### ARTICLE 4, USE REGULATIONS SUMMARY OF AMENDMENTS

**Part. 1** Art. 4, Use Regulations is hereby deleted in its entirety and replaced with new Art. 4, Use Regulations, as follows:

#### **ARTICLE 4, USE REGULATIONS**

#### **CHAPTER A USER GUIDE AND GENERAL PROVISIONS**

##### **Section 1 Overview**

In order to ensure that all development in unincorporated PBC is consistent with the Comprehensive Plan, it is necessary to define Uses and identify where such Uses are allowed. This Chapter establishes the general provisions that address regrouping of uses by classification, approval process and any requirements specific to a use. It also serves as a guide to assist users in determining the Uses that are allowed in the various zoning districts. The Zoning Director shall maintain and publish a User Guide to assist the public with applicability of Article 4, Use Regulations.

##### **Section 2 Variance Relief Prohibited**

Variance relief from any of the requirements of this Article shall be prohibited unless expressly stated otherwise herein.

##### **Section 3 Zoning and Future Land Use Consistency**

Before utilizing this Article to confirm if a use is allowed, it must be determined that the zoning district designation of the subject site is consistent with its Future Land Use (FLU) designation. This can be accomplished by referencing the site's FLU designation from the PBC Future Land Use Atlas (FLUA), and check Art. 3.A.3, Zoning District Consistency with the Future Land Use Atlas (FLUA). If the zoning district is inconsistent with the FLU designation, a rezoning may be required to allow for a proposed use subject to the requirements specific to the Use and other applicable Project Development Regulations.

Depending on the size and location of the site, there may be multiple options for rezoning, which may include Standard zoning districts, PDDs or TDDs. Once consistency has been confirmed or if it's determined that rezoning may be required, the appropriate zoning district or zoning districts can then be referenced to determine potential Uses and applicable approval process.

A. If the zoning district is consistent with the FLU designation, then a rezoning is not required. The Applicant shall reference Use Matrices to see whether the proposed Use is allowed in that zoning district and subject to what type of approval process.

B. If the zoning district is not consistent with FLU, then a rezoning is required. The Applicant shall select the most appropriate zoning district, and reference Use Matrices to identify whether the proposed Use is allowed in the proposed zoning district and subject to what type of approval process.

##### **Section 4 Overlays**

The Applicant shall confirm whether the site is located in an Overlay Zone pursuant to Art.3.B, Overlays, or as shown in the Official Zoning Map. If a site is located within an Overlay, then additional requirements and limitations may apply to those Uses additional to the regulations under the Supplementary Use Standards.

##### **Section 5 Airport Zones**

Uses in Airport Zones may be further restricted or subject to special regulations as specified in Article 16, Airport Regulations.

##### **Section 6 Specific Regulations for Standard Zoning Districts**

Special regulations apply within certain zoning districts as specified under Art. 3.D.3, District Specific Regulations.

##### **Section 7 Determining Approval Process**

Uses not specifically listed in the Use Matrices of this Chapter, but consistent with the definition of a listed use, may be considered by the Executive Director of PZB pursuant to Article 1.B, Interpretation of the Code. All Uses shall comply with all requirements of the ULDC unless expressly exempted otherwise.

###### **A. Organization**

Uses are arranged within this Chapter by Use Classification, each of which includes: a Use Matrix, General Standards, and Definitions and Supplementary Use Standards for Specific Uses. Uses listed under each Use Classification are organized alphabetically, with a corresponding number that allows for easy reference between the Use Matrix, definitions and Supplementary Use Standards.

###### **B. Use Classification**

Uses are grouped into 11 classifications generally based on common functional characteristics or land use compatibility, as follows:

1. Residential,

2. Commercial,
  3. Recreation,
  4. Institutional, Public and Civic,
  5. Industrial,
  6. Agricultural,
  7. Utilities,
  8. Transportation,

- C. Use Matrix**
- There are five processes to obtain a zoning approval for a use, as follows: Permitted by Right, Special Permit, DRO, Class B Conditional Use, or Class A Conditional Use. Each Use Matrix identifies all zoning districts, uses, and approval process. The Use Matrix consolidates use approvals in standard Zoning Districts, URAO, IRO, PDDs and TDDs. A number in the "Supplementary Use Standard" column of the Use Matrix refers to the Definition and Supplementary Use Standards applicable to the use.
- 1. Permitted by Right**  
Uses identified with a "P" are allowed in the zoning district, subject to the Supplementary Use Standards and the other applicable requirements of this Code. Uses in this category that do not require a Building Permit or Zoning Division site plan approval are still required to comply with all applicable requirements of the ULDC.
  - 2. Development Review Officer (DRO)**  
Uses identified with a "D" or exceeding the thresholds of Table 4.A.9.A, Thresholds for Projects Requiring DRO Approval, are allowed subject to approval by the DRO in accordance with Article 2.D, Administrative Process. [Ord. 2005-002]  
[Renumber accordingly.]
  - 3. Special Permit**  
Uses identified with an "S" are allowed in the zoning district only if approved by the Zoning Director in accordance with Article 2.D.2, Special Permit. Most of the Uses subject to Special Permit are under the Temporary Use Classification.
  - 4. Class B Conditional Use**  
Uses identified with a "B" are allowed in the zoning districts only if approved by the ZC in accordance with Article 2.B, Public Hearing Process.
  - 5. Class A Conditional Use**  
Uses identified with an "A" are allowed in the zoning districts with a recommendation by the Zoning Commission, and approved by the BCC in accordance with Article 2.B, Public Hearing Process.
  - 6. Prohibited Uses**  
Uses identified with a dash "-", in a zoning districts column of the Use Matrix, are prohibited in that zoning district, unless otherwise expressly stated under the Supplementary Use Standards for the use, or within any applicable Zoning Overlays.
- D. General Standards**
- Where applicable, each Use Classification may have a listing of General Standards that apply to all Uses in that Use Classification.
- E. Definitions and Supplementary Use Standards for Specific Uses**
- The definition for each Use permitted is listed. Where applicable, additional Supplementary Use Standards may apply. In the case of a conflict with other regulations in this Code, the more restrictive requirement shall apply, unless otherwise stated. [Ord. 2010-022]

#### Section 8 Use Functions

Uses may be identified as principal or accessory. A site may be developed with a single use or collocated with multiple principal uses. Functionality of uses are as follows:

