#### WHITE PAPER

#### YARD WASTE SUMMARY OF AMENDMENTS

#### WHITE PAPER Executive Summary

#### I. INTRODUCTION

The purpose of this white paper is to provide a summary of proposed amendments to the Unified Land Development Code (ULDC) to define yard waste and permit limited storage of yard waste when associated with a landscape service. It would allow temporary on-site storage of yard waste that resulted from material generated by the business owner.

#### II. BACKGROUND

This amendment was initiated to codify common practices that were approved by previous Zoning Directors. It allowed a principal or accessory landscape service use to temporarily store yard waste on sites generated by the maintenance service provided to the landscape service customers only. It includes uses where the landscape service is accessory such as wholesale nursery and retail nursery. In the past, it was determined that the storage of vegetative waste is incidental when less than 10 percent of the total site area of the principal use.

Due to the characteristics in size and the process of the yard waste as an incidental activity to landscape service, it is not considered a solid waste transfer station, therefore new regulations are needed.

The Zoning Division scheduled this issue to be codified in the ULDC 2010-02 round of amendments followed by the creation of a subcommittee that included representatives from the Solid Waste Authority (SWA), Health Department, Zoning Division, Land Development Regulation Advisory Board (LDRAB) members, and industry (wholesale nurseries and chipping and mulching). The subcommittee had a series of meetings on September 13, September 27 and October 18, 2010 to discuss the topic that included comments and recommendations such as:

- For the SWA yard waste collection is a service needed by the community if provided in convenient locations; reduces the number of trips for SWA vehicles; extends the life of the SWA facilities; and, discourages illegal dumping.
- Currently, there are nine SWA permitted facilities in the county that accepts yard waste, most of them approved by the zoning division as chipping and mulching or recycling facilities. The SWA has not issued permits for any site with a yard waste of this nature because there is no zoning category that corresponds to small scale yard waste.
- > The subcommittee recommendations included:
  - 1. Introduce definition for yard waste and yard waste transfer station;
  - 2. Provide site criteria for yard waste related to:
  - a. Location;
    - b. Accessibility from arterial or collector streets;
    - c. Lot size;
    - d. Traffic issues;
    - e. Setbacks of the yard waste storage area;
    - f. Size of trucks picking up and dropping off waste;
    - g. Volume of trash on site (method of measurement and control of timely removal);
    - h. Nuisance/noise in the residential area and surroundings;
    - i. Percentage of the site's area to be used for yard waste if it is an accessory use;
    - j. Hours of operation;
    - k. Buffering; and,
    - I. Screening.
  - 3. Allow yard waste accessory to wholesale nursery, retail nursery and landscape service.

The amendments include some of the subcommittee recommendations related to the siting criteria. However, at this time yard waste will only be allowed to a Landscape Service. The Zoning Director recommendation is to approach these amendments in two phases:

- Phase I 2010-02 Round: BCC adopts proposed amendment which is limited to specific uses and standards for the yard waste storage, and.
- Phase II 2011-01 Round: Get BCC direction if they want to expand the provisions similar to what the Subcommittee recommended.

#### III. AMENDMENT SUMMARY

The proposed amendments include the following:

Introduction of yard waste definition as vegetative matter resulting from landscaping maintenance that excludes land clearing.

3 4

#### WHITE PAPER

#### YARD WASTE SUMMARY OF AMENDMENTS

- Location criteria and siting regulations such as setback, storage area dimensions, screening requirements, and yard waste height limitation, to allow landscape service to receive yard waste only from customary clients.
- > Allowance for yard waste storage is limited to landscape service, including when permitted as an accessory use to a wholesale or retail nursery.
- > Limitation of yard waste storage to only vegetative matter generated by the landscape service.
- Clarification that landscape service as home occupation cannot be requested if yard waste is going to be included.

- Part 1. ULDC Art. 6.A.1.D.2, Location of Required Parking, (pages 12 and 13 of 38), is hereby amended as follows:
- 4 CHAPTER A PARKING

5 Section 1 General

D. Off-Street Parking

2. Location of Required Parking

All required off-street parking, shall be provided on the same lot as the principal use, except fee simple developments with common parking lots and as provided in Article 6.A.1.D.10, Shared Parking and Article 6.A.1.D.12, Grass Parking. The location of required off-street parking spaces shall not interfere with normal traffic flow or with the operation of queuing and backup areas. Loading areas shall not obstruct pedestrian pathways.

