Access to Zoning Historical Information On Property Control Numbers

The Palm Beach County Zoning Division and Department of Information Systems Services are pleased to announce the release of the new ezINFO Control Number History screen to the public. The public will be able to access and query historical information on Zoning applications. Although this data is limited to what is in our database since 2005, it does provide valuable information when researching a property. Users who need more comprehensive information on a property will still need to research the official Zoning Petition File available upon request from the Zoning Division File Room.
