

EXPEDITED RE-ROOF WORKSHEET – SFD only "Like for Like" Replacement ONLY

Address of Structure:				
Existing Roof Covering: Tile	Shingle	Metal	Flat	
Existing Deck: Plywood Deck, Wood	d Plank, Other:			
Proposed Type: Tile (Product approval)	Shingle (Product approval)	Metal(Product appr	oval) Flat (Product approval)	
Slope/12" Gable/ Hip (# o	f Squares):	Flat/Low Slope (Sq.	Ft) **:	
Design Wind Speed: 170Vult mph or	per www.ascehazardtool.	org Exposure Ca	tegory: <u>C</u>	
INSTALLATION Details:				
Identify/Check the specific In FRSA Manual, and applicable • Specify System Type, Deta UNDERLAYMENT (Asphalt & M.	Manufacturers' Specifications and Pages:	ons.		
Self-Adhered (Direct to Deck) ASTM D8527 **NOT an Option for Wood Shake/Shingle**	3 ¾'' Wide Strip ASTM 1970 OR AAMA 711) Over all Joints/Seams (Per R905.1.1.1)		2 Layers of 30# Felt (ASTM Approved)	
Self –Adhered (ASTM D1970) Polymer-Modified Bitumen Underlayment Applied directly to entire roof deck	3 3/4" Wide Strip of self-a flexible flashing tape per A Level 3 applied over all j with 30# felt on top	oints or AS	layers of ASTM D226 Type II STM D4869 Type III, Type IV. Layers to be lapped BC R905.1.1.1 B1507.1.1	
1) <u>Underlayment (Tile)</u> – Product A 2) <u>Adhesive</u> (if applicable) – Product	pproval			
2) <u></u> (11 uppriousto) 110 su				
1) Indicate manning designed assessment	DESIGN CRITER	<u>RIA</u>		
 Indicate required wind pressures from supplied chart Indicate wind pressures from proposed system (This must be >/= to above) 				
ACCESSORIES (EXISTING Replacement ONLY) - Ridge Vents, Turbines, Skylights, Other:Product Approval				
Please post an official copy of this completed worksheet with all other inspection documents on the jobsite prior to inspection.				
Product Appro	vals listed above must be or	ı job site during inspo	ection	
\Box I certify that all the foregoing information is accurate and all work performed will comply with all applicable codes & standards regulating construction.				
QUALIFIER's Signature F	Print Name	LICENSE	E# DATE	

** Flat decks over 400 sf. must include enhance fastening details from a design professional.

SFD DETACHED REROOFING PERMIT CHECKLIST INTENDED FOR LICENSED ROOFING CONTRACTORS ONLY

THIS APPLICATION IS NOT TO BE USED FOR "NEW" CONSTRUCTION

TWO COPIES OF THIS CHECKLIST MUST BE ATTACHED TO THE PERMIT APPLICATION (WITH ORIGINAL SIGNATURES) AND WITH ALL THE REOUIRED DOCUMENTATION AS NOTED BELOW.

Contractor must certify ALL the following statements apply by initialing each one:
This is a detached Single Family Dwelling (SFD) and/or a free-standing residential accessory structure
This structure was constructed after March 1, 2002, or the structure(s) improved value is < \$300,000
This project involves one or more complete roof sections (see Ch.2-Definitions, Florida Residential Code)
This is a 'like for like' only replacement.
There are no additional skylights being installed
Note : If unable to certify all of the above statements as true, this will disqualify the use of this form. Please refer to PB-O-094 and follow the procedure.
If there is any rooftop equipment (existing systems) that must be removed/replaced, please circle the
applicable trade(s) and provide Sub-permit Applications.
Electrical Mechanical Plumbing Solar
ADDITIONAL DOCUMENTS REQUIRED

- 1. Re-Roof Worksheet
- 2. Complete Product Approval Information Including Cover Pages
- 3. Product Approval with Specific System Descriptions circled (Identify page # on worksheet)
- 4. FRSA pages [if applicable to Tile product using Florida Product Approval (FL-)]
- 5. Roofing accessory product approvals and plan showing location (Ridge vents, Turbines, Mech stands, etc.)
- 6. On flat roofs a contractor may propose a worst case fastening of the perimeter (min. 4' from edge) Max 4" O.C. each way. Flat decks over 400 s.f. may be required to provide enhance fastening details from a design professional to the inspector.
- 7. Other additional data may be required for the integrity of the roofing system to be determined.
- 8. A fee sub application may be required for work outside the scope of this application.

Notes:

- 1. The pressures (psf) in the above table are indicative of the required design uplift pressure based upon less than 4.5: 12 for roof zone 3.
- 2. The roofing professional has the option to review and determine alternative methods that would reflect the full calculation options of ASCE 7-22 that might provide lower uplift resistance values in certain areas.
- 3. For actual uplift resistance values for Foam Adhesives or Mortar installations, please see the Adhesive manufacturer's formal product approvals for additional information.
