A Land Development Permit shall be required prior to commencement of construction of any required improvement. The effective date of the Land Development Permit shall be the date the County Engineer signs it. The Land Development Permit shall expire not more than 21 months from the effective date, unless extended pursuant to Article 11.B.7.B, Time of Completion of Required Improvements. Except when the installation of all required improvements has been waived pursuant to Article 11.A.8.C, Exceptions to Installation of Improvements Requirement, the Final Plat or certified boundary survey, as applicable, shall not be recorded until the developer has either installed the improvements or has guarantied the installation of the improvements pursuant to the requirements of Article 11.B.4.A.6, Guarantees, below. As the final step in the review procedures to obtain development approval under this Article, the developer shall have prepared and shall submit, prior to expiration of the Technical Compliance, an application for Land Development Permit. #### ARTICLE 12 – TRAFFIC PERFORMANCE STANDARDS SUMMARY OF AMENDMENTS (Updated 6/27/11)

b. For signalized intersections that are not part of the SIS, SIS Connectors, FIHS, or TRIP funded facilities, or grade-separated interchanges, analyze the Major Intersections using the Highway Capacity Manual (HCM) 1985 Planning Methodology (CMA). In the event that one or more intersections exceed the Critical Volume threshold identified in Table 12.B.2.C-2 1B, are grade-separated interchanges, or the intersections are part of the SIS, SIS Connectors, FIHS, or TRIP funded facilities, the applicant shall conduct the intersection analysis of those intersections using the HCM Operational Analysis using the most recent version of the HCM. # 1213Part 9.14ULDC Art. 12.C.1.C.4, Background Traffic (pages 25 of 61), is hereby amended as<br/>follows:

## 15 CHAPTER C TRAFFIC IMPACT STUDIES

# 16 Section 1 Traffic Impact Studies

#### C. Traffic Volume Components

The traffic impact study shall address the Total Traffic volumes at the Project Buildout Year and the Five Year Analysis Period as outlined for Test 1 and Test 2. [Ord. 2006-043] [Ord. 2007-013]

# 4. Background Traffic

a. General

Existing traffic volumes will likely change during the Buildout Period of the proposed Project and during the five-year Test 2 analysis period. The traffic study must account for this change in traffic based on Background Traffic during the Buildout Period of the proposed Project and five-year Test 2 analysis periods. The Projection of Background Traffic shall generally be based upon the information set forth in the TPS Database, and shall be established in accordance with the requirements set forth in this Article and accepted engineering principles. It is recognized that errors and omissions may occur in the TPS Database which may need to be accounted for in a traffic study. The traffic study shall be amended to include any correction of errors or omissions in the TPS database, so long as either the engineer preparing the traffic study or the County notifies the other party within thirty (30) days of the initial submission of the traffic study and the error or omission should have been included in the database prior to the date of the initial submission of the traffic study. This change in traffic shall be shown as it relates to the proposed phasing. The Projection of Background Traffic during the Buildout Period of the proposed Project and five-year Test 2 analysis period shall generally be based upon the TPS Database, and subject to the review and approval of the County Engineer, using the following criteria: [Ord. 2006-043

- 1) Historical growth shown on tables of County Engineer;
- 2) Characteristics of growth in the Radius of Development Influence;
- 3) Extent of existing, approved, and anticipated development in the Radius of Development Influence;
- 4) Types and sizes of development in the area;
- 5) Traffic circulation in the area;
- 6) Major Projects' impact;
- 7) New and assured road construction.

