

# Western Northlake Corridor Land Use Study

In 1998, the Palm Beach County Board of County Commissioners adopted a resolution acknowledging the Western Northlake Corridor Land Use Study (WNCLUS) as a policy and growth management guide and an expression of the desires of the community in the review of development proposals and Comprehensive Plan amendments. An update to the Study was subsequently undertaken beginning in 2008 and concluded in 2010. See the following link for the Study, related documents, and the update:
