MEMORANDUM

TO: The Honorable Karen T. Marcus, Chair, and Members of the Board of County Commissioners

FROM: Barbara A. Alterman, PZB Executive Director 

DATE: November 22, 2010

RE: Unified Land Development Code (ULDC) Round 10-2, Exhibit G, Density Bonus Programs

The Transfer of Development Rights (TDR) program is included in the list of ULDC amendments in Round 10-2 that will be presented to the BCC for permission to advertise on December 9th. For your information, at their November 17th meeting the LDRAB recommend two changes to the proposed ULDC revisions to the TDR Program.

The proposed text location in Exhibit G and the two LDRAB recommendations are as follows:

1. Page 18 of 68, lines 33 and 35.
Staff recommends annual adjustment of TDR pricing to equal 15% of corresponding median home prices reported by the Florida Realtors Association (FRA). LDRAB agrees that TDR prices should be based on average home prices reported by the FRA, but recommends that the BCC establish an appropriate percentage of FRA prices each year.
2. Page 20 of 68, beginning on line 9.
Staff recommends 50% of TDR funds be placed in escrow prior to DRO approval, and 100% of the funds paid to the County prior to first building permit. LDRAB eliminates requirement for partial payment into escrow, and replace with the requirement that 100% of the funds must be paid before recordation of the first plat.

WHITE PAPER
YARD WASTE
SUMMARY OF AMENDMENTS
(Updated 11/4/10)

WHITE PAPER
Executive Summary

I. INTRODUCTION

The purpose of this white paper is to provide a summary of proposed amendments to the Unified Land Development Code (ULDC) to define yard waste and permit limited storage of yard waste when associated with a landscape service. It would allow temporary on-site storage of yard waste that resulted from material generated by the business owner.

II. BACKGROUND

This amendment was initiated to codify common practices that were approved by previous Zoning Directors. It allowed a principal or accessory landscape service use to temporarily store yard waste on sites generated by the maintenance service provided to the landscape service customers only. It includes uses where the landscape service is accessory such as wholesale nursery and retail nursery. In the past, it was determined that the storage of vegetative waste is incidental when less than 10 percent of the total site area of the principal use.

Due to the characteristics in size and the process of the yard waste as an incidental activity to landscape service, it is not considered a solid waste transfer station, therefore new regulations are needed.

The Zoning Division scheduled this issue to be codified in the ULDC 2010-02 round of amendments followed by the creation of a subcommittee that included representatives from the Solid Waste Authority (SWA), Health Department, Zoning Division, Land Development Regulation Advisory Board (LDRAB) members, and industry (wholesale nurseries and chipping and mulching). The subcommittee had a series of meetings on September 13, September 27 and October 18, 2010 to discuss the topic that included comments and recommendations such as:

- For the SWA yard waste collection is a service needed by the community if provided in convenient locations; reduces the number of trips for SWA vehicles; extends the life of the SWA facilities; and, discourages illegal dumping.
- Currently, there are nine SWA permitted facilities in the county that accepts yard waste, most of them approved by the zoning division as chipping and mulching or recycling facilities. The SWA has not issued permits for any site with a yard waste of this nature because there is no zoning category that corresponds to small scale yard waste.
- The subcommittee recommendations included:
 1. Introduce definition for yard waste and yard waste transfer station;
 2. Provide site criteria for yard waste related to:
 - a. Location;
 - b. Accessibility from arterial or collector streets;
 - c. Lot size;
 - d. Traffic issues;
 - e. Setbacks of the yard waste storage area;
 - f. Size of trucks picking up and dropping off waste;
 - g. Volume of trash on site (method of measurement and control of timely removal);
 - h. Nuisance/noise in the residential area and surroundings;
 - i. Percentage of the site's area to be used for yard waste if it is an accessory use;
 - j. Hours of operation;
 - k. Buffering; and,
 - l. Screening.
 3. Allow yard waste accessory to wholesale nursery, retail nursery and landscape service.

The amendments include some of the subcommittee recommendations related to the siting criteria. However, at this time yard waste will only be allowed to a Landscape Service. The Zoning Director recommendation is to approach these amendments in two phases:

- Phase I - 2010-02 Round: BCC adopts proposed amendment which is limited to specific uses and standards for the yard waste storage, and.
- Phase II - 2011-01 Round: Get BCC direction if they want to expand the provisions similar to what the Subcommittee recommended.

III. AMENDMENT SUMMARY

The proposed amendments include the following:

- Introduction of yard waste definition as vegetative matter resulting from landscaping maintenance that excludes land clearing.

- Location criteria and siting regulations such as setback, storage area dimensions, screening requirements, and yard waste height limitation, to allow landscape service to receive yard waste only from customary clients.
- Allowance for yard waste storage is limited to landscape service, including when permitted as an accessory use to a wholesale or retail nursery.
- Limitation of yard waste storage to only vegetative matter generated by the landscape service.
- Clarification that landscape service as home occupation cannot be requested if yard waste is going to be included.

