**INTER-OFFICE COMMUNICATION

RE: **Research on Separation Distance for Freestanding ATM's Unified Land Development Code (ULDC) Amendment Round 2013-01**

This memo serves to follow up to BCC discussion, at the July 25, 2013, First Reading of Unified Land Development Code (ULDC) Amendment Round 2013-01, as it relates to the proposed 1,000-foot separation distance between Freestanding ATMs. During the discussion Commissioner Taylor, Vice Mayor, asked whether the proposed separation distance would be sufficient to address the possible proliferation of Freestanding ATMs on commercial sites.

Zoning staff researched 10 different shopping centers within unincorporated PBC to determine based on typical property dimensions how many ATMs could realistically be installed on a site. Staff's analysis is found in Attachment A, Location Map for Shopping Centers Evaluated, and Attachment B, Table and Analysis for Evaluated Centers.

Staff has concluded that the current 1,000-foot separation proposal will prevent the proliferation of freestanding ATMs. However, should the BCC choose to limit the number of ATMs per property, this can be done by adding a maximum of 2 per site at the August 22, 2013 Final Adoption Hearing.

If you should have any questions or require additional information, please contact me at (561) 233-5234.

ULDC AMENDMENT ROUND 2013-01
Freestanding ATMs – Analysis of 1,000 Ft. Separation Distance
(Updated 8/12/13)

#	Development Name	Linear Ft. of Frontage	Site Depth (Ft.)	Acreage	Corner Location	Number of Freestanding ATM's Possible
1	Jupiter Farms Shopping Center	≈1,200	≈1,700	≈34.5	Yes	3
2	Cross County Mall	≈1,280	≈1,750	≈42.8	Yes	4
3	Western Plaza	≈1,674	≈746	≈32.8	No	2
4	Lantana Square Shopping Center	≈965	≈1,562	≈17.6	Yes	2
5	Lantana Square Plaza II	≈490	≈383	≈2.4	No	1
6	Canyon Town Center TMD	≈1,300	≈900	≈27	Yes	2

10	Shadowood Square	≈1,200	≈1,700	≈35	Yes	4

Background Information:

Through the development of guidelines for Freestanding ATMs, the applicant, Bank of America, proffered a separation distance of 1,000 feet. Staff found that such a separation distance would:

- Prevent the proliferation of freestanding ATMs;
- Prevent use of the structures as advertisement;
- Prevent disruption of traffic flow within parking lots; and,
- The proposed ordinance language permits collocation of more than one financial institution in a structure.

The table above shows the outcome of staff's analysis of the subject shopping centers. All measurements noted are approximate, based on the software used to perform the measurements. The estimated number of possible ATMs that could potentially go in each center is based on an absolute best possible case. However, a more realistic number will be lower because these are all existing centers, and any new Freestanding ATM would have to be retrofitted into the center. Due to the placement of existing buildings, parking lot layouts, access, traffic circulation patterns, etc., it would be virtually impossible to place more than 1 freestanding ATM in smaller centers, or more than 2 in the larger ones, unless they were placed in inaccessible locations, such as behind anchor stores, in loading areas, etc. In addition, if an adjacent property owner where to place a Freestanding ATM on its property adjacent to, or even across the street from one of these centers, it could further limit, or in the case of a center with less than 1,000 feet of frontage or depth, totally preclude the location of a Free-Standing ATM.

In conclusion, staff is confident that the current proposal will in fact accomplish the four points noted above.