#### c. TPS Database

Using the TPS Database, all traffic from the unbuilt portion of Projects which have received a concurrency reservation prior to the County Engineer's approval of the proposed Project's traffic study which will add significant trips to any Link within the proposed Project's Radius of Development Influence during the Buildout Period of proposed Project shall be specifically accounted for in projecting Traffic for Test 1. For major intersections, the TPS Database shall specifically account for all Project Traffic volumes if at least one approach to the intersection has a Project Traffic volume greater than or equal to 1% of the adopted LOS D. No double counting of trips shall occur. For Test 2, only the traffic generated from the unbuilt portions of the Projects as set forth above which are projected to be built during the Five-Year Analysis Period shall be considered. **[Ord. 2005-002] [Ord. 2006-043] [Ord. 2009-040]**

# 3 CHAPTER F APPEALS

#### 4 Section 1 Board

5 Except as specifically provided in this Article, appeals from the decisions of the County Engineer or Municipal Engineer, and from all traffic engineering decisions made pursuant to this Article, shall be taken 6 7 to the TPSAB. Appeals may be brought by the Applicant, any Municipality within the Project's Radius of Development Influence, and the County. The TPSAB shall consist of the Director of the MPO, a 8 9 professional traffic engineer employed by a municipality as a traffic engineer, a professional traffic 10 engineer employed by another Florida County, a professional traffic engineer employed by the FDOT, District IV, and a professional traffic engineer who generally represents developers. Any individual serving 11 12 on the TPSAB shall not be a person who participated in the decision being appealed, or who works for or is retained by a party to the appeal or a person who would be directly affected by the matter being 13 14 appealed or the Proposed Project to which the appeal relates.

#### Part 11. ULDC Art. 12.G, Affordable Housing (pages 29-32 of 61), is hereby deleted as follows:

#### 18 CHAPTER G AFFORDABLE HOUSING

#### 19 Section 1 Applicability

#### A. Applicability

This Chapter applies to "Projects to Provide Affordable Housing." Income limits for purposes of this shall be as set forth in the Plan, Housing Element, using the median income as established by the U.S. Department of Housing and Urban Development, Subsection 8 Income Guidelines, West Pathe Beach - Boca Raton - Delray Beach, Florida.

## B. Definition

Affordable housing shall be that housing where mortgage payments, taxes, insurance, and utilities on owner-occupied housing; and contract-rent and utilities on renter-occupied; is less than or equal to 30 percent of the applicable Adjusted Gross Income as described in the preceding paragraph.

#### 30 Section 2 Eligibility

- In order to be eligible for Traffic Concurrency Relief under this Section, a Project must provide one of the
   following:
- Mixed housing which enhances or balances the proportions of very low and low income and 33 34 market-rate housing within the surrounding area as designated by a sector. A sector is defined in the Supporting Document of Transportation Element of the Plan and is provided here for 35 36 convenience. A sector is "...a geographic area that shall include and be relative to the size and 37 location of the proposed development. It shall consist of one or more neighborhoods that contain 38 a school, an integrated network of residential and collector streets bounded by arterial roads, civic 39 uses, and localized shopping and employment opportunities. The sector will include a minimum of 40 one census tract but shall not extend beyond important physical boundaries which may include a 41 major arterial roadway or wildlife refuge." [Ord. 2005 - 002]
- 42 B. Meet the requirements of Art. 5.G.1. Workforce Housing Program and Section 6, below. [Ord. 43 2005 – 002]
- A mixed housing Project shall not exacerbate an existing imbalance of very low/low income housing opportunities within the sector of the proposed development, but shall achieve an economic balance of households, as measured by household income, within a designated sector and shall promote the following ranges of housing opportunities:

