SECTION I: GENERAL INFORMATION

INTRODUCTION

Palm Beach County Board of County Commissioners (BCC), Community Services Department (CSD) invites eligible entities to submit proposals for the Financially Assisted Agencies (FAA) Housing and Homelessness for Fiscal Years 2025 - 2027 (October 1, 2024 – September 30, 2027). Proposed Housing and Homelessness programs will participate in the Palm Beach County's Continuum of Care (CoC) to provide housing and support services for individuals and families experiencing homelessness on the CoC Acuity List based on the Vulnerability Index, Service Prioritization Decision Assistance Tool (VISPDAT), and/or Family Service Prioritization Decision Assistance Tool (F-SPDAT) experiencing literal (HUD Category 1) homelessness, or fleeing from domestic violence (HUD Category 4), and for homelessness and housing insecurity for seniors and persons fleeing or attempting to flee domestic violence.

BACKGROUND

BCC established the FAA program within the Palm Beach County Administrative Code, Section 305.07 - Payments to Financially Assisted Agencies, in the early 1980s to augment the County's own service mix to address human service needs by providing financial assistance to community-based organizations. The Health and Human Services (HHS) Element of the *Comprehensive Plan of Palm Beach County* delineates goals and objectives that address the availability of health and human services necessary to protect the health, safety and welfare of County residents. In conjunction with the HHS Element, the BCC adopted Resolution R2013-1563, which created the Citizens Advisory Committee on Health & Human Services (CAC/HHS) to provide input on FAA processes.

The Community Services Department (CSD) administers FAA for Health and Human Services on behalf of the County.

NEED FOR HOUSING AND HOMELESSNESS SERVICES OVERVIEW

The issue of homelessness affects many communities in the United States. The issues of low housing stock, income and housing affordability, violence, racial disparities, and health indicators are a few of the many factors that cause homelessness across the nation.

[The State of Homelessness: 2023 Edition](#) uses data from the U.S. Department of Housing and Urban Development (HUD) to provide an overview of the scope of homelessness in the U.S. Key facts and data points include:

- Homelessness has been on the rise since 2017, experiencing an overall increase of 6 %.
- In 2022, counts of individuals (421,392 people) and chronically homeless individuals (127,768) reached record highs in the history of data collection.
- Unsheltered rates are also trending upward, impacting most racial, ethnic, and gender subgroups.
- Homeless services systems continued to expand the availability of both temporary and permanent beds

in 2022, but these resources still fall short of assisting everyone in need.

In Palm Beach County, per the 2023 Homeless Point in Time (PIT) Count, 1,855 persons enumerated experiencing homelessness. There was an overall 31% increase in homelessness compared to the 2022 PIT Count (1,404). In 2023, there were 1,169 unsheltered and 686 sheltered persons experiencing homelessness. In addition, the highest number of unsheltered individuals were found in West Palm Beach, Riviera Beach, Belle Glade, Lake Worth Beach, and Delray Beach. There was a 32.3% increase in Black or African America persons who identified as homeless from 2022 to 2023. There was an increased number of seniors experiencing unsheltered homelessness in 2023 as compared to 2022. (Source: [PowerPoint Presentation \(thehomelessplan.org\)](#))

Overall, In South Florida, the cost of renting a home is rising much faster than the national average. According to a recent study by Florida Atlantic University cited by the [Homeless Plan Addendum](#), the average rent in the county has increased by more than 32% over the past year. Also, with 56.6 % of households paying more than 30% of their gross income on rent; Palm Beach County is one of the most unaffordable places to live in the US.

Through a collective effort, the Palm Beach County Community Services Department along with local constituents are working to assist individuals experiencing homelessness and housing insecurity. Through the Federally Assisted Agencies (FAA) funding, local community agencies may apply to help provide supports to individuals and families within homeless system of care. The FAA Homelessness and Subcategories program provides a system of care that works to demonstrate positive change towards Palm Beach County's goal of ending homelessness through the provision of homeless prevention, emergency shelter / domestic violence, rapid re- housing (RRH), permanent supportive housing (PSH), and supportive services only/housing focused-case management strategies to prevent homelessness, assist with quickly exiting homelessness and prevent returns to homelessness.