- A. Principal**  
As defined in Art. 1, a principal use is "the primary and major purpose for which land or building is used as allowed by the applicable zoning district." Only those Uses listed in this Chapter within the Use Matrices may be considered a principal use. A site may have more than one principal use.
- B. Collocated**  
Certain principal Uses that are not normally permitted within a zoning district by the Use Matrices may be allowed as a collocated use if expressly stated under the Supplementary Use Standards and compliance with all of the Supplemental Use Standards applicable to the use.
- C. Accessory**  
As defined by Art. 1, "a permitted use that is customarily associated with the principal use and clearly incidental to the principal use, and is subordinate in area, extent or purpose to and serves only the principal use." Uses not allowed in a zoning district shall not be accessory to a principal use unless stated otherwise in the Supplementary Use Standards of the use intended to be accessory. Additional accessory Uses limitations and requirements are contained in Art. 5.B, Accessory Uses and Temporary Structures.

47 ensure that residential districts, religious uses, educational uses, parks and other  
48 commercial uses are located in areas free from the secondary effects of Adult  
49 Entertainment uses. The location of residential districts, religious uses, educational uses,

- 1) Commercial uses exist or may exist within unincorporated PBC where books, magazines, motion pictures, prints, photographs, periodicals, records, novelties and/or other devices that depict, illustrate, describe or relate to specified sexual activities are possessed, displayed, exhibited, distributed and/or sold. - 2) Commercial uses exist or may exist within unincorporated PBC: [Ord. 2009-040]
  - a) Where the superficial tissues of one person are manipulated, rubbed, stroked, kneaded, and/or tapped by a second person, accompanied by the display or exposure of specified anatomical areas; [Ord. 2004-041] [Ord. 2009-040]
  - b) Where dancers, entertainers, performers, or other individuals, who, for any form of commercial gain, perform or are presented while displaying or exposing any specified anatomical area; or [Ord. 2004-051] [2009-040]
  - c) Where lap dancing occurs. [Ord. 2004-051] [Ord. 2009-040]
- 3) This competitive commercial exploitation of such nudity and semi-nudity is adverse to the public's interest and the quality of life, tone of commerce, and the community environment in PBC. [Ord. 2004-051] [Ord. 2009-040]
  - a) When the activities described in Art. 4.B.2.C.2.b.17)-18), Specified Anatomical Areas and Specified Sexual Activities, are presented in commercial uses, other activities that are illegal, immoral, or unhealthful tend to accompany them, concentrate around them, and be aggravated by them. Such other activities include, but are not limited to, prostitution, solicitation for prostitution, lewd and lascivious behavior, possession, distribution, and transportation of obscene materials, sale or possession of controlled substances, and violent crimes against persons and land.   - b) When the activities described in Art. 4.B.2.C.2.b.17)-18), Specified Anatomical Areas and Specified Sexual Activities, are present in commercial uses within PBC, they tend to blight neighborhoods, adversely affect neighboring businesses, lower property values, promote crime, and ultimately lead residents and businesses to move to other locations. [Ord. 2004-051] [Ord. 2009-040]
  - c) There is a direct relationship between the display and depiction of specified anatomical areas as described in Art. 4.B.2.C.2.b.17)-18), Specified Anatomical Areas and Specified Sexual Activities, and an increase in criminal activities, moral degradation and disturbances of the peace and good order of the community, and the occurrence of these activities are hazardous to the health and safety of those persons in attendance and tend to depreciate the value of adjoining land and harm the economic welfare of the community as a whole. These secondary effects are adverse to the public's interest and quality of life, the tone of commerce and the community environment in PBC. [Ord. 2004-051] [Ord. 2009-040]
- 4) Based upon these findings, the BCC finds that there are a sufficient number of available locations for new Adult Entertainment uses within unincorporated Palm Beach County. [Ord. 2004-051] [Ord. 2009-040]
- 5) Based upon these findings, it is in the interest of the health, safety, morals, and general welfare of the citizens of PBC that Adult Entertainment uses are regulated pursuant to the following standards. [Ord. 2009-040]

b) If a package treatment facility is proposed to be developed in the LSA, confirmation shall be provided from the PBCHD that use of a package treatment plant is necessary to protect water quality. The PBCHD shall certify that the uses proposed can be adequately served with a package treatment plant.

#### 2) Rural Service Area (RSA)

If a package treatment facility is proposed to be developed in the RSA, there shall be demonstrated evidence that it is to be used to provide potable water or wastewater service to bona fide agriculture uses, public recreational uses, public educational uses, or other uses when found to be consistent with the Plan by the Planning Director and upon approval of the Director of the PBCHD. The PBCHD may impose conditions or restrictions necessary to protect public health and prevent the creation of a nuisance. All package plants in the RSA shall be operated and maintained by a public utility. Based on the standards of operator coverage in Chapters 62-699 and 62-602, F.A.C., the BCC, may require a higher level of operator coverage.

#### h. Effect on Previously Approved Plants

Water and Wastewater Treatment Plants approved prior to the effective date of this Code shall be considered conforming uses. Expansion or redevelopment of existing facilities or an existing utility site to the same or a different utility use or treatment technology may be allowed with setbacks less than those listed in this Section of the Code provided the expansion or redevelopment is reviewed and approved by the DRO and odor control is provided if applicable. SUMMARY OF AMENDMENTS

B. General Standards

Commercial Communication Towers include provisions for any tower, pole or structure that supports a device whose principal use is to facilitate transmissions for AM/FM radio, television, microwave; cellular, personal wireless services, or related forms of electronic communications. The regulations include provisions for Stealth, Camouflage, Monopole, Self Support/Lattice, Guyed Towers.

Table 4.B.9.B – Typical Examples of Commercial Communication Towers

Camouflage	Stealth	Monopole	Self Support / Lattice		Guyed
					
[Ord.]					

1. Collocated Tower and Accessory Structures

Communication towers may be permitted on a lot with another principal use as provided herein unless stated otherwise.

a. Owned Parcel

Communication towers may be located on lots containing another principal use, including another communication tower.

b. Leased Parcel

Towers may occupy a leased parcel on a lot that meets the minimum lot size requirement of the zoning district in which it is located. PBC may require execution of a unity of control, or other documentation as determined appropriate by the County Attorney, for leased parcels that do not meet the minimum lot size requirement for the zoning district in which they are located.

c. Accessory Structures

Any structure accessory to communication towers, other than peripheral supports and guy anchors, shall conform to the setback requirements for the zoning district in which it is located.