| Table 12 G 2-11 - | Ranges of Housing Opportunities |

- The applicant shall prepare a covenant approved by the Commission on Affordable Housing, 1 2 determined to be legally sufficient by the County Attorney. The covenant, to be recorded in the 3 public records of PBC, shall guarantee, for a period of at least ten years for single family housing 4 and 20 years for multi-family housing rental units, how the affordability shall be maintained for 5 units required to be very low and moderate income (pursuant to income categories and definitions of the Plan, Housing Element). The period of time these units will remain affordable shall 6 7 commence from the date of the issuance of the final CO for the first required affordable unit built 8 in the Project. The covenant shall be recorded in the Public Records of the Clerk of the Court for 9 PBC prior to final DRO approval of the site plan. For a mixed housing project located within a municipality the covenant shall be recorded in the Public Records of the Clerk of the Circuit Court 10 for PBC prior to the issuance of any building permit by the municipality.     - B. The Traffic Division shall be responsible for monitoring the exempted traffic under the Special Methodologies for the LOS standard for Links impacted by the specific type, i.e. for mixed housing developments. The respective limit is three percent for any impacted Link on the PBCs thoroughfare network. The Traffic Engineer shall determine whether the Project traffic, when added to all other existing approved Projects' traffic exempted under the Special Methodologies procedures, exceeds the limits for exempted volume for the mixed housing development. [Ord. 2005 002]
    - C. The Traffic Engineer shall inform the Planning Director, prior to the certification of the Project at the DRO, when a Special Methodologies application has been approved for the traffic exemption from the applicable LOS standard. The Planning Director shall include this information in the review of an application for development certification at the DRO for a Project to be built in unincorporated PBC.
  - D. The Commission of Affordable Housing shall monitor the Project for compliance with the required covenant.

# 32 Section 6 Workforce Housing and Affordable Housing

## A. Workforce Housing Program (WHP)

TE Policy 1.2-b of the Plan allows special methodologies to be applied for WHP projects. The projects net trips associated with the non-WHP units attributable to the standard density and all non-residential land uses shall be subject to the 1% of adopted level of service (including Florida Strategic Inter-modal System [SIS]). The project's net trips associated with all remaining residential units of the project (including WHP units) shall be subject to a 5% of adopted level of service significance level in determining compliance with TPS. To address any adverse impacts on SIS facilities, any development significantly impacting SIS facilities shall be required to address their full impacts on the SIS facilities. **[Ord. 2005 – 002] [Ord. 2006-055] [Ord. 2010-005]** 

## B. Affordable Housing Program (AHP)

TE Policy 1.2-b of the Plan allows special methodologies to be applied for AHP projects. The project's net trips associated with the units attributable to the standard density and all non residential land uses shall be subject to the 1% of adopted level-of-service significance level. The project's net trips associated with the entire project (including any bonus density units) shall be subject to the 5% adopted level-of-service significance level in determining compliance with the Traffic Performance Standards. To address any adverse impacts on SIS facilities, any development significantly impacting SIS facilities shall be required to address their full impacts on the SIS facilities. **[Ord. 2010-005]**

#### ARTICLE 12 – TRAFFIC PERFORMANCE STANDARDS SUMMARY OF AMENDMENTS (Updated 6/27/11)

# 1Part 12.ULDC Art. 12.H, Constrained Facilities (pages 33 - 34 of 61 and Exhibit D of Ordinance22011-001), is hereby amended as follows:

#### 3 CHAPTER HG CONSTRAINED FACILITIES

#### 4 Section 1 Purpose and Intent

5 It is recognized by the BCC that some Links and Major Intersections are not planned to be widened to 6 width, laneage, or geometrics that can accommodate Traffic from the density/intensity and location of 7 land uses at the Generally-Adopted LOS. The BCC may determine that additional traffic impacts from 8 new development should be permitted on these Constrained Links and Major Intersections which are improved (or presumed to be improved under Test 2) to their ultimate width, laneage, and geometrics as 9 10 contemplated by the Thoroughfare R-O-W Protection Identification Map are, by definition, Constrained Facilities. Which of those Constrained Facilities cannot accommodate future Development at the 11 12 Generally Adopted LOS, and what should be done to remedy the situation, requires thorough study, comprehensive data, and close scrutiny of the various policies involved. Future Roadway System by 13 14 Number of Lanes Map, and/or MPO Cost Feasible Long-Range Plan. In some cases, the BCC may 15 designate a Link or Major Intersection as a temporary CRALLS in order to allow development to occur 16 prior to a planned roadway improvement project. When the BCC makes a determination that a reduced 17 LOS is appropriate on a Constrained Facility, it shall be designated a Constrained Roadway at Lower Level of Service (CRALLS). A County amendment to consider a CRALLS designation will rely upon, as 18 19 appropriate, the data and analysis provided by the local government requesting the CRALLS designation. 20 This Section is intended to ensure thorough review of application for a CRALLS. It is declared to be the 21 minimum review and procedure necessary establishes the procedures by which a proposed CRALLS 22 amendment is reviewed in order to ensure an appropriate level of review.