WHITE PAPER

OPEN SPACE
SUMMARY OF AMENDMENTS

(Updated September 21, 2010)

I. OBJECTIVES

A Land Development Regulation Advisory Board (LDRAB) Subcommittee was convened during the 2010-01 Round of Unified Land Development Code (ULDC) Amendments to discuss uses and definitions related to “open space” and “usable open space”. In the past the definitions had been amended to include lists of items that are considered or could be located in “open space” or “usable open space”. In addition, new specific definitions related to usable open space for Parks and Workforce Housing was added, resulting in three redundant definitions for open space. The Subcommittee also expressed concern regarding inconsistency amongst Staff when determining whether or not Lake Worth Drainage District (LWDD) should be included in open space calculations.

The objectives of the Subcommittee were to:

- 1) Review and compare definitions in the ULDC and the Comprehensive Plan for consistency;
- 2) Determine whether or not the definition for “open space” should be amended to include easements and if they should be included in open space calculations; and,
- 3) Clarify and consolidate definitions related to: “usable open space”; “park, open space, usable”; “usable open space for WHP”; and “yard”.

II. ULDC AND COMP PLAN DEFINITIONS

The Subcommittee and Staff compared the definitions and use of terms related to “open space” and “usable open space” as they currently exist in the ULDC and the Plan. The definitions are generally consistent however there are several definitions that are redundant.

ULDC Definitions and Terms:

The following definitions are currently located in Article 1 of the ULDC:

- 1) **Open Space** – unbuilt land reserved for, or shown on the approved site plan or PDP, as one or more uses: preservation, conservation, wetlands, well site dedicated to PBCWUD, passive recreation, greenway, landscaping, landscape buffer, and water management tracts. In the AGR district, open space shall also include unbuilt land use for bona fide agriculture uses;
- 2) **Park, Open Space, Usable** – for the purposes of Art. 5, an area such as a park, square, plaza, or courtyard, accessible to the public and used for passive or active recreation or gatherings. Credit shall not be given for any indoor spaces, road R-O-Ws, building setback areas, lakes and other water bodies, drainage or retention areas, impervious surface courts (tennis, basketball, handball, etc.), swimming pools, sidewalks, parking lots, and other impervious surfaces or any pervious green area not intended for passive or active recreation or gatherings; and,
- 3) **Usable Open Space** - an area such as a park, square, plaza, or courtyard, accessible to the public and used for passive or active recreation or gatherings. Credit shall not be given for any indoor spaces, road R-O-Ws, building setback areas, lakes and other water bodies, drainage or retention areas, impervious surface courts (tennis, basketball, handball, etc.), swimming pools, sidewalks, parking lots, and other impervious surfaces or any pervious green area not intended for passive or active recreation or gatherings; and,
- 4) **Usable Open Space for WHP** – a common area such as a park, square, plaza, or courtyard, accessible to the public and used for passive or active recreation or gatherings. Credit shall not be given for any indoor spaces, road R-O-Ws, building setback areas, lakes or other water bodies, drainage or retention areas, parking lots, and other impervious surfaces or any pervious green area not intended for passive or active recreation.

The terms open space and usable open space are also used in a number of definitions including, but not limited to the following:

- 1) **AGR-PUD Gross Site Area** – the land area of the PUD less land dedicated per the Thoroughfare Identification Map. The gross site area includes land to be used for other R-O-W, streets, preservation areas, development areas, water retention, **open space**, commercial recreation and civic uses.

2 lands...Greenways are employed to provide **usable open space** close to residential
3 areas...

4
5 **Comp Plan Definitions and Terms:**

8
9 **Usable Open Space** - Pervious, vegetated areas, parks and squares as well as impervious
10 “hardscaped” areas which are openly accessible to the public, such as plazas, squares, and
11 courtyards. This **open space** can be used for passive or active recreation as well as formal
12 and informal gatherings; however, credit shall not be given for: any indoor or climate-
13 controlled spaces, road rights-of-way, building setback areas, impervious surface courts
14 (tennis, basketball, handball, etc.), swimming pools, parking lots, and any pervious green
15 area not intended for passive or active recreation or gatherings of a formal or informal
16 nature.