PROGRAM OVERVIEW

The Palm Beach County Homeless CoC works to demonstrate positive change towards Palm Beach County's goal of ending homelessness through the provision of Homeless Prevention, Emergency Shelter / Domestic Violence, Rapid Re-Housing (RRH) Permanent Housing, Permanent Supportive Housing (PSH), and Supportive Services Only (SSO) strategies utilizing housing focused-case management. As a result of receiving stakeholder feedback from agencies, funders, advocates and persons with lived homelessness experience, this NOFO prioritizes diversion from homelessness, innovative approaches to providing services to assist persons experience end their experience as rapidly as possible, and prevent future experiences with homelessness. This NOFO also prioritizes the use of FAA funds as match to for projects funded by other federal or state sources (i.e. Housing and Urban Development Emergency Solutions Grant, Continuum of Care, etc.).

Through the strategies contained in this Palm Beach County (PBC) Financially Assisted Agency (FAA) Notice of Funding Opportunity, and based on PBC Board of County Commission approval, the County and its funded partner agencies anticipate that vulnerable seniors and persons with intellectual developmental disabilities will be prevented from becoming homeless; persons fleeing or attempting to flee domestic violence and/or abusive situations will be safely sheltered; youth, individuals, and families will be rapidly rehoused; and persons with disabling conditions will remain housed thereby ending their experience with homelessness.

Except for agencies providing homeless prevention services, eligible Clients will be referred for Housing and Homeless services via the Palm Beach County Homeless Continuum of Care (CoC) coordinated entry process.

RECOMMENDATIONS FOR HOUSING AND HOMELESS SERVICES: PALM BEACH COUNTY

Qualified entities are invited to submit applications to provide Housing and Homeless services to Palm Beach County residents. The Review Panel will rank all proposals based on how critical they deem the program is for the system of care. The SCORE awarded to a proposal is reflective of how competitive the proposal is. The RANKING of the proposals is reflective of how imperative and critical the services are to ensure availability and access. Ranking will be based on priorities developed using data gathered by CSD’s Division of Human Services and Community Action (DHCA). Data include the annual 2023 Point-In-Time (PIT) Count, *Leading the Way Home – Palm Beach County’s Plan to End Homelessness* (located at: <http://www.thehomelessplan.org/ourgoals/endhomelessness.htm>), and *Leading the Way Home: Summit on Homelessness* held in November 2023.

Point-in-Time (PIT) Count (https://thehomelessplan.org/pdf/2023/2023_PIT_Presentation_Final.pdf)

The PIT Count is an annual measurement required by the U.S. Department of Housing and Urban Development (HUD) for data gathering purposes. The results of the 2023 PIT Count indicated that 1,855 people were

experiencing homelessness in Palm Beach County at the time of the count in January 2023, an increase of 32%. The results further indicated that family homelessness has increased by thirty-seven percent (37%), senior homelessness increased by twenty-one percent (21%), and persons experiencing chronic homelessness decreased by five percent (5%).

Leading the Way Home, Palm Beach County’s Plan to End the Cycle of Homelessness ([Ten-Year Plan to End Homelessness \(thehomelessplan.org\)](http://thehomelessplan.org))

In 2008, a community-based, multi-stakeholder leadership group launched an ambitious strategy to end homelessness in Palm Beach County within ten years. The Ten-Year Plan, provided a blueprint for ending homelessness through seven (7) goals and sixty-three (63) action steps that focused on the development of a robust, coordinated service delivery system to ensure that every homeless person has a place to call home. *Leading the Way Home, Palm Beach County’s Plan to End the Cycle of Homelessness* was developed after the Ten-Year Plan to End Homelessness concluded in 2018. The new Plan outlines six (6) key areas of focus: 1. Engage Healthcare/Primary Care/Behavioral Health entities in Homelessness efforts; 2. Increase access to Permanent Supportive and other Permanent Housing; 3. Align Funding and Investments; 4. Expand Support Services; 5. Expand Engagement and Advocacy; and 6. Enhance Homeless System of Care.

In addition, [an addendum to Leading the Way Home](#) was released in 2023 with strategies to break the cycle of homelessness. These strategies include different actions under four different areas of focus: Prevent Homelessness, Enhance Coordination and Homeless Supports, Expand Capacity for Temporary and Permanent Housing, and Legislative Actions and Advocacy.