Constrained Facilities shall not automatically receive a reduced LOS. Determinations of whether a reduced LOS shall be set on a Constrained Facility, and what that LOS should be, shall be made by the BCC <u>as part of a text amendment to the Transportation Element of the</u> <u>Comprehensive Plan. The BCC may adopt a reduced LOS and shall specifically establish the</u> <u>LOS on the Constrained Facility, if reduced. Local governments shall request Applications for a reduced LOS on a Constrained Facility shall be made to the BCC through the Planning Director for initial review by the Planning Commission (PLC), by letter of intent up to 60 days and no later than 30 days prior to the window closing date for the applicable amendment Round. At least ten days prior to delivering the letter of intent, the local government shall provide written notice to the County Commissioner for the Commission District in which the Facility is located. Proof of such written notice provided to the District Commissioner, and the letter of intent, shall be delivered to the County Engineer and Planning Director and shall contain supporting containing such information relating to the Determination eCriteria of this Section as the PLC requires. The application shall be forwarded to all affected Local Governments, the County Engineer, the FDOT, District IV, in the case of State Highways, and the MPO. The MPO shall review the proposal for technical traffic engineering purposes and consistency with its adopted plan. The advice of the MPO shall be considered by the PLC and the BCC when considering an application for a reduced LOS. The application shall propose the reduced LOS sought for Test 1 and/or Test 2. It need not be an entire range. The level of data and study needed for existing and Future Land Use to review an application for a CRALLS designation shall be determined in the pre-application conference. The decision shall be made by the County Engineer based upon the Major Thoroughfare Links and Major Intersections involved, (whether they are or will be collectors, minor arterials, or principal arterials), the extent of the sed lowering of the LOS, the size of the area affected, the extent to which the affected area is built out to its ultimate FLU, and the amount and quality of existing data and planning.[Relocated to new 12.G.2.D, Amendment Review] Upon receiving the letter of intent, the Planning Director shall schedule a Pre-Application Conference prior to the Planning Commission meeting at which initiations for the next Comprehensive Plan Amendment Round will be discussed.

C. Pre-application Conference

The applying Local Government shall contact the Planning Director prior to making application, notifying the Director of the Local Government's intent to make application under this Article

The advice of the MPO shall be considered by the PLC and the BCC when considering an application for a reduced LOS. [Relocated from 12.H.2.B, Applications]

#### 32 Section 3 **Determination Criteria**

33 In determining whether a Constrained Facility shall have a reduced LOS and, if so, what that LOS should be, and any conditions that shall be imposed, the applicant, the MPO, PLC, and the BCC shall consider the following public policy criteria: <u>The Application and Amendment staff report shall include an analysis</u> 34 35 36

- of the proposed CRALLS against these criteria: [Ord. 2011-001] A. Cause of the constraint; e.g., whether the lineage laneage or geometrics are insufficient to accommodate Projected traffic as a result of concerns relating to physical limitations, fiscal limitations, environmental areas, aesthetics, historically significant development, or the characterof-area or neighborhood and the impact of adding lanes or changing the geometrics on such concerns.
  - L. A description of mitigation measures required to be implemented by the Project(s) that would benefit from the proposed CRALLS. These include vehicular and non-vehicular travel options to alleviate traffic congestion that is anticipated to result from exceedance of the adopted LOS on the CRALLS Link or Major Intersection.