2. Separation and Setbacks

Separation between communication towers and other uses on the lot may be required to ensure compatibility. Separation or setbacks for all towers shall be established, as provided in Tables 4.B.9.B, Minimum Separation and Setbacks for Towers Located in Residential Zoning Districts, and 4.B.9.B, Minimum Separation and Setbacks for Towers Located in Non-Residential Zoning Districts, unless stated otherwise herein.

#### E. Eligible Facilities Request for Modification

This subsection implements Subsection 6409(a) of the Middle Class Tax Relief and Job Creation Act of 2012 ("Spectrum Act"), as interpreted by the Federal Communications Commission's ("FCC" or "Commission") Acceleration of Broadband Deployment Report & Order, which requires a state or local government to approve any Eligible Facilities Request for a modification of an existing tower or base station that does not result in a substantial change to the physical dimensions of such tower or base station.

##### 1. Definitions

For the purposes of this subsection, the terms used have the following meaning:

##### a. Base Station

A structure or equipment at a fixed location that enables FCC-licensed or authorized wireless communications between user equipment and a communications network. The term does not encompass a tower as defined herein or any equipment associated with a tower. Base Station includes, without limitation:

- 1) Equipment associated with wireless communications services such as private, broadcast, and public safety services.
- 2) Radio transceivers, antennas, coaxial or fiber-optic cable, regular and backup power supplies, and comparable equipment, regardless of technological configuration (including Distributed Antenna Systems ("DAS") and small-cell networks).
- 3) Any structure other than a tower that, at the time the relevant application is filed under this subsection, supports or houses equipment described in paragraphs a. 1) and a. 2) that has been reviewed and approved under the applicable zoning process, or under another State or local regulatory review process, even if the structure was not built for the sole or primary purpose of providing that support.

The term Base Station does not include any structure that, at the time the relevant application is filed under this subsection, does not support or house equipment described in a. 1) and a. 2) of this subsection.

##### b. Collocation

The mounting or installation of transmission equipment on an eligible support structure for the purpose of transmitting and/or receiving radio frequency signals for communications purposes.

##### c. Eligible Facilities Request

Any request for modification of an existing tower or base station that does not substantially change the physical dimensions of such tower or base station, involving:

- 1) Collocation of new transmission equipment;
- 2) Removal of transmission equipment; or
- 3) Replacement of transmission equipment.

##### d. Eligible support structure

Any tower or base station as defined in this subsection, provided that it is existing at the time the relevant application is filed under this subsection.

##### e. Existing

A constructed tower or base station is existing for purposes of this subsection if it has been reviewed and approved under the applicable zoning process, or under another State or local regulatory review process, provided that a tower that has not been reviewed and approved because it was not subject to a zoning review process when it was built, but was lawfully constructed, is existing for purposes of this subsection.

##### f. Site

For towers other than towers in the public rights-of-way, the current boundaries of the leased or owned property surrounding the tower and any access or utility easements

## EXHIBIT D

### ARTICLE 4, USE REGULATIONS SUMMARY OF AMENDMENTS

currently related to the site, and, for other eligible support structures, further restricted to that area in proximity to the structure and to other transmission equipment already deployed on the ground.

#### g. **Substantial Change**

A modification substantially changes the physical dimensions of an eligible support structure if it meets any of the following criteria:

- 1) For towers other than towers in the public rights-of-way, it increases the height of the tower by more than 10% or by the height of one additional antenna array with separation from the nearest existing antenna not to exceed twenty feet, whichever is greater; for other eligible support structures, it increases the height of the structure by more than 10% or more than ten feet, whichever is greater;
- 2) For towers other than towers in the public rights-of-way, it involves adding an appurtenance to the body of the tower that would protrude from the edge of the tower more than twenty feet, or more than the width of the Tower structure at the level of the appurtenance, whichever is greater; for other eligible support structures, it involves adding an appurtenance to the body of the structure that would protrude from the edge of the structure by more than six feet;
- 3) For any eligible support structure, it involves installation of more than the standard number of new equipment cabinets for the technology involved, but not to exceed four cabinets; or, for towers in the public rights-of-way and base stations, it involves installation of any new equipment cabinets on the ground if there are no pre-existing ground cabinets associated with the structure, or else involves installation of ground cabinets that are more than 10% larger in height or overall volume than any other ground cabinets associated with the structure;
- 4) It entails any excavation or deployment outside the current site;
- 5) It would defeat the concealment elements of the eligible support structure; or
- 6) It does not comply with conditions associated with the siting approval of the construction or modification of the eligible support structure or base station equipment, provided however that this limitation does not apply to any modification that is non-compliant only in a manner that would not exceed the thresholds identified in paragraphs b. 1) through b.4) of this subsection.

#### h. **Transmission Equipment**

Equipment that facilitates transmission for any FCC-licensed or authorized wireless communication service, including, but not limited to, radio transceivers, antennas, coaxial or fiber-optic cable, and regular and backup power supply. The term includes equipment associated with wireless communications services including, but not limited to, private, broadcast, and public safety services.

#### i. **Tower**

Any structure built for the sole or primary purpose of supporting any FCC-licensed or authorized antennas and their associated facilities, including structures that are constructed for wireless communications services including, but not limited to, private, broadcast, and public safety services.

### 2. **Application Procedures**

Notwithstanding any other provisions in this section to the contrary, eligible facilities requests for a modification of an existing tower or base station that does not result in a substantial change to the physical dimensions of such tower or base station as determined by the process set forth herein, shall be subject to Building Permit review only.

#### a. **Application requirements.**

Applications shall include all information necessary to determine whether the modification of the existing tower or base station that does not substantially change its physical dimensions.

#### b. **Timeframe for Review**

Within 60 days of the date on which an applicant submits an application, the Zoning Division shall approve the application unless it determines that the application is not covered by this subsection.

#### c. **Tolling of the Timeframe for Review**

The 60-day review period begins to run when the application is filed, and may be tolled only by mutual agreement by the Zoning Division and the applicant, or in cases where the Zoning Division determines that the application is incomplete. The timeframe for review is not tolled by a moratorium on the review of applications.

