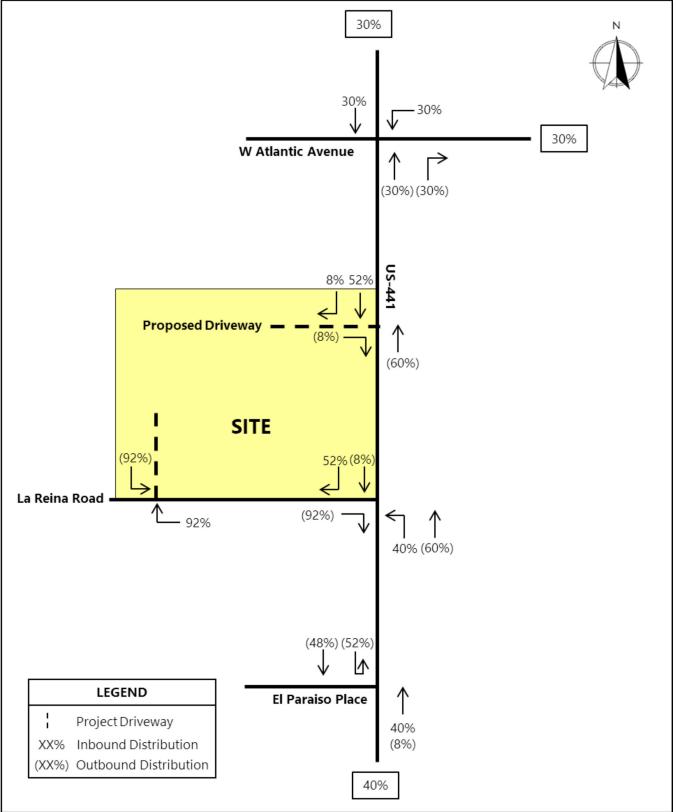

Figure 2 Radius of Influence – Five Year Analysis

### Figure 3 Project Distribution

## Five Year Analysis – Year 2028

Test Two considers the five year analysis for peak hour conditions. Significance was determined for all major roadways within the project radius of influence. For those roadways determined to be significant, link capacity analysis was performed in accordance with Article 12.

#### Significance Analysis

The LOS standard for Test Two is level of service (LOS) E. For links where the project traffic will be five (5) percent or more of the LOS E roadway link capacity threshold for I-95 and three (3) percent or more of the LOS E roadway link capacity threshold for all other roadways, the project will be considered significant on that link. **Table 3** and **Table 4** summarize the significance analysis for AM and PM peak hour conditions, respectively. Results of the analysis indicate that the project trips will not be significant on any of the roadway during AM and PM peak hour conditions. Therefore, link capacity analysis of Test 2 was not required. The link capacity threshold information obtained from Palm Beach County is included in **Appendix A**.

(1) Facility Type based on FDOT 5-year work program

## Long Range Analysis – Year 2045

The project will have no significant impact based on the trip generation; therefore, no long range analysis is required.

## Conclusion

McMahon has completed a traffic analysis in connection with the Olympus FLUA for a site located at the northwest corner of US-441 and La Reina Road, in Palm Beach County, Florida. The subject parcel includes a total of 6.33 acres. The current future land use designation for the parcel is AGR. The proposed future land use designation for the parcels is CMR, with a maximum FAR of 0.35.

Results of the analysis indicate that the project meets the requirements for the FLUA amendment for the five year (2028) and the long range (2045) traffic conditions.