17
18 The terms open space and usable open space are also used in a number of definitions
19 including, but not limited to the following:

- 20
21 1) **Buffer** - The use of vegetation or **open space** for the purposes of limiting the effects of
22 development on natural systems or the recreational value of natural features, or the

38 c) Recreational greenways feature altered ecosystems with low or no environmental
39 sensitivity and protection, medium to high public access, multiple recreational uses
40 and medium to high facility development and trail maintenance.
41 4) **Linked Open Space Network(s) Or Linked Open Spaces** - Conservation areas,
42 natural areas, parks and **"usable open space areas"** which are connected by means of
43 greenways, trails, or multi-purpose corridors.
44 5) **Necessary** - For purposes of prioritizing capital expenditures, services that are directly
45 related to maintaining the level of service for concurrency items mandated by State law
46 and fire rescue services. Examples include expenditure requests which are necessary to
47 meet the minimum level of service standards for concurrency regarding roadway, mass
48 transit, potable water, wastewater, solid waste, stormwater protection, recreation/**open**
49 **space**, and fire-rescue. Necessary services shall be provided throughout the County.
50 6) **Urban Residential** - For purposes of the **Linked Open Space Program**, an "urban
51 residential" land area is defined as a land area with a land use designation or existing

54 7) **Wildlife Corridor** - A widespread, continuous or near-continuous system of wildlife
55 habitat that is established by linking wildlife preserves, sanctuaries, refuges, parks or
56 **open space areas** to provide a pathway for wildlife movement.

57
58 **III. PROPOSED ULDC AMENDMENTS**

59
60 The proposed ULDC amendments are:

- 61 1) To eliminate the definition for Greenway and refer to the Comprehensive Plan since the
62 inclusion of the definition could potentially result in inconsistencies between the ULDC
63 and the Comp Plan;

WHITE PAPER

**OPEN SPACE
SUMMARY OF AMENDMENTS**

(Updated September 21, 2010)

- 1 2) To revise the definition for Open Space by including easements and non-passive
2 recreation areas such as soccer or baseball fields, thereby allowing them to be
3 included in the open space calculations;
4
- 5 3) To eliminate redundant language related to open space including “unbuilt land used for
6 bona fide agriculture uses” as it is included under Article 3.E.2.F.3, Preservation Area;
7
- 8 4) To delete definitions for usable open space park, usable open space, usable open
9 space for WHP; correct yard definition to avoid confusion in application and intent;
10 and, consolidate under open space, usable;
11
- 12 5) To revise language which improperly uses the term “open space”, by replacing it with a
13 more appropriate term; and,
14
- 15 6) To amend shared parking language to clarify that areas reserved for shared parking
16 cannot be utilized as “open space.”
17

18 Based upon review of the definitions and terms in the ULDC and the Plan, the Subcommittee
19 unanimously agreed that the amendments presented in Exhibit F be proposed and submitted
20 to LDRAB with a recommendation for approval.

35 a Link, or Major Intersection, or reduce the number of lanes in the Plan without LUAB PLC
36 review. Nothing herein shall require CRALLS review, application to the LUAB PLC, or notice
37 to any Local Government for minor modifications to the proposed Major Thoroughfare system
38 which do not reduce capacity of the Link, Major Intersection, or Major Thoroughfare System.

4 To recognize structures that comply with the definition in Article 1.1.2.A, Unique Structure,
5 that by the nature of their: scale, massing, proportion, rhythm, style, harmony, order,
6 balance, etc, warrant a special designation. PBC has diverse architectural styles in the
7 various Tiers that are reflective of the historical evolution of the community. The
8 architecture guidelines were established to preserve and enhance those communities
9 through common building design elements. The allowance for unique structures will
10 continue to foster preservation of key design elements while recognizing new and
11 creative design and materials. An applicant may apply for Unique Structure designation
12 pursuant to Article 2.B.2.C, Standards for Unique Structure for any of the types of review
13 outlined in Article 5.C.1.E, Review Process. A Unique Structure designation will require
14 the applicant to clearly demonstrate that by complying with the standard architectural
15 guidelines in Section 5.C.1.H, Guidelines, the overall design would be compromised. A
16 structure classified as unique does not have to apply for variances, but shall comply with
17 the standards in Article 2.B.2.C, Standards for Unique Structure. The Unique Structure
18 process ~~should shall~~ not be requested if the applicant can seek variances ~~for minor code~~
19 ~~deviations as provided for~~ in Article 2.B.23, Type II Variance.

ARTICLE 15 – HEALTH REGULATIONS
SUMMARY OF AMENDMENTS
(Updated 10/14/10)

1 adopted in Rule 62- 550, F.A.C. shall be used to determine if and when a boil water notification is
2 necessary and how to issue/rescind said boil water notification. If issued, ~~the~~ notice to boil
3 water shall remain in effect until at least one day of satisfactory bacteriological sample results
4 have been obtained from the affected area, and after consultation and approval of the Health
5 Department. If only one day of precautionary boil water is utilized, then sufficient evidence must
6 be provided to the Health Department to confirm that no contamination has occurred, ex.
7 extensive bacteriological test data, system pressure data, detailed explanation of repair process
8 to confirm lack of potential for contamination, etc. If unsatisfactory bacteriological levels are
9 detected following the one day initial sampling, or if the system cannot adequately justify to the
10 Health Department that no contamination has occurred, then the water system shall provide a
11 minimum of two consecutive days of satisfactory sample results prior to rescinding the boil notice.
12 Samples shall be taken 24 hours apart. The Health Department shall notify the water supplier
13 when ~~the a system-wide~~ boil water notice may be rescinded. [Ord. 2005 – 003]