- e. Parking within Drainage District R-O-W or Easements
  - 1) Any parking spaces required by this Code shall be prohibited within any R-O-W, easement or other encroachment controlled by drainage districts.
  - 2) Additional parking in excess of the minimum required may be located in these areas with an agreement with the applicable district and subject to approval by the Zoning <u>Director</u>

#### ARTICLE 12 – TRAFFIC PERFORMANCE STANDARDS SUMMARY OF AMENDMENTS

- 2 Part 1. ULDC Art. 12.H, Constrained Facilities, (page 32 and 34 of 63), is hereby amended as follows:
- 4 CHAPTER H CONSTRAINED FACILITIES
- 5 Section 2 Procedure

 B. Applications

Applications for a reduced LOS on a Constrained Facility shall be made to the BCC through the Planning Director for initial review by the Land Use Advisory Board (LUAB) Planning Commission (PLC), containing such information relating to the criteria of this Section as the LUAB PLC requires. The application shall be forwarded to all affected Local Governments, the County Engineer, the FDOT, District IV, in the case of State Highways, and the MPO. The MPO shall review the proposal for technical traffic engineering purposes and consistency with its adopted plan. The advice of the MPO shall be considered by the LUAB PLC and the BCC when considering an application for a reduced LOS. The application shall propose the reduced LOS sought for Test 1 and Test 2. It need not be an entire range. The level of data and study needed for existing and Future Land Use to review an application for a CRALLS designation shall be determined in the pre-application conference. The decision shall be made by the County Engineer based upon the Major Thoroughfare Links and Major Intersections involved, (whether they are or will be collectors, minor arterials, or principal arterials), the extent of the proposed lowering of the LOS, the size of the area affected, the extent to which the affected area is built out to its ultimate FLU, and the amount and quality of existing data and planning.

23 ....

#### 24 Section 3 Determination Criteria

In determining whether a Constrained Facility shall have a reduced LOS and, if so, what that LOS should be, and any conditions that shall be imposed, the applicant, the MPO, <u>LUAB PLC</u>, and the BCC shall consider the following public policy criteria:

28 ....

#### 29 Section 5 Application to Modify or Eliminate Adopted Link or Intersection

#### D. Procedure/Extraordinary Vote

- .
- 2. If it is clear that no impediment to: (1) achieving the adopted LOS; or (2) Local Governments' allowing Development consistent with the FLUE of their plans would result, the BCC may, by a majority vote of its members narrow the adopted width, modify the proposed geometrics of a Link, or Major Intersection, or reduce the number of lanes in the Plan without LUAB PLC review. Nothing herein shall require CRALLS review, application to the LUAB PLC, or notice to any Local Government for minor modifications to the proposed Major Thoroughfare system which do not reduce capacity of the Link, Major Intersection, or Major Thoroughfare System. Nothing herein shall require LUAB PLC review for waivers of expanded intersection requirements or R-O-W protection pursuant to Policy 2-d of the Transportation Element of the Plan.

#### 7 CHAPTER A SEA TURTLE PROTECTION AND SAND PRESERVATION

#### 8 Section 8 Sea Turtle Protection Lighting Plan

- A. STLP approval is required for all new building construction and new artificial lighting proposed within the limits described in Section 6.D. A STLP shall <u>must</u> be approved by ERM prior to the issuance of a building permit by the PZB or the local building department. [Ord. 2009-040]
- F. STLP approval shall not be issued or processed until the application fee and any and all information necessary to fully understand the extent, nature, and potential impacts of a proposed lighting plan are received by ERM.
- H. Upon receipt of an application and appropriate application fee, ERM shall have 30 days to request any additional information. Within 30 days of receipt of such additional information, ERM may request only that information needed to clarify such additional information or to answer new questions raised by, or directly related to, such additional information. No time clocks of this Section shall begin until the appropriate application fee is received.
- L. Any application containing false information may be <u>denied</u>, <u>rejected</u> and any STLP approval granted based upon false information may be revoked.