#### 47 Section 4 Determination

48 The BCC may adopt a reduced LOS and shall specifically establish the LOS on the Constrained Link, if reduced. When the BCC makes a determination that a reduced LOS is appropriate on a Constrained 49 50 Facility, it shall be designated a CRALLS. The Plan shall be modified to set this LOS. A reduced LOS need not necessarily be a whole range; it may be a portion of a range. Any proposed reduction in the 51 52 LOS on a State Constrained Facility shall be coordinated with and approved by the State in accordance

- 53 with Florida law.
- It is recognized that detailed and comprehensive transportation planning has not yet been completed for 54 55 all of PBC. This transportation planning will involve balancing the transportation system to the land use as 56 to density/intensity and location. This balancing will involve, in part, adjusting the levels of service on the 57 Major Thoroughfare system. It will be achieved through the work of the MPO's work in updating the
- 58 Model, and improving the data. Theoretically, once this balancing is completed, the need for CRALLS
- 59 would not be necessary, unless amendments to land uses are made, or R-O-W widths or lanes are
- 60 reduced. Accordingly, once the system is balanced through the work on the Model and data, the criteria
- 61 shall be revisited to ensure that the criteria take into account this balancing.

### LION COUNTRY SAFARI SUMMARY OF AMENDMENTS (Updated 6/27/11)

### c. Preservation

Significant environmental, geological, and historic conditions identified in the site analysis shall be incorporated and preserved in open space areas on the master plan or as required by ERM and/or the SFWMD.

#### d. **Open Space Management Plan**

The applicant shall submit an Open Space Management Plan for review and approval by the DRO, which ensures that all areas designated as open space on the master plan are maintained in perpetuity. The Open Space Management Plan shall include a bond, or the funding mechanism, in an amount necessary to ensure maintenance of the preserve area on a permanent basis. Bona fide agricultural land shall remain in agricultural production or returned to a natural state acceptable to ERM. Fallow land shall remain free of prohibited species and maintained to prevent the creation of a nuisance on adjacent properties. Wetlands shall remain viable and subject to the permitting and maintenance requirements of the SFWMD.

### 1) Lion Country Safari Exemption

The required bond or other funding mechanism shall not be required for any Open Space areas located within the LCS MUPD or RVPD that have been counted towards a LCS PUD, until such time as the Safari Park ceases operations.

#### e. Plat

All open space shall be platted simultaneously with the first plat in the developments area.

### 5. Landscape Buffer

A landscape buffer shall only be required around the development area, adjacent to the perimeter of the project. The buffer shall be a minimum of 150 feet in width and consist of 100 percent native vegetation. Landscape buffers providing continuity between open space areas to be preserved may be counted toward meeting the minimum open space requirement.

#### Landscape Requirements a.

Portions of the buffer which are not adjacent to a street shall comply with the compatibility landscape requirements in Article 7, LANDSCAPING. All landscape material shall be planted in groups and/or a naturalistic pattern.

#### b. Trails

A continuous equestrian trail, fitness trail, bike path, walking path, or similar trail system shall be incorporated into the internal street R-O-W sections, around lakes, and/or within the buffers in the development area. #### NORTHLAKE BOULEVARD OVERLAY ZONE (NBOZ) SUMMARY OF AMENDMENTS (Updated 05/11/11)

- Part 1. ULDC Art. 3.B.8, NBOZ, Northlake Boulevard Overlay Zone (page 24 25 of 231), is hereby amended as follows:
- 4 CHAPTER B OVERLAYS

### 5 Section 8 NBOZ, Northlake Boulevard Overlay Zone

### A. Purpose and Intent

The purpose and intent of the NBOZ is to encourage improvement, enhancement, renovation, and/or redevelopment of the Northlake Boulevard Corridor and to provide criteria by which to review development/redevelopment within the Overlay Zoning District. The criteria outlined in "Design Guidelines: Northlake Boulevard Overlay Zoning District (NBOZ)" will serve to unify commercial development along the corridor and provide a positive collective identity for the corridor. These regulations were prepared under the guidance of the Northlake Boulevard Corridor Task Force (NBCTF) – an intergovernmental task force created by interlocal Interlocal agreement composed of two representatives each from PBC, the Town of Lake Park, the Village of North Palm Beach and the City of Palm Beach Gardens.