- 1) To toll the timeframe for incompleteness, the Zoning Division must provide written notice to the applicant within 30 days of receipt of the application, specifically delineating all missing documents or information required.
- 2) The timeframe for review begins running again when the applicant makes a supplemental submission in response to the notice of incompleteness.
- 3) Following a supplemental submission, the applicant will be notified within 10 days that the supplemental submission did not provide the information identified in the original notice delineating missing information. The timeframe is tolled in the case of second or subsequent notices. Second or subsequent notices of incompleteness may not specify missing documents or information that was not delineated in the original notice of incompleteness.

## EXHIBIT D

### ARTICLE 4, USE REGULATIONS SUMMARY OF AMENDMENTS

#### d. Failure to Act

In the event the Zoning Division fails to approve or deny a request seeking approval under this subsection within the timeframe for review (accounting for any tolling), the request shall be deemed granted, and the applicant may proceed directly to Building Permit review. The deemed grant does not become effective until the applicant notifies the applicable reviewing authority in writing after the review period has expired (accounting for any tolling) that the application has been deemed granted.

#### F. Review Procedures Shared Use Application Requirements for New Towers

Prior to submittal of an application for approval of a proposed tower for Conditional Use, Development Order Amendment, DRO, or building permit review, all applicants for communication towers shall comply with the procedures indicated below. An application for the appropriate review process must be submitted within one year of the notice mailing date.

##### 1. Notification

All communication tower applicants shall provide notice by certified mail to all users on the Communication Tower Users List. The following information shall be included in the notice: description of the proposed tower; general location; longitude and latitude; general rate structure for leasing space, which shall be based on reasonable local charges; proposed height; a phone number to locate the applicant or agent for the communication tower; and a shared use application form. A copy of the notice shall be mailed to the Communications Division and the Zoning Division. The notices shall invite potential communication tower users to apply for space on the proposed tower to encourage collocation. [Ord. 2009-040]

##### 2. Shared Use Application

Potential communication tower users shall respond to the notice within 20 days of receipt of certified mailing. Response shall be submitted utilizing a shared use application form. A completed shared use application form shall be sent to the owner of the proposed communication tower or authorized agent. The tower applicant shall not be responsible for a lack of response or responses received after the 20 day period. The Zoning Division shall provide the shared use application form.

##### 3. Feasibility

The feasibility of each shared use request shall be evaluated by the applicant. The evaluation shall document the feasibility of shared use between the proposed communication tower owner and a potential lessee or sharer. Factors to be considered when evaluating the feasibility of shared use include but are not limited to: structural capacity, RF interference, geographic service area requirements, mechanical or electrical incompatibilities, inability or ability to locate equipment on approved and unbuilt communication towers, cost (if fees and costs for sharing would exceed the cost of the new communication tower amortized over a 25 year period), FCC limitations that would preclude shared use, and other applicable Code requirements.

##### 4. Rejection or Dispute

If the applicant rejects one or more request(s) for shared use and if potential tower lessees dispute the rejection(s) for shared use, the following procedure shall occur within ten working days after the shared use response deadline.

###### a. Submittal

The applicant shall submit two copies of the following to the Zoning Division: a brief evaluation of each rejected response; all design data for the proposed communication tower; and, an explanation indicating the structural improvements necessary to facilitate the requests that are rejected due to structural limitations, paid for by the tower space lessee.

###### b. Consultant

The Zoning Division shall forward copies of all applications for shared use and the applicant's evaluation of each rejected request to a qualified communications consultant. The consultant shall be selected by and retained at the discretion of the Zoning Division and paid by applicant who is refusing to allow collocation from an interested service provider.

###### c. Evaluation

Within ten working days of receiving the shared use responses that were rejected by the applicant and disputed by the potential tower space lessee, the consultant shall review and prepare an evaluation. Two copies of the consultant's evaluations shall be sent to the Zoning Division. One copy of the evaluation shall be made an official part of the communication tower application and one copy of the evaluation shall be forwarded to the applicant by the Zoning Division. The consultant's report shall be advisory, and made part of the staff report, and considered in reviewing the communication tower application.

##### 5. Acceptance with No Dispute

If the applicant did not reject any requests for shared use or if rejected requests for tower space are not disputed by any potential tower lessee(s), consultant review is not necessary.

#### B. Common Provisions and General Standards

##### 1. Purpose and Intent

The purpose of this Chapter is to provide for the health, safety, and welfare of the residents of PBC by ensuring beneficial and sound land management practices associated with excavation and mining activities. To prevent a cumulative negative impact on PBCs natural resources and to achieve these goals, it is the intent of this Section to:

- a. ensure that mining and excavation activities do not adversely impact the health, safety, and welfare of the citizens of PBC;
- b. prevent immediate and long-term negative environmental and economic impacts of poor land development practices;
- c. encourage the use of economically feasible and environmentally sound mining and excavation practices;
- d. preserve land values by ensuring that alteration of a parcel by non-commercial land excavation does not result in conditions that would prevent that parcel from meeting minimum land development requirements for other valid uses;
- e. encourage the rehabilitation of commercially mined sites to other beneficial uses by promoting economical, effective and timely site reclamation;
- f. protect existing and future beneficial use of surrounding properties from the negative effects of excavation and mining;
- g. provide for the off-site disposal of excess extractive material provided that the excavation site is incorporated into the approval of a bona fide site development plan;
- h. establish a regulatory framework of clear, reasonable, effective, and enforceable standards and requirements for the regulation of excavation, mining, and related activities; and,
- i. ensure that excavation and mining activities and resulting mined lakes are not allowed to become public safety hazards, or sources of water resource degradation or pollution.