- 32 Section 9 Criteria for STLP Approval
  - A. STLP approval may be issued pursuant to this Chapter provided that the applicant provides to ERM reasonable assurance that there shall be no adverse impacts to sea turtles, sea turtle nesting, and sea turtle habitat, and that the following criteria will be met:
    - Any and all light fixtures shall be designed to be the minimum level necessary for safety and will shall be positioned such that they do not cause direct or indirect illumination that is visible from the beach. [Ord. 2009-040]
    - **C.** All lighting installed after September 2, 1987 in unincorporated PBC and in municipalities that do not have a STPO in effect shall comply with the following standards:
      - 1. Artificial public or private light source shall not cause illumination which is directly or indirectly visible from the beach where it may deter adult female sea turtles from nesting or disorient hatchlings; [Ord. 2009-040]
      - The installation of coastal lighting shall <u>meet</u> reflect the standards and mitigative measures published in the current state-of-the-art manual pertaining to coastal lighting and sea turtle conservation available at ERM (Witherington, Blair E. & Eric R. Martin, Understanding, Assessing and Resolving Light-pollution Problems on Sea Turtle Nesting Beaches, Florida Marine Research Institute Technical Report, Florida Department of Environmental Protection, 2000). # 2. Unique Structure

#### a. Purpose and Intent

To recognize structures that comply with the definition in Article 1.1.2.A, Unique Structure, that by the nature of their: scale, massing, proportion, rhythm, style, harmony, order, balance, etc, warrant a special designation. PBC has diverse architectural styles in the various Tiers that are reflective of the historical evolution of the community. The architecture guidelines were established to preserve and enhance those communities through common building design elements. The allowance for unique structures will continue to foster preservation of key design elements while recognizing new and creative design and materials. An applicant may apply for Unique Structure designation pursuant to Article 2.B.2.C, Standards for Unique Structure for any of the types of review outlined in Article 5.C.1.E, Review Process. A Unique Structure designation will require the applicant to clearly demonstrate that by complying with the standard architectural guidelines in Section 5.C.1.H, Guidelines, the overall design would be compromised. A structure classified as unique does not have to apply for variances, but shall comply with the standards in Article 2.B.2.C, Standards for Unique Structure. The Unique Structure process should shall not be requested if the applicant can seek variances for minor code viations as provided for in Article 2.B<del>.2<u>3, Type II Variance.</u></del>

#### 9 CHAPTER E PLANNED DEVELOPMENT DISTRICTS (PDDS)

#### 10 Section 2 Planned Unit Development (PUD)

# E. Pods

# 4. Civic Pod

A civic pod is intended to promote a coordinated land planning approach for providing and encouraging publicly and privately owned civic, institutional, educational, and additional recreational uses for the community.

- a. <u>Applicability</u> <u>1) Public Civ</u>ic
  - Where two percent of a PUD is less than 1.5 acres, public civic pods may not be required subject to FD&O approval.
  - <u>Private Civic</u> If a public civic pod is not required in a CCRT area, a private civic pod shall be provided unless waived by the BCC. For any other PUD, private civic pods shall be optional.
- a. A PUD shall provide for and designate a civic pod on the master plan based on the two percent of the gross acreage of the PUD. PUD's in AGR-FLU areas shall use two percent of the developable portion of the PUD. All civic pods so designated shall be identified as public or private. [First and 3<sup>rd</sup> sentences have been deleted. 2<sup>nd</sup> sentence relocated to new AGR PUD Calcuation below.]
- b. AGR PUD Calculation

<u>A PUD</u> in AGR-FLU areas shall use two percent of the developable portion of the PUD. **b.** Frontage

A civic pod shall have frontage on a collector or arterial street unless waived by FDO. [Ord. 2005 – 002] [Relocated below to renumbered Art. 3.E.2.E.4.b.1), Public Civic] Public and Private Civic

#### c. Public and Private Civic

All civic pods so designated shall be identified as public or private. PBC may require all or a portion of a civic pod to be dedicated to PBC for public purposes. Civic Pods of one acre or less may be labeled as "Private" with approval of FDO. [Ord. 2005 – 002]

1) Public Civic

Public civic pods shall be located adjacent to publicly owned, or anticipated to be owned, lands. In the event of co-location with property outside the boundary of the PUD, the required landscape buffer along the common boundary may be waived by the DRO. A minimum 5-foot setback shall be required for all permanent structures, measured from the common interior boundary. The remaining setbacks shall be applied pursuant to Table 3.E.2.D – PUD Property Development Regulations. The

The provisions of this Article prescribe the minimum standards for OSTDS used for treatment and 8 disposal of domestic sewage flows of 5,000 gallons per day and less shall apply to the following Onsite Sewage Treatment and Disposal Systems (OSTDS) and Private Collection and Transmission Systems (PCTS): 10 11