### B. Applicability

The provisions of the NBOZ, as outlined in "Design Guidelines: Northlake Boulevard Overlay Zoning District (NBOZ)" prepared by Michael Redd & Associates, and dated March 11, 2002, which are incorporated herein by reference, shall apply to all proposed development order applications within the boundaries of the NBOZ, as described in Article 3.B.9.C, Boundaries.

### C. Boundaries

The NBOZ includes the public R-O-W for Northlake Boulevard and all properties along Northlake Boulevard from Military Trail to U.S. Highway One for one property depth north and south of Northlake Boulevard, including the street intersection properties at U.S. Highway One and at Military Trail. Unincorporated portions of the NBOZ include portions of Section 18, Township 42, Range 43; Section 17, Township 42, Range 43; Section 24, Township 42, Range 42; and Section 19, Township 42, Range 43, as indicated in the Official Zoning Map.

### D. Conflict

In the event of a conflict between the NBOZ and other applicable regulations, the more restrictive regulation shall prevail.

### E. Deadline to Comply with Requirements for Signage and Landscaping

The deadlines to comply with signage and landscaping requirements contained in the provisions of the Design Guidelines for the NBOZ are hereby extended to May 31, 2014.

## 1. Notice to Property Owners

Written certified notice shall be provided by PBC Zoning to the property owner at least one year in advance of the May 31, 2014 deadline.

### EXHIBIT V URBAN REDEVELOPMENT AREA OVERLAY (URAO) SUMMARY OF AMENDMENTS (Updated 6-27-11)

The PRA requirements are modeled after the concept of a form based code and seeks to establish a precise and predictable set of regulations to dictate the placement of buildings and site improvements with less emphasis on the regulation of uses. However, the PRAs also serve to implement the concepts of the TCRPC Corridor Plans by establishing limits on building height, mix of uses, and uses by floor, to ensure that development will serve the needs of residents while mitigating adverse impacts to existing neighborhoods. **[Ord. 2010-022]** 

# 2. Streets, Access and Interconnectivity

Blocks, streets and alleys are the fundamental components for creating traditional neighborhoods. Blocks are formed by streets which provide an interconnected pedestrian and vehicular circulation system, while regulating the physical and functional relationship between buildings and open space. To improve the pedestrian environment are detailed with pedestrian crossings, street trees, and traffic calming measures such as on-street parking. Regulating block sizes, vehicular access points, and the use of alleys to access parking and service areas are intended to disperse traffic to create a more pedestrian friendly oriented form of development. The alley is located behind buildings, to allow buildings to face and have access directly from the street. Alleys lessen necessary trips on the thoroughfare and provide a physical separation between the existing residential neighborhoods and redevelopment. **[Ord. 2010-022]** 

### 3. Frontage Classifications

Frontage classifications define the details of the pedestrian realm located between the public R-O-W or internal streets and the build facade. Three frontage types are established, as follows: Slip Street, Primary, and Secondary. The default location for the PRA Frontage Types shall be in accordance with Maps LU 9.1 and LU 9.2, Urban Redevelopment Area Regulating Plan. **[Ord. 2010-022]** 

### a. Slip Street Frontage

The Slip Street is an optional designation for areas that were determined to have sufficient depth to accommodate landscaping along the existing thoroughfare, a one-way vehicular lane, a parallel parking lane, and a wide pedestrian zone. Applicants in areas designated for Slip Streets are encouraged to utilize this frontage type when identified on Maps LU 9.1 and LU 9.2, or in the following instances:

- The parcel, or group of parcels, has 400 feet of frontage; or
- 2. The parcel, or group of parcels, is located between two side streets; or
- 3. The parcel, or group of parcels, is located adjacent to an existing slip street.