- 5 **(1) Inspection**  
6 Within 48 hours prior to completion of construction of the required slopes for  
7 the planted littoral zones, notification to ERM is required in order to schedule  
8 a slope inspection.
- 9 **c) Drainage**  
10 Overland sheet flow directly into an excavated area shall be minimized. Those  
11 areas within a maximum of 50 feet of the excavated lake may discharge run-off  
12 to the lake. This restriction shall not apply to any catchment area discharging  
13 runoff to a lake designated as a water management tract and incorporated in an  
14 approved stormwater management plan for treatment and control of runoff from a  
15 development site, where the boundaries of said catchment are delineated on an  
16 approved plan.
- 17 **3) Final Site Conditions**  
18 No sharp declivities, pits, depressions, or debris accumulation shall remain after  
19 reclamation. Final grading shall conform to the contour lines and grades on the  
20 approved reclamation plan.
- 21 **c. Reclamation Standards**  
22 **1) General**  
23 **a) Types of Reclamation**  
24 Four types of reclamation standards are defined below. Reclamation standards  
25 vary based on the type of excavation activity as set forth in Article 4.B.10,  
26 Excavation Uses.  
27 **(1) Excavated Area**  
28 This area includes the depth of a lake and all slopes waterward of the top of  
29 bank, excluding littoral plantings.  
30 **(2) Littoral Planting**  
31 This area includes all plantings waterward from edge of OWL or plus one  
32 (+1) OWLs.  
33 **(3) Upland**  
34 This area includes the land area landward of the top of bank and requires  
35 that a minimum area of land be maintained or created around the perimeter  
36 of an excavated area to preserve future use of the land.  
37 **(4) Upland Planting**  
38 This area includes all plantings landward of the top of bank and requires  
39 stabilization of soil and re-establishment of native upland vegetation.
- 40 **2) Excavated Area Reclamation Standard**  
41 All slopes shall be reclaimed in accordance with Article 4.B.10.B.7.b, Construction  
42 Standards, and in Article 4.B.10.B.7.c, Reclamation Standards. Areas not required to  
43 be stabilized with littoral plantings shall be stabilized and planted with appropriate  
44 ground cover from top of bank to the edge of the water. If seeding is used, a  
45 minimum of 50 percent coverage shall be required. The depth of the lake and side  
46 slopes shall be comply with Article 4.B.10.B.7.b, Construction Standards.
- 47 **3) Littoral Planting Reclamation Standard**  
48 All Agricultural (excluding WCAA), Type 2 and Type 3 Excavations, excluding ponds,  
49 shall comply with the following littoral zone standards. Exempted excavations within  
50 the WCAA shall provide a littoral zone if the land use ceases to be agricultural. [Ord.  
51 2006-004]  
52 **a) Planted Littoral Zones**  
53 Planted littoral zones shall be provided which comprise, at a minimum, an area  
54 equivalent to eight square feet per linear foot of shoreline. Creativity in design in  
55 the placement of the planted littoral zone is strongly encouraged, such as  
56 extended areas in one portion of the lake or at the discharge point. For basins  
57 with multiple lakes that are interconnected, littoral zones may be concentrated  
58 within one or more lakes so long as the basin as a whole contains the total  
59 required littoral area. The planted littoral zone area shall be limited to the area  
60 between one foot above OWL and two feet below OWL. If the applicant  
61 demonstrates to ERM that the planted littoral area elevations should differ from  
62 this requirement based on site specific conditions and based on fluctuations  
63 around the OWL, ERM may approve planted littoral area elevations other than  
64 those elevations stated above. Requirements for littoral zone planting shall be in  
65 addition to any planting for wetland mitigation required by DEP, SFWMD,  
66 USACE, ERM or any other agency with wetland jurisdiction. [Ord. 2005 – 002]  
67 [Ord. 2006-004]  
68 **b) Vertical Walls**  
69 Vertical walls, bulkheads or other means of hardening the shoreline may be  
70 allowed, however, for each linear foot of vertical wall, an additional eight square

## EXHIBIT D

### ARTICLE 4, USE REGULATIONS SUMMARY OF AMENDMENTS

- feet of planted littoral zone shall be required. Thus every linear foot of vertical wall shall require 16 square feet of planted littoral zone to be planted.
- c) **Planting Requirements**  
The littoral zone shall be provided with a minimum of six inches of a sand topsoil mix to promote vegetative growth for those areas that do not have adequate soil conditions to ensure plant survivorship. The littoral zone shall be planted with at least five species of appropriate native wetland vegetation, with an average spacing of two feet on center or as approved by ERM. The design and species used shall be such that the plants have an anticipated minimal 80 percent coverage. This criterion shall be met from the 180-day monitoring period, and in perpetuity. The Director of ERM shall maintain a list of acceptable plant species for use in their appropriate elevations within the littoral zones. The list may be amended for general application as more information becomes available. The list shall be open for public inspection and distribution.
- d) **Timing of Planting**  
Planting of the excavated lake or pond shall occur no later than immediately prior to the issuance of the first certification of occupancy for any lot adjacent to or abutting the bank of that lake. ERM may approve in writing a phasing plan for planting large single lake systems or interconnected multi-lake systems that would allow lake planting to be phased. At all times, applicant is responsible for minimizing erosion of the littoral shelves until the planting is completed. ERM shall be notified within 48 hours prior to completion of the littoral zone planting.
- e) **Littoral Planting Plans**  
The plans shall detail the species and numbers of plants to be used, the location and dimensions of the littoral areas, including any compensatory littoral areas, if applicable; typical cross Section of planted littoral zones from lake maintenance easements to the maximum depth of the lake; the location and dimensions of any structure for which a compensatory littoral area is required; the methods for planting and ensuring survival of the plants; and other reasonable information required by the Director of ERM.  
Projects which are proposed to be conducted in phases, shall include plans which delineate the phases of excavation and shall include guarantees for each phase.  
The signatory of the plans and specifications shall have a personal familiarity with the site and soil conditions based upon a field review.
- 4) **Upland Reclamation Standards**  
Upland reclamation standards apply to Type 2 and all Type 3 Excavations only.
- a) **Reclamation Plan**
- (1) **General**  
A site reclamation plan shall be submitted as an integral part of the application for a Type 2 or Type 3 Excavation and shall be approved by DRO prior to commencement of work. Reclamation is required to ensure a viable end use for the excavation site. The plan shall demonstrate compliance with the requirements in Article 4.B.10.B.7, Technical Standards, except for the littoral planting plan which has its own application submittal requirements. However, the reclamation plan submitted to DRO shall indicate the littoral planting areas.
- (2) **Type 2 Excavation**  
The certified final site development plan shall function as the standards required for the final development plan.
- (3) **Type 2 Excavation Exceeding Off-Site Removal Limitations**  
As set forth in Article 4.B.10.C.4, Type 2 Excavation, shall be classified as a Type 3A Excavation when the applicant proposes to remove more than ten percent of the fill off-site. Notwithstanding final site plan certification, the final site development plan shall function as the reclamation plan and planting requirements shall be met in accordance with the landscape requirements for the final site development plan. In such cases, the BCC may waive all or modify a portion of the explicit upland reclamation planting requirements defined below based on the ultimate use of the site. The BCC may require that the upland reclamation plantings defined below be incorporated into the open space pedestrian system as defined on the final site development plan.
- (4) **Type 3 Excavation**  
The reclamation plan for a Type 3 Excavation shall comply with the upland reclamation standards in this Section.
- b) **Perimeter Reclamation**  
At a minimum, 75 percent of the perimeter of the excavated area shall have a width of 180 feet; and the remaining 25 percent shall have a width of 100 feet. All disturbed and reclaimed areas shall be planted or seeded with a permanent native ground cover to reduce the loss of topsoil due to water and wind erosion, to provide adequate growing conditions for reclamation planting requirements and to prevent the establishment of prohibited plant species.