The Leading the Way Home Summit on Homelessness

Providers, collaborating partners, those with lived experience, as well as those currently experiencing homelessness gathered on November 9, 2023 for *The Leading the Way Home Summit on Homelessness* community meeting. Common themes and topics that emerged from the summit included: Future evictions and their impact on Palm Beach County’s homeless system of care, the current crisis in affordable housing in Palm Beach County, the current availability of housing options for those experiencing homelessness or for homelessness prevention, current funding and investments in this space, the prevalence of co-occurring issues such as mental health and substance use disorders, criminal justice involved, and the continued need for safe, decent, and affordable housing. In addition, breakout sessions were held with four areas of focus: (1) Systems and Services, (2) Housing and Healthcare, (3) Local, State, and Federal Advocacy, Education, and Policy Work, and (4) Lived Experience.

Logic Model Checklist

- ❑ Was the mission of the organization or program identified? (foundation)
- ❑ Is the need statement clear? (not a “need for a service” but the identification of what is needed or lacking) (Column 1)
- ❑ Does the service or activity match the need? (Columns 1-2)
- ❑ Does the outcome (column 3) match the need (column 1)? Can the outcome be produced by the identified service? (column 2) Ensure the outcomes are the required outcomes listed in the guidance (column 3)?
- ❑ Is the outcome realistic, clear, and attainable? (Column 3) (*does the outcome avoid words like “received” as this makes the statement appear to relate only to the receipt of a service and not an outcome – rather say what has changed*)
- ❑ Does the projected indicator provide a way to measure the outcome? Are the indicators realistic, clear, and attainable/ SMART? (column 4)
- ❑ Does the projected indicator include number to achieve the outcome, number to be served, the percent that represents the relationship between these two numbers and a timeframe? (column 4)
- ❑ If this is a logic model created after services have been delivered, identify the actual indicator, including actual numbers who achieved, actual number who were served, the percent that represents the relationship between the actual numbers, and the time frame (column 5). (This section is usually left blank).
 - ❑ *Analysis guidance: Are the actual results consistent with the projected numbers? What is the agency’s ability to target its performance? Note: this is the percent that represents the relationship between the number who actually achieved and the number projected to achieve.*
- ❑ Was a specific measurement tool(s) identified? Were both output and outcome measurement tools identified? (Column 6)
- ❑ Are the data collection procedures and personnel specific? (Column 7)
- ❑ Is the frequency of data collection sufficient to support monitoring progress and outcomes? Are the intervals of reporting clearly identified? (Column 8)

EXHIBIT 2: QUALITY MANAGEMENT / IMPROVEMENT REQUIREMENT

Overview:

Quality Management is a systematic, structured, and continuous approach to meet or exceed established professional standards and user expectations. Quality management is implemented by using tools and techniques to measure performance and improve processes through three main components: quality infrastructure, performance measurement and quality improvement.

Quality infrastructure is the structure and supports that allow the organization to measure performance and improve processes. Quality infrastructure components include leadership, quality improvement teams, quality related training/capacity building, and a written quality management plan. It is often difficult to sustain a success quality management program if the infrastructure components are missing or weak.

When most people think about quality management, performance measurement and quality improvement come to mind. Performance measurement is the routine collection and analysis of data. The analysis is completed by defining the data elements used to calculate the numerator and denominator. Performance measures must be based on established professional standards and/or evidenced based research, when possible.

Quality improvement is a method that uses the tools of quality in an effective, logical and systematic process to solve problems, improve efficiency and eliminate non-value adding steps in the work flow. There are many methods for quality improvement process, but in general they all involve an ongoing cycle of planning, implementation, analysis, improvement. It is important to conduct performance measurement and quality improvement activities in balance. Regularly measuring performance to see if the project is having an impact is critical.