Applicants may opt to utilize the slip street in areas not designated for slip street, provided the parcel or group of parcels has at least 400 feet of frontage where a Primary Frontage type is identified. **[Ord. 2010-022]** 

### Figure 3.B.16.E – Typical Example of Slip Street Frontage

[Ord. 2010-022]

### b. Primary Frontage

Primary Frontages are located along adjacent thoroughfares or new internal streets, and accommodate a wide pedestrian zone, lined by the main building façade and entrance(s). [Ord. 2010-022]

### 4. PRA Transect Zones (TZ)

Transect Zones are distinct categories that define and organize density and intensity ranging from the most urban to the least urban. The URAO establishes the Urban Center (UC) and Urban Infill (UI) FLU designations for the PRAs, and further refines these designations using sub areas as transect zones. Transect zones facilitate the development of urban forms while providing for gradual transitions in building scale and use intensity, rather than rigid distinctions. The default location for the URAO Transect Zones shall be in accordance with the PRA GIS Regulating Plan maintained by PZB. **[Ord. 2010-022]**

PRA Transect Zones and Sub-areas Figure 3.B.16.E

### [Ord. 2010-022]

### Urban Center (UC) Sub-area Transects

The UC is designated at prominent intersections and is the most intense PRA district, typically comprised of larger interconnected commercial and buildings containing a wide variety of uses, of at least two stories in height that create a continuous street wall along designated street frontages. A well-balanced mix of residential, commercial, civic, and recreational uses is encouraged, but may also be a requirement of the PRA TCEA. The UC is broken down into three distinct Sub-areas, as follows: [Ord. 2010-022]

#### UC 1 Sub-area 4)

The most intense Sub-area accommodates the most intense types of uses and largest building scale permitted in the PRAs. Building heights shall be at least two stories and are permitted up to five stories by right, with green building incentives allowing up to eight stories for certain building types. [Ord. 2010-022]

#### UC 2 Sub-area <del>2)</del>

This Sub-area allows for the same intensity of uses, but begins a physical transition to the UC 3 Sub-area. Buildings shall be at least two stories in height and are permitted up to four stories by right, with green building incentives allowing up to six stories for certain building types. [Ord. 2010-022]

### 3) UC 3 Sub-area

The least intense UC Sub-area intended to provide for a transition between the more intense UC 1 and 2 Sub-areas, and abutting residential neighborhoods or adjacent UI Sub-areas. Buildings shall be at least two stories in height and are limited to a maximum of three stories by right. [Ord. 2010-022]

### 1. General Uses Permitted by Building Type or Floor

Table 3.B.17.F, General Uses Permitted by Building Type or Floor, identifies permitted building types by Sub-area Transect, building height, and allowable uses by floor, to ensure development will serve the needs of residents while mitigating adverse impacts to existing neighborhoods. This section shall only apply to uses in the PRAs. See Art. 3.B.16.F.7, for a listing of specific uses permitted and related approval processes. **[Ord. 2010-022]**

# 1. PRA Transect Zones (TZ)

Transect Zones are distinct categories that define and organize density and intensity ranging from the most urban to the least urban. The URAO establishes the Urban Center (UC) and Urban Infill (UI) FLU designations for the PRAs, and further refines these designations using sub-areas as transect zones. Transect zones facilitate the development of urban forms while providing for gradual transitions in building scale and use intensity, rather than rigid distinctions. The default location for the URAO Transect Zones shall be in accordance with the PRA GIS Regulating Plan maintained by PZB. [Ord. 2010-022] [Relocated from Art. 3.B.16.E.4, PRA Transect Zones (TZ)]

### EXHIBIT V URBAN REDEVELOPMENT AREA OVERLAY (URAO) SUMMARY OF AMENDMENTS (Updated 6-27-11)

# a. Urban Center (UC) Sub-area Transects

The UC is designated at prominent intersections and is the most intense PRA district, typically comprised of larger interconnected commercial and buildings containing a wide variety of uses, of at least two stories in height that create a continuous street wall along designated street frontages. A well-balanced mix of residential, commercial, civic, and recreational uses is encouraged, but may also be a requirement of the PRA TCEA. The UC is broken down into three distinct Sub-areas, as follows: [Ord. 2010-022]