## EXHIBIT D

### ARTICLE 4, USE REGULATIONS SUMMARY OF AMENDMENTS

#### c) Timing of Upland Reclamation

Reclamation shall occur immediately following the end of excavation or immediately following each phase of excavation, whichever occurs first. Upon commencement of reclamation and rehabilitation of the initial phase of this excavation, the next phase of excavation may commence upon written authorization by DRO. The applicable guarantee must be on file prior to authorization for the commencement of excavation on any subsequent phase.

##### (1) Timing of Planting

If excavation activity is phased, planting shall occur at the completion of each phase. Planting of the reclaimed upland area should occur during the rainy season (June-October), within six months after completion of the excavated area or phase thereof, as applicable. The property owner shall ensure that proper watering and maintenance occurs in order to ensure a successful survival rate. If planting does not occur during the rainy season, then the property owner shall provide irrigation to establish the new plantings. PZB shall be notified 48 hours prior to completion of the upland plantings.

#### d) Calculating Planting Requirements

In addition to the buffer requirements in Article 4.B.10.C.5, Type 3 Excavation, the following upland planting requirements shall apply.

##### (1) Sites Supporting Native Vegetation

Calculations to determine the reclamation planting requirements for sites supporting native vegetation shall be based on the existing tree cover. Controlled or prohibited species shall be exempt from this calculation. In addition, any tree species located within the required perimeter buffer area shall also be exempt. If no vegetation exists, the applicant shall demonstrate that the site was cleared before 1986 or has been issued and has complied with a vegetation removal permit.

A certified tree survey shall be submitted by either a landscape architect, forester, land surveyor, or engineer who is registered in the State of Florida. This count shall include all existing on-site native trees with a trunk diameter three inches or greater to be measured at four and one-half feet above the ground. The number of existing trees meeting this criterion shall then be divided by the total number of acres to obtain a tree-per-acre figure. The number of replacement trees to be planted at the time of final site reclamation shall be determined by multiplying the trees-per-acre figure by the number of required reclaimed land acres remaining at the time of final site reclamation. Credit shall be given by PZB for existing trees greater than three inches in diameter which are relocated and/or adequately protected during excavation. Any trees relocated and/or protected shall be deducted from the replacement tree count requirement. The trees to be replanted shall be native and a minimum eight feet high. In addition, two understory 18 inch high seedlings shall be planted for each tree required to be planted.

#### e) Upland Planting Reclamation Standards

The upland reclamation plantings may be clustered in one area of the reclaimed upland area or dispersed throughout the reclaimed upland area. No minimum or maximum area is required, except as a condition of approval, as long as the vegetation is planted in accordance with standards set forth in Article 7.F, Perimeter Buffer Landscape Requirements, and Article 14.C, Vegetation Preservation and Protection. A minimum of five native plant species shall be used to fulfill the planting requirements. The design and species used shall be such that the plants have an anticipated minimal survival rate of at least 80 percent at the end of each monitoring period.

#### f) Plan Requirements

The upland reclamation planting plan shall be submitted to the DRO simultaneously with the application for the final site plan.

(1) The signatory of the plans and specifications shall have personal familiarity with the site and soil conditions based upon a field review. The plans shall be signed and sealed by a professional Landscape Architect certified by the Florida Department of Professional Regulation.

(2) At a minimum, the plans shall detail the location, species and numbers of plants to be used, and the methods for planting and ensuring survival of the plants, and other reasonable information required by ERM.

#### g) Phased Projects

In the event that upland reclamation is to be conducted in phases, the following additional requirements shall apply:

(1) A phasing plan shall be submitted indicating:

- (a) exact acreage of each phase;
- (b) proposed duration of excavation and reclamation of each phase; and,
- (c) number of trees to be planted.

## EXHIBIT D

### ARTICLE 4, USE REGULATIONS SUMMARY OF AMENDMENTS

#### 5) Area of Record

All reclaimed littoral and upland planting areas shall be identified graphically and in writing on a separate restrictive covenant. The graphic shall be signed and sealed by a certified engineer or surveyor as applicable, recognized and approved by the FDPR. If a plat is required, pursuant to Article 11, SUBDIVISION, PLATTING, AND REQUIRED IMPROVEMENTS, all planted littoral zones and upland reclamation planting areas shall be identified by reference to the restrictive covenant. The plat and restrictive covenant shall be reviewed and approved by the Zoning Division, ERM, and the County Attorney's office prior to recordation. A copy of the plat, if applicable, and recorded restrictive covenant shall be provided to ERM and PZB, prior to issuance of written approval of the Notice of Intent to Construct. Within 30 days following plat recordation, a copy of the recorded plat shall be provided to ERM and Zoning Division.

The littoral area and reclaimed upland planting area shall be specifically and separately reserved to the owner, or if applicable, to the property owners' association as its perpetual maintenance responsibility, without recourse to PBC or any other governmental entity or agency. The plat, if applicable, restrictive covenant and property owners' association documents, shall contain the following statement:

It is a punishable violation of PBC Laws, Ordinances, Codes, Regulations and approvals to alter the approved slopes, contours, or cross sections or to chemically, mechanically, or manually remove, damage or destroy any plants in the reclaimed areas and planted littoral zone except upon the written approval from the Director of ERM or Zoning, as applicable. It is the responsibility of the owner or property owners association, its successors or assigns, to maintain the required survivorship and coverage of the reclaimed upland and planted littoral areas and to ensure on-going removal of prohibited and invasive non-native plant species from these areas.