A successful quality management program should:

- Have identified leadership, accountability, and dedicated resources available to the program.
- Use data and measurable outcomes to determine progress toward evidenced-based benchmarks.
- Focus on linkages, efficiencies, and provider and client expectations in addressing outcome improvement.
- Be adaptive to change and fit within the framework of other programmatic quality assurance and quality improvement activities (i.e., Joint Commission on the Accreditation of Healthcare Organizations [JCAHO], Medicaid, and other HRSA programs).
- Ensure that data collected are fed back into the quality improvement process so that goals are accomplished and improved outcomes are realized

WHY:

In order to continuously improve systems of care, evaluations of the quality of care should consider the service delivery process, quality of personnel and resources available, and the outcomes. The overall purpose of a quality management program is to ensure that:

- Services adhere to established service standards, treatment guidelines and established clinical practice, if applicable.
- Strategies are developed for improvement of services provided, including clinical services and supportive services.
- Demographic, clinical and utilization data are used to evaluate service trends and quality of care.
- Appropriate leaders and stakeholders are included throughout the quality improvement process.
- Continuous processes to improve quality of care are in motion.

Ensuring service effectiveness through evaluation has long been a priority of CSD. Over the past several years CSD has worked with funded agencies and key stakeholders to establish measurable outputs and outcomes. Extensive training has been provided on the value of and process to implement a quality management plan. Data collection and performance

reports have led to recommendations supporting program improvements. This next phase of CSD’s efforts to improve the quality of services is to add additional structure and contractual requirements, as well as dedicated financial resources. With providing additional funding support it is anticipated that CSD funded agencies through CQM will develop and deliver community trainings to translate knowledge from their research, planning and evaluation to improve quality.

HOW:

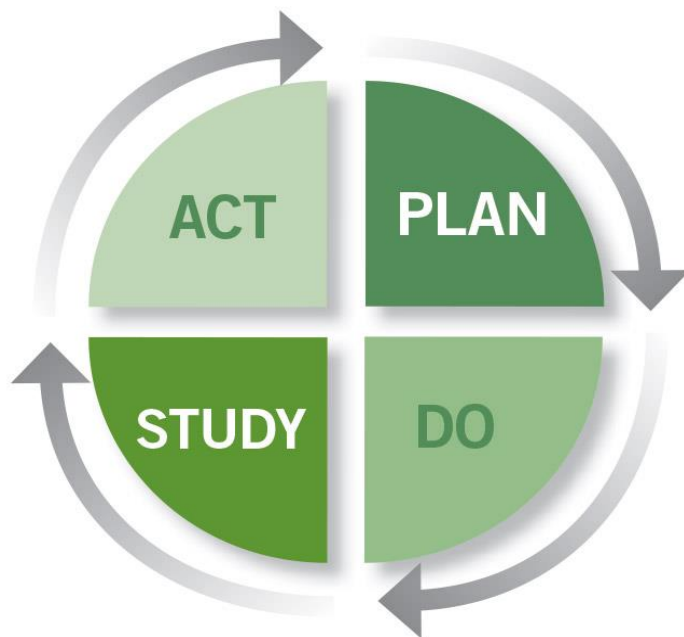

Funded agencies’ expenses for Continuous Quality Improvement (CQI) activities are administrative and may be budgeted up to 5% of the contract amount.

Funded service providers must have:

- An active CQM project during the entire length of the contract; this can be one project that spans the length of the contract or multiple projects.
- Established processes for ensuring that services are provided in accordance with established treatment guidelines and standards of care, if applicable.
- Incorporated quality improvement activities into funding proposals (NOFO) and adhere to quality management contractual requirements

PLAN:

CQM Projects will follow the Plan-Do-Study-Act (PDSA) cycle, which is a systematic process for gaining valuable learning and knowledge for the continual improvement of a product, process, or service. The cycle begins with the Plan step. This involves identifying a goal or purpose, formulating a theory, defining success metrics and putting a plan into action. These activities are followed by the Do step, in which the components of the plan are implemented, such as making a product. Next comes the Study step, where outcomes are monitored to test the validity of the plan for signs of progress and success, or problems and areas for improvement. The Act step closes the cycle, integrating the learning generated by the entire process, which can be used to adjust the goal, change methods, reformulate a theory altogether, or broaden the learning – improvement cycle from a small-scale experiment to a larger implementation Plan. These four steps can be repeated over and over as part of a never-ending cycle of continual learning and improvement (definitions come from the Deming Institute). Training and templates for projects will be provided by CSD staff.