# [Relocated from Art. 3.B.16.E.4.b, Urban Infill Sub-area Transects]

### c. TZ Sub-area Modifications

The DRO shall have the authority to allow modifications to the location and boundaries of the default UC or UI Sub-area Transects illustrated in the PRA GIS Regulating Plan,

One access point shall be permitted for each 160 linear feet of street frontage. Access shall be in the form of a street or alley, unless exempted otherwise herein. No more than one access point or alley shall be permitted for each 160 linear feet of street frontage to allow for access to parking and loading, drive through facilities, or other similar uses. A maximum of two access points shall be permitted per block face. **[Ord. 2010-022]** 

### c. Existing Small Parcel Exception

Parcels <u>that existing prior to the adoption of the URAO</u> with less than 160 feet of frontage shall be permitted to establish one access point along a perimeter street; however, alley access shall be encouraged as the primary means of vehicular access where feasible. [Ord. 2010-022]

### 3. Block Standards Design

Blocks shall be created by utilizing streets and alleys to provide continuous pedestrian and vehicular circulation, interconnectivity and accessibility in PRA projects. Cul-de-sacs and other dead-end streets shall not be permitted unless it can be demonstrated that physical constraints prohibit practical alternatives. Any new blocks shall comply with the following: **[Ord. 2010-022]**

The façade shall be designed to appear as a minimum of two stories, with additional floors based on the maximum height per floor indicated in Table 3.B.16.F, PRA Maximum Building Height. **[Ord. 2010-022]** 

#### de. Additional Architectural Design Standards

Architecture shall be in accordance with Art. 5.C, Design Standards, unless specified otherwise herein. [Ord. 2010-022]

1) Primary Entrances

A primary entrance shall occur at a minimum of every 75 feet for primary facades. The primary entrance for all 1st floor tenants must directly face a street, courtyard, plaza, square or other form of usable open space fronting a street. Access for tenants located on upper floors shall provide similar entrances, but may be permitted to deviate from this requirement on sites less than one acre in size. Street access may be in the form of common lobbies, elevators, stairwells, or other form of consolidated access. [Ord. 2010-022]

#### 2) Secondary Entrances

Each tenant may be permitted to have additional entrances located at side or rear facades facing a parking lot or other area, subject to the following limitations: [Ord. 2010-022]

a) Shall not exceed the number of primary entrances; and, [Ord. 2010-022]

b) Limitations shall not apply to service access or emergency exits. [Ord. 2010-022]

# 3) Fenestration

Non-residential and multi-family building facades facing perimeter and primary streets or usable open space shall provide transparent windows covering a minimum of 35 percent of the wall area of each story as measured between finished floors, to allow transmission of visible daylight. **[Ord. 2010-022]** 

# 4) Storefronts

The storefront is a first floor façade improvement required for all <u>non-residential</u> retail uses that face a street or usable open space area: **[Ord. 2010-022]** 

- a) Storefronts shall extend across 70 percent of the <u>non-residential</u> commercial space; [Ord. 2010-022]
- b) Storefronts shall have transparent glazing of at least 70 percent of the <u>linear</u> width of the applicable façade area, comprised of storefront windows and doors; [Ord. 2010-022]
- c) Storefront windows shall have a base one and one-half feet to three feet high, with transparent glazed areas extending from the base to at least eight feet in height as measured from sidewalk grade. [Ord. 2010-022]
- d) A minimum of 50 percent of all required storefronts shall have an awning, gallery, or arcade shading the sidewalk. **[Ord. 2010-022]**

# 5) Architectural Appurtenances

Table 3.B.16.F, PRA Appurtenances by Building Type identifies where appurtenances shall be required, and what additional appurtenances are permitted. Where indicated by a checkmark, each building type shall be required to provide a minimum of one appurtenance. **[Ord. 2010-022]**
