RE: Soma SR-7
FLUA Amendment Policy 3.5-d Review
Round 2022-23-A

Dear Ms. Mulcahy:

Palm Beach County Traffic Division has reviewed the Land Use Plan Amendment Application Transportation Analysis for the proposed Future Land Use Amendment for the above-referenced project, revised on April 28, 2022, pursuant to Policy 3.5-d of the Land Use Element of the Palm Beach County Comprehensive Plan. The project is summarized as follows:

Location:	West side of State Road 7, approximately ¼ mile north of Lantana Road	
PCN:	00-42-43-27-05-035-0252	
Acres:	1.66 Acres	
	Current FLU	Proposed FLU
FLU:	Residential Low (LR-1)	Commercial Low (CL)/ Residential Low (LR-1)
Zoning:	Agricultural Residential (AR)	Commercial Low Office (CL-O)
Density/ Intensity:	1 Unit per Acre	0.50 FAR
Maximum Potential:	Residential Single Family = 2 DUs	Medical Office = 36,155 SF
Proposed Potential:	None	None
Net Daily Trips:	1,112 (maximum – current)	
Net PH Trips:	91 (69/22) AM, 112 (31/81) PM (maximum)	
<i>* Maximum indicates typical FAR and maximum trip generator. Proposed indicates the specific uses and intensities/densities anticipated in the zoning application.</i>		

Based on the review, the Traffic Division has determined that the traffic impacts of the proposed amendment meet Policy 3.5-d of the Future Land Use Element

SOMA SR 7
FUTURE LAND USE AMENDMENT
TRANSPORTATION ANALYSIS

INTRODUCTION

It is proposed to change the Future Land Use designation for a 1.66-acre property from Residential Low (LR-1) to Commercial Low Office (CL-O). The site is located on the west side of SR 7, approximately 1/4 mile north of Lantana Road, as shown on **Exhibit 1**. The purpose of this analysis is to determine if the proposed land use designation is consistent with the Transportation Element of the Comprehensive Plan. This study addresses a five-year traffic analysis and a long-range (Year 2045) traffic analysis.

SITE DATA

The PCN for the site is 00-42-43-27-05-035-0252. The site is currently vacant. The existing Future Land Use (FLU) designation of LR-1 is proposed to be changed to CL-O to allow medical office uses. The Comprehensive Plan assigns a maximum intensity to the FLU designation. The maximum intensity scenarios for the existing and proposed FLU are shown below:

<u>Existing FLU Designation</u>	<u>Proposed FLU Designation</u>
LR-1 (Maximum 1 DU/Acre)	CL-O (Maximum 0.5 FAR)
2 Single Family Dwelling Units	36,155 SF Medical Office

TRANSPORTATION ELEMENT

Level of Service (LOS) Analysis

In order to assess the transportation impacts of the proposed change in land use designation, the methodology established by Policy 3.5-d of the Land Use Element of the Palm Beach County Comprehensive Plan was followed.

Trip Generation

Palm Beach County and the Institute of Transportation Engineers (ITE), Trip Generation, 10th Edition, were the sources of trip generation data utilized in this study. Daily and peak hour trips

generated by the existing FLU designation at the maximum intensity are shown on **Exhibit 2A**. The daily and peak hour trips generated by the proposed FLU designation at the maximum intensity are shown on **Exhibit 2B**. The comparison of existing and proposed FLU designations is shown on **Exhibit 2C**. The net daily trip generation is used for the Long-Range (Year 2045) analysis. Based on the net daily trip generation of 1,112, the radius of development influence is one mile for the Long-Range analysis. The peak hour trips are used for the Five-Year Analysis. Based on the new PM peak hour trip generation of 112 trips, the radius of development influence is two miles for the Five-Year analysis.

Trip Distribution and Assignment

In order to determine the impact of the development's traffic on the surrounding roadway network, a directional distribution of project trips was developed, based on the area's land uses and roadway network. **Exhibit 3** provides the distribution for the site's net new trips.

Roadway Improvements

A review was undertaken of the FDOT Transportation Improvement Program and the Palm Beach County Five Year Road Program to determine if any roadways within the study area are scheduled to be improved. There are no scheduled capacity improvements within the next five years.

Five-Year Analysis

The Five-Year Analysis examines traffic conditions at the end of the fifth year of the FDOT Five Year Transportation Improvement Program. This analysis is required for any roadway link within the radius of development influence where the project impact is greater than 3% of LOS E and outside the radius where the project impact is greater than 5% of LOS E. The highest AM and PM peak hour trips were assigned to the roadway network based on **Exhibit 3**. As shown on **Exhibits 4A and 4B**, no roadway links are significantly impacted by the proposed FLU designation. Therefore, the proposed FLU meets the Five-Year requirements.

Long-Range (Year 2045) Analysis

Exhibit 5 provides the net daily trip assignment of the proposed FLU at maximum intensity for the roadway links within the radius of development influence. It also provides volume to

capacity (v/c) ratios and project impact percentages. A roadway is considered significantly impacted for the long range analysis if project impacts are greater than 1% to 3% of LOS D, depending on the v/c ratio. Year 2045 net project traffic is total external traffic generated by the proposed FLU designation at maximum intensity, less traffic generated by the existing FLU designation at maximum intensity. For the Year 2045 analysis, roadway lanes and traffic volumes were obtained from the Palm Beach Transportation Planning Agency (TPA). This information is provided in the **Appendix**. There are no significantly impacted roadway links. Therefore, this project meets the Long-Range (Year 2045) Analysis requirements for the proposed land use designation at the maximum intensity.

CONCLUSIONS

This analysis shows that the proposed Future Land Use designation of CL-O for the 1.66-acre site meets the transportation standards and is consistent with the Comprehensive Plan.