- A. An OSTDS regulated under F.S.§ 381.0065, as amended, that serves a residence or establishment with an estimated domestic sewage flow of 10,000 gallons or less per day based on Table I of Chapter 64E-6, Florida Administrative Code (F.A.C.), which is not currently regulated under F.S.§ 403;
  - B. An OSTDS regulated under F.S.§ 381.0065, that serves an establishment with an estimated commercial sewage flow of 5,000 gallons or less per day, based on Table I of Chapter 64E-6, F.A.C, which is not currently regulated under F.S.§ 403; and,
  - C. An OSTDS which has received variances from the FDEP from the requirements of F.S.§ 403, and from the Florida Department of Health (FDOH) from the jurisdictional flow limits of F.S.§ 381,

#### ULDC Art. 15.A.3, General Provisions: OSTDS [Related to Onsite Sewage Treatment 22 Part 2. 23 and Disposal Systems] (page 3 of 23), is hereby amended as follows:

#### (ENVIRONMENTAL CONTROL RULE I) - ONSITE SEWAGE TREATMENT AND 24 **CHAPTER A DISPOSAL SYSTEMS (OSTDS)** 25

#### 26 Section 3 **General Provisions: OSTDS**

- A. No OSTDS shall be installed, modified, abandoned or repaired without first obtaining a valid permit, or used without obtaining final approval or release from the Health Department.
- C. Buildings used or intended for human occupancy, employment or service to the public and locations where persons congregate shall provide toilets connected to an approved sewage waste disposal system. Also, property or location where persons congregate and are employed, or where property is used by the public for temporary and short periods of duration, such as construction sites, fairs, carnivals, revivals, field locations of agricultural workers, encampments or other use, shall be provided with portable toilets or other approved toilet facilities. The number of toilet facilities to be provided shall be in accordance with the local plumbing code, other applicable local regulations and the F.A.C. Establishments with permanent structures shall not rely upon systems designed for temporary use as the primary means of wastewater treatment and disposal unless a temporary approval is issued by the Health Department.
- F. Total waste flow from any one establishment, whether a single structure or group of structures, shall be centrally collected for treatment and disposal.
- GF. Wastewater generated by industrial or commercial establishments shall not be discharged into an OSTDS if the characteristics of the waste are such that it would cause malfunctioning of the OSTDS and/or contamination of the ground water. Wastewater from such establishments shall be treated and disposed of in accordance with the Florida Department of Environmental Protection (FDEP) requirements.
- HG. Treatment and disposal of the wastewater from a building or establishment shall be in compliance with FDEP standards and rules when any one of the following conditions exist:
- Any existing and previously approved system which remains in satisfactory operating condition shall remain valid for use under the terms of the rule and permit under which it was approved. If the use of a building is changed or if additions or alterations to a building are made which will increase sewage flow or change sewage characteristic, any OSTDS serving such building shall be upgraded to comply with the provisions and requirements of Rule 64E-6, F.A.C. [Renumber accordingly]

ULDC Art. 15.A.4, Permit Conditions and Approvals [Related to Related to Onsite Part 3. Sewage Treatment and Disposal Systems] (page 4 of 23), is hereby amended as follows:

- A. An OSTDS shall not be installed, modified, abandoned or repaired until a valid permit has been obtained from the Health Department. Permits issued for new construction shall expire after 18 months from the date of issuance if the system has not been installed. However, if building construction has commenced, the system construction permit shall be extended 90 days beyond the 18 month date. Permits for system repairs shall be issued in accordance with Rule 64E-6, F.A.C.
- C. The OSTDS shall not be used or covered with earth before it has passed an inspection by the Health Department and a notice of approval has been issued. Should the installer or general contractor fail to notify the Health Department prior to covering the system, the Health Department shall require that the system be uncovered for inspection. If the system is approved, the <u>Health</u> Department shall issue a notice of approval to the owner and, when appropriate, to the Building Department. Any new A building or structure shall not be occupied until a notice of approval has been issued by the Health Department. 25 This Article shall be designated as "PBC Environmental Control Rule II Drinking Water Supply Systems."

