Replace ENGINEERING Condition 6 with the following:

- 6. The property owner shall convey to Palm Beach County Land Development Division by road right of way warranty deed for:
 - i. Lyons Road 55 feet from centerline;
 - ii. Boynton Beach Boulevard 120 feet north of the existing north right of way line of the LWDD L24 Canal.
 - iii. Sufficient right of way to provide for an Expanded Intersection at Boynton Beach Boulevard and Lyons Road.

All right of way deed(s) and associated documents shall be provided and approved prior July 1, 2014. Right of way conveyance shall be along the entire frontage and shall be free and clear of all encroachments and encumbrances. Property owner shall provide Palm Beach County with sufficient documentation acceptable to the Right of Way Acquisition Section to ensure that the property is free of all encumbrances and encroachments, including a topographic survey. The Grantor must further warrant that the property being conveyed to Palm Beach County meets all appropriate and applicable environmental agency requirements. In the event of a determination of contamination which requires remediation or clean up on the property now owned by the Grantor, the Grantor agrees to hold the County harmless and shall be responsible for all costs of such clean up, including but not limited to, all applicable permit fees, engineering or other expert witness fees including attorney's fees as well as the actual cost of the clean up. Thoroughfare Plan Road right of way conveyances shall be consistent with Palm Beach County's Thoroughfare Right of Way Identification Map and shall include, where appropriate as determined by the County Engineer, additional right of way for Expanded Intersections and Corner Clips. The Property Owner shall not record these required deeds or related documents. Palm Beach County will prepare a tax pro-ration. A check, made payable to the Tax Collector's Office, shall be submitted by the property owner for the pro-rated taxes. After final acceptance, Palm Beach County shall record all appropriate deeds and documents. (DATE: MONITORING-Eng)

AMEND PART 2 to read as follows:

Part 2. ULDC Art. 5, Supplementary Standards (page 92 of 92), is hereby amended to create new Chapter J, Best Management Practices for Livestock Waste, as follows:

Reason for amendments: [PZ&B and Cooperative Extension Service, with support of ERM, the PBC Health Department, SWA and the County Water Resources Manager] The proposed amendment is specifically for those properties that receive off-site livestock waste. The amendment serves to address the inappropriate dumping or storage of livestock waste that far exceeds the maximum nutrient values necessary for fertilizer or soil amendment. These Code amendments will not adversely impact legitimate farming operations.

The use of animal waste for fertilizer or soil amendment is a commonly recognized farming practice; however, when applied haphazardly without an appropriate management plan or use of State approved Best Management Plans (BMPs), there is a strong potential for adverse impacts to the environment, especially water bodies and drinking water supplies. In most instances, legitimate farmers recognize that the overuse or improper spreading of livestock waste doesn't make economic sense, and elect to follow State BMPs. Implementation of these BMPs on bona fide agricultural properties would be pre-empted from the requirements of this code, and are encouraged.

CHAPTER J BEST MANAGEMENT PRACTICES FOR LIVESTOCK WASTE RECEIVED FROM OFF-SITE SOURCES

Section 1 Purpose and Intent

The purpose and intent of these regulations is to mitigate potential adverse environmental impacts, pathogens and other nuisances associated with the inappropriate use or disposal of livestock waste received from off-site sources. Adverse impacts include but are not limited to: ground and surface water pollution due to excessive nutrient discharge, specifically nitrogen or phosphorus; odors or other nuisance from improperly stored, composted or spread livestock waste.

Section 2 Applicability

The standards shall apply to the storage or receiving of livestock waste that is received from offsite sources. ~~with exception to the following:~~

A. Exemptions

- 1A. Where pre-empted by State law, including but not limited to, the Right to Farm Act. Where applicable, documentation of implemented Best Management Practices or other method of pre-emption shall be required;
- 2B. A SWA Designated Disposal Facility;
- ~~C. Livestock waste generated by livestock on open pasture lands where the waste is not stockpiled;~~
- 3D. The commercial application of fertilizer on non-agricultural property when in compliance with the Palm Beach County Fertilizer Ordinance (Ord. 2012-039);
- 4E. Composted manure applied by a homeowner or tenant to residential ~~ornamentals~~ lawns or gardens; and,
- 5F. Ten cubic yards per acre up to a maximum of 20 cubic yards in any 12 month period ~~per year~~, with all requirements being met, as listed under Section 3 Separation, below.

Section 3 Storage or Spreading of Livestock Waste

The storage or spreading of livestock waste that is received from off-site sources is prohibited, unless in compliance with the following:

A. Storage

Storage areas shall be covered or contained to prevent run-off or seepage of liquids or ~~/~~ materials from the storage area. Storage of livestock waste shall comply with the following:

1. Shall not be located within five feet of any ~~adjacent~~ structure, ~~or unless~~ placed within a structure intended for the storage or composting of such waste;
2. Shall not be located within ~~25 50~~ feet of any property line, with exception to internal lot lines of parcels owned by the same entity; and,

3. Shall not be within 100 feet of a potable water supply well, a storm drainage system, wetland, pond, canal or other water body.

B. Spreading

Livestock waste received from off-site sources shall be spread within 72 hours of delivery unless otherwise approved in a Nutrient Management Plan. ~~In either event, storage~~ Storage shall comply with any applicable livestock waste Storage and Separation requirements. Spreading of livestock waste shall comply with the following:

1. Nutrient Management Plan

Prior to receiving ~~of~~ livestock waste, an application shall be submitted to the Cooperative Extension Service (CES) for review. Upon completion of the review, the CES shall develop a Nutrient Management Plan which indicates whether application of any livestock waste is appropriate for the soil condition, and if so, in what amount.

a. Application Form and Requirements

The application form and requirements shall be in a manner established by the CES.

b. Validity of Nutrient Management Plan

The Nutrient Management Plan shall remain current for three years after its issuance by the CES. A current Nutrient Management Plan must be in place prior to receiving of livestock waste at any time. It shall be a violation of the ULDC, Code if livestock waste is ~~being~~ stored or spread in a manner inconsistent with the current Nutrient Management Plan.

2. Separation

The spreading of livestock waste shall not occur:

- a. Within ~~25~~ 50 feet of any property line, with exception to internal lot lines of parcels owned by the same entity; and,
- b. Within 100 feet of a potable water supply well, a storm drainage system, wetland, pond, canal or other water body. ~~[Ord. 2013-...]~~