#### d. Performance Guarantee Requirements

##### 1) General

ERM shall administer guarantee requirements for the excavated area and littoral plantings. The Zoning Division shall administer guarantee requirements for reclaimed upland area, and upland plantings. The Land Development Division shall administer guarantee requirements associated with road maintenance and repair of haul routes if required by the BCC or County Engineer Executed Agreement pursuant to Art. 4.B.10.B.7.a.10)b), Executed Agreement.

##### 2) Guarantees Required

The guarantees for phased projects may be bonded separately with approval by the DRO.

##### a) Agricultural and Type 2 Excavations

Agricultural and Type 2 Excavations shall be required to provide a guarantee for the littoral zones. If approved as a Class A conditional use, guarantees may also be required for the excavated area, upland reclamation (excluding upland plantings) and roadway maintenance and repair.

##### b) Type 3 Excavation

Approval of at least five guarantees shall be required for Type 3 Excavation:

- (1) excavated areas;
- (2) reclaimed upland areas;
- (3) upland planting areas; and,
- (4) littoral zones.

c) Approval may be required for Type 3 Excavation for road maintenance and repair.

##### 3) Execution

The performance guarantee shall be executed by a person or entity with a legal or financial interest in the property. Transfer of title to the subject property shall not relieve the need for the performance guarantee. The seller shall maintain, in full force and effect, the original performance guarantee until it is replaced by the purchaser.

##### 4) Form of Guarantee

The guarantee shall assure the project performs as approved by the BCC and in accordance with the standards of this Code. The guarantee shall take the form of:

- a) A cash deposit or certificate of deposit assigned to PBC;
- b) An escrow agreement for the benefit of PBC;
- c) A performance bond issued by a Florida registered guarantee company which shall be listed on the U.S. Department of Treasury Fiscal Services, Bureau of Government Financial Operations. Said bond may be canceled only upon a 60 day written advance notice and acceptance of cancellation by ERM, PZB or Land Development Division, as applicable;
- d) An unencumbered, clean, irrevocable letter of credit which must be executed on a form provided by PBC; or
- e) Unless otherwise approved in writing by ERM, PZB or Land Development Division, as applicable, performance bonds or letters of credit shall be on forms provided by PBC.

## EXHIBIT D

### ARTICLE 4, USE REGULATIONS SUMMARY OF AMENDMENTS

#### 1) Excavation Activity

The applicant shall submit an annual report to the DRO indicating the status of the excavation activity. The report shall include, but not be limited to, the status of:

- a) the current phase(s) of excavation;
- b) all phases of excavation and reclamation activities (including date(s) of completion and anticipated dates of completion);
- c) amount of material extracted and amount of material removed from the site;
- d) condition of perimeter buffers and landscaping; and,
- e) status of compliance with conditions of approval and applicable requirements in this Section.

#### 2) Initial Maintenance and Monitoring of Reclaimed Upland Areas and Littoral and Upland Planting Areas

The planted littoral zones and planted upland areas shall be inspected and monitored for at least one year after planting. Equipment storage, maintenance and service areas shall be monitored until completion of the excavation activity for contamination by regulated substances. The maintenance and monitoring program shall comply with the following requirements:

##### a) Maintenance

Inspections, monitoring, exotic plant species removal and replanting during each monitoring period shall be required to maintain the minimum:

- (1) 80 percent coverage criterion for the planted littoral zone from the 180 day monitoring period; and,
- (2) 80 percent survivorship for the planted upland area from the 180 day monitoring period;

##### b) Exotic Plant Species

Complete removal of the following plant species from the planted littoral zone and upland areas, as applicable:

- (1) prohibited and invasive non-native plant species as defined by Article 14.C, Vegetation Preservation and Protection; and,
- (2) invasive species, such as cattails, primrose willows and water hyacinth.

##### c) Regulated Substances

Inspections and monitoring of all equipment storage, maintenance and service areas shall be required to ensure the site has not been contaminated by regulated substances. Construction areas shall be maintained in accordance with the "Regulated Substance Best Management Practices for the Construction Industry."

##### d) Submittals for Monitoring Programs

Submittal of monitoring reports for each monitoring period shall be required. The planted littoral zone reports shall be submitted to ERM and the reclaimed upland planting reports shall be submitted to the Zoning Division. These monitoring reports shall represent the monitoring periods commencing with a time zero report, 90 day, 180 day and 360 day reports.

The time zero monitoring report shall be submitted within 30 days of the initial planting. Each subsequent report shall be submitted within 30 days of the completion of the monitoring period. If following the first year of the maintenance and monitoring period, PBC finds the planted littoral or reclaimed planted upland areas to be in non-compliance with the provisions herein, the land owner or entity having maintenance responsibility may be required by PBC to extend their maintenance and monitoring period, until compliance with the maintenance and monitoring requirements is met.

##### e) Content of Monitoring Reports

Each monitoring report, including the time zero report, shall assess the species, numbers, and locations of planted littoral zones and reclaimed upland planting areas. The report shall also depict the equipment maintenance, storage and service areas and assess the condition of the ground as a result of possible leakage or spillage of regulated substances. The report shall include multiple photographs (panoramas are preferred) of the site clearly showing these areas. Photographs must be taken at approximately the same location(s) each time.

In addition, the report shall detail the species, numbers and locations of additional plantings that were made to attain the 80 percent survivorship/coverage criteria, if such plantings were necessary.

#### 3) Long-Term Maintenance and Monitoring of Reclaimed Upland Areas and Littoral and Upland Planting Areas

After the first year, the land owner or entity having maintenance responsibility for the planted littoral zone and planted upland reclamation area, shall maintain these areas in the following manner.

- a) The reclaimed upland areas shall maintain a minimum survivorship of 80 percent, and the planted littoral zone shall maintain a minimum coverage of 80 percent.
- b) Exotic and invasive non-native plant species as defined by Article 14.C, Vegetation Preservation and Protection, such as cattails, primrose willows and water hyacinth, shall be restricted to a coverage of less than ten percent of the

## EXHIBIT D

### ARTICLE 4, USE REGULATIONS SUMMARY OF AMENDMENTS

required planted littoral zone. No exotic or invasive non-native plant species shall be permitted in the upland areas.