- Section 4 26 Water Quality Requirements
  - B. Maximum Contaminant Levels for Secondary Inorganic Contaminant Levels The maximum contaminant levels for secondary inorganic contaminants are applicable to community water systems only and are as specified in Chapter 62-550, F.A.C.
- 32 Part 5. ULDC Art. 15.B.7, Notification Requirements [Related to Drinking Water Supply] (page 11 of 23), is hereby amended as follows: 33

#### (ENVIRONMENTAL CONTROL RULE II) DRINKING WATER SUPPLY SYSTEMS CHAPTER B 34

- 35 Section 7 **Notification Requirements** 
  - A. The supplier of water of any community, non-community, non-transient or non-transient noncommunity water system shall comply with the notification requirements as defined in Chapter 62-560, F.A.C.
  - C. In case of breakdown in purification or protective equipment, breaks in water mains, transmission lines, loss of a drop in water pressure at the point of entry or anywhere in the distribution system below 20 p.s.i., abnormal taste or odor, change in treatment, or any interruption of water service to users, or any circumstances which could affect the quality of the drinking water, it shall be the duty of the water supplier to notify the Health Department within one hour of the occurrence. Notification shall include the following information:
    - 1. Description of the problem;

    - Area affected;
       Number of connections or users affected;
    - 4. Estimated duration of problem;
    - 5. Method of notification to users; and
    - Such information shall also be provided in writing on the monthly operation report. 6.
- 51 D. If any of the conditions listed in Art. 15.B.7.C, above, or in the Department of Health's "Guidelines 52 for the Issuance of Precautionary Boil Water Notices" as adopted in Rule 62-555.335, F.A.C. 53 should occur, the water supplier is required to obtain two consecutive days of satisfactory 54 bacteriological sample results from the affected area. If it is determined that N notification of the 55 56 interruption of water service and/or the necessity to boil water is required, then notification shall be given immediately to the users either by written notice (ex. door hangers, flyers, locally posted 57 58 signs), a reverse 911 calling system through the media of newspaper, radio, or television, or a 59 combination of these methods as needed to properly contact the service population. The Department of Health's "Guidelines for the Issuance of Precautionary Boil Water Notices" as 60

1		adopted in Rule 62-550, F.A.C. shall be used to determine if and when a boil water notification is
2		necessary and how to issue/rescind said boil water notification. If issued, 7 the notice to boil
3		water shall remain in effect until at least one day of satisfactory bacteriological sample results
4		have been obtained from the affected area, and after consultation and approval of the Health
5		
		Department. If only one day of precautionary boil water is utilized, then sufficient evidence must
6		be provided to the Health Department to confirm that no contamination has occurred, ex.
7		extensive bacteriological test data, system pressure data, detailed explanation of repair process
8		to confirm lack of potential for contamination, etc. If unsatisfactory bacteriological levels are
9		detected following the one day initial sampling, or if the system cannot adequately justify to the
10		Health Department that no contamination has occurred, then the water system shall provide a
11		minimum of two consecutive days of satisfactory sample results prior to rescinding the boil notice.
12		Samples shall be taken 24 hours apart. The Health Department shall notify the water supplier
13		when the <u>a system-wide</u> boil water notice may be rescinded. [Ord. 2005 – 003]

## C. Approval for Use

 . . . .

- 6. The connection of new water mains to existing mains shall not be completed until after the new mains have passed their pressure and leakage tests and completed the disinfection and bacteriological clearance procedures. During construction partial releases may be given by the Department. However, the pressure and leakage tests and the disinfection and bacteriological procedures shall be followed in all cases. No water supply system or facility, including any well, plant, tank, pump station, distribution system, or other pipes, equipment or structure through which water is delivered to the consumer for drinking or household purposes, except certain community water supply service connections not requiring a permit, shall be put into service or used until such facility has been effectively disinfected and bacteriologically cleared. Sample results shall be submitted to the <u>Health</u> Department as follows:
  - b. For a community, <u>non-transient</u> non-community, or <u>non-transient</u> non-community well clearance, a minimum of 20 consecutive workday acceptable samples are required with no more than two samples taken daily. Samples shall be taken at least six hours apart.

# Part 9. ULDC Art. 15.B.12.A, Related to Sampling/Analytical Methods (page 15 of 23), is hereby amended as follows:

## 36 CHAPTER B (ENVIRONMENTAL CONTROL RULE II) DRINKING WATER SUPPLY SYSTEMS

## 37 Section 12 Sampling/Analytical Methods

A. All water samples required under this Article for community, <u>non-transient</u> non-community, and <u>non-transient</u> non- community, water systems, including community water well and water main clearance shall be taken by an employee of a laboratory certified to perform drinking water analysis by the <u>Health</u> Department in accordance with F.S.§ 403.863 and Chapter 64E-1, F.A.C., or an operator certified under Chapter 62-602, F.A.C., or an employee of the <u>Health</u> Department. Water samples for other public and private water well clearance shall be taken by the licensed well contractor that installed the well.