#### 4) Repair, Reconstruction Modification

DRO approval shall be obtained prior to any reconfiguration of the approved lake or reclaimed upland area. Written approval from the Director of ERM shall be obtained prior to modification of the planted littoral zones.

#### 8. Administration and Enforcement

##### a. Administrative Waiver from Construction Criteria for Agricultural, WCAA, Type 2 and Type 3 Excavations

###### 1) Authority and Criteria

Administrative waivers from the slope, depth, or littoral zone standards contained in Article 4.B.10.B.7, Technical Standards, for Agricultural, WCAA, Type 2, and Type 3 Excavations may be granted by ERM in accordance with the standards of this Section. ERM may grant the waivers to an applicant upon demonstration by a preponderance of evidence, that such administrative waivers will not be injurious to the area involved or otherwise detrimental to the public welfare, and that special or unique circumstances exist to justify the administrative waivers based on one or more of the following conditions:

- a) That the literal application of these standards will create an unreasonable hardship and that the special and unique circumstances do not result from the actions of the applicant;
- b) That a request for relief from the littoral planting requirements include an alternative plan with a contribution to the Pollution Recovery Trust Fund of twice the amount calculated by the formula for a guarantee located in Article 4.B.10.B.7.d.5)c), Littoral Zones and for review and approval by the Director of ERM. If the littoral zone had been depicted on the site or master plan, a modification of the plan shall be processed in order to delete the littoral zone from the plan; [Ord. 2013-001]
- c) That appropriate technology and methods will be used to ensure consistency with the intent of the Code; or,
- d) The proposed administrative waiver will not be adverse to the general intent and purpose of this Section.

###### 2) Limitations

No administrative waiver shall be approved for those separation items in Article 4.B.10.B.7.b, Construction Standards, unless the item specifically allows approval by ERM; nor for any mining or excavation operation location which will reduce hydraulic recharge distances to a public water supply well in excess of two percent; nor within 200 feet of a publicly-owned conservation area, environmentally sensitive land area, or publicly-owned preservation area. An administrative waiver may be granted for littoral areas within a lake supporting bona-fide agricultural operations. If the land use changes from Bona Fide Agriculture use, the littoral requirements for the new land use shall be required.

###### 3) Review Process

The request shall be included with the Notice of Intent to Construct, unless a Notice of Intent to Construct has been previously approved. An appropriate fee and drawings of sufficient detail shall be required in order to provide the information needed to determine if granting approval of the waiver is appropriate. The application and drawings, excluding littoral planting plans, shall be signed and sealed by a professional recognized and approved by the Florida Department of Professional Regulation for this type of project.

- a) Upon receipt of a request to deviate from the Construction Criteria, ERM shall have 30 days to request any additional information.
- b) Within 30 days of receipt of the requested additional information, ERM may only request information needed to clarify the additional information supplied or to answer new questions raised by or directly related to the additional information.
- c) If ERM does not ask for additional information within thirty 30 days of receipt of the request, the request shall be deemed complete upon date of receipt.
- d) If an applicant fails to respond to a request for the fee or any additional information within 60 days, the request may be denied without prejudice. However, ERM may grant an extension of time as is reasonably necessary to fulfill the request for additional information. ERM action shall be approval or denial, and shall be included with the issued written approval of the Notice of Intent to Construct.

##### b. Violations, Enforcement, and Penalties

###### 1) Violations

Violations not related to conditions imposed by the Notice of Intent to Construct excavation, may be referred to the Director of Code Enforcement as determined by the Director of ERM.

For each day or portion thereof, it shall be a violation of this Section to:

- a) fail to comply with a requirement of this Section, a condition of an approval or an authorized exemption granted hereunder;

## EXHIBIT D

### ARTICLE 4, USE REGULATIONS SUMMARY OF AMENDMENTS

- b) fail to comply with the design specifications or littoral planting plan submitted with the Notice of Intent to Construct for which a written approval was issued by ERM;
  - c) alter or destroy the approved depths, slopes, contours, or cross-sections;
  - d) chemically, mechanically, or manually remove, damage, destroy, cut, or trim any plants in the littoral zones, except upon written approval by the Director of ERM;
  - e) dredge, excavate, or mine the lake or littoral zones without prior receipt of approval(s) from ERM and/or PZB;
  - f) cause water quality violations in excess of the standards contained in F.A.C. Chapter 62-302; or,

The BCC shall not approve the application if a finding is made that the use will be incompatible with surrounding land uses. For the purposes of this requirement, incompatible means negative impacts caused to surrounding land uses because of proximity or direct association of contradictory, incongruous, or discordant land uses or activities, including, but not limited to, the impacts of noise, vibration, dust, traffic, smoke, odors, toxic matter, radiation, and similar environmental conditions.
- 1) **General**
- The following standards shall apply to both Type 3A and Type 3B mining activities.
- a) **Location and Access**
- Local residential streets shall not be used for access or as a haul route. The site shall front on and have direct access to an Arterial or Collector Street designated on the County's Future Thoroughfare Identification Map. In cases when the street on the Thoroughfare Identification Map is not paved, the BCC may allow an Type 3 Excavation to locate and have access to the street provided the BCC makes a finding of fact that the use of the street will not cause an incompatible affect on surrounding residential uses, and may condition the project to obtain a haul permit in accordance with Article 4.B.10.B.7.a.10), Hauling Standards.
- (1) **Restrictions in the RR FLU Designation**
- Commercial excavation shall be prohibited in neighborhoods which support developed single-family residences on 60 percent of the valid lots of record. Unless otherwise specified, separation shall be measured from the outermost edge of the excavated area (top of bank), equipment, stockpiles, buildings, or structures, to the closest structure of a protected land use. The BCC may reduce the required separation distance based on the compatibility of the use with the adjacent area, and the remoteness or proximity of adjacent incompatible uses, provided the reduction complies with the intent of the compatibility standards in Article 4.B.10.C.5.i, Compatibility Standards. The BCC shall state the basis for the reduced separation and make a finding of fact that the reduction should not negatively impact adjacent uses. If the separation is reduced, the BCC may require increased setbacks, buffering and other restrictions as necessary to protect surrounding land uses.
- (1) **Residential Uses**
- For the purposes of this Section, existing residential uses shall be defined as a residential lot supporting a residence in a platted subdivision, a rural unrecorded subdivision, an approved affidavit of exemption, a plat waiver, or other recorded instrument and is not located within the boundary of the excavation project.