14

17 **Part 6. ULDC Art. 15.B.8.A, Design Criteria [Related to Drinking Water Supply] (page 11-12 of**
18 **23), is hereby amended as follows:**

19 **CHAPTER B (ENVIRONMENTAL CONTROL RULE II) DRINKING WATER SUPPLY SYSTEMS**

20 **Section 8 Construction and Design Requirements**

21 **A. Design Criteria**

22 Approval for construction, extension, expansion or use of any community, ~~or non-transient~~ non-
23 community, ~~non~~-transient non-community and limited use water supply system shall be based on
24 the criteria below, in addition to the design criteria specified in Chapters 62-532, 62-555, 64E-8,
25 F.A.C., and the standards considered as modern engineering practices. Criteria in the references
26 listed below are incorporated into this Code. If any differences in design criteria exist, the more
27 stringent standard shall be used.

28

29 18. All community, non-transient non-community, and ~~non~~-transient non-community systems,
30 including limited use systems where applicable, shall maintain a minimum reserve supply of
31 chlorine for emergency conditions. Such reserve shall be figured for 14 days consumption for
32 systems using gas chlorine and seven days consumption for systems using hypochlorite
33 solution. The consumption shall be based, as a minimum on 50 percent of design capacity.

34 **19. Disinfection**

35

36 d. Booster chlorination facilities shall be provided in the distribution systems of community
37 water systems as necessary to maintain the disinfection requirements of Art. 15.B.8.A.19,
38 Disinfection, above, to consecutive systems.

39

42 **Part 7. ULDC Art. 15.B.9 Connection Required [Related to Drinking Water Supply] (page 14 of**
43 **23), is hereby amended as follows:**

44 **CHAPTER B (ENVIRONMENTAL CONTROL RULE II) DRINKING WATER SUPPLY SYSTEMS**

45 **Section 9 Connection Required**

46 A. All existing buildings served by non-transient non-community, ~~non~~-transient non-community and
47 limited use water systems or new limited use and new private water systems shall connect to an
48 approved community water system where such a system has an available water main within 100
49 feet in a public R-O-W or easement abutting the property on which the building(s) are located.
50 Connection to an approved community water system shall be completed within six months of
51 being notified by the Health Department. Connection to an approved community water system
52 shall not be required:

- 53 1. If connection requires an extension of the main; or
- 54 2. If the main is located across four or more lanes of paved roadway; or
- 55 3. If the utility is unable to provide water.

56 B. Notwithstanding the provisions of Art. 15.B.9.A, if the Health Department determines that there is
57 an existing or potential health threat on the property served by a non-transient non-community,
58 ~~non~~-transient non-community, or limited use water system, then the connection shall be made as
59 required under Art. 15.B.9.C, below.

60 C. Establishments or buildings that utilize a non-transient non-community, or ~~non~~-transient non-
61 community or limited use water system and are being constructed, modified, expanded or
62 changed in operation shall connect to an approved community water supply system when said

1 system is available within 1,000 feet by existing R-O-W or easement to the property. Each foot of
2 water crossing, paved roadway, or sidewalk shall be considered as two feet; the proposed supply
3 shall not be required to cross interstate highway or railroad systems. Property owners connecting
4 to community water supply systems under this Subsection shall be required to extend the water
5 main along their public R-O-W utility easements, which abut the property. Connection to an
6 approved community water system shall be completed within six months of being notified by the
7 Health Department.

10 **Part 8. ULDC Art. 15.B.11.C Approval for Use [Related to Permit Approvals for Drinking Water**
11 **Supply Systems] (page 13-14 of 23), is hereby amended as follows:**

12 **CHAPTER B (ENVIRONMENTAL CONTROL RULE II) DRINKING WATER SUPPLY SYSTEMS**

13 **Section 11 Permits/ Approvals**

14 **C. Approval for Use**

15
16 6. The connection of new water mains to existing mains shall not be completed until after the
17 new mains have passed their pressure and leakage tests and completed the disinfection and
18 bacteriological clearance procedures. During construction partial releases may be given by
19 the Department. However, the pressure and leakage tests and the disinfection and
20 bacteriological procedures shall be followed in all cases. No water supply system or facility,
21 including any well, plant, tank, pump station, distribution system, or other pipes, equipment or
22 structure through which water is delivered to the consumer for drinking or household
23 purposes, except certain community water supply service connections not requiring a permit,
24 shall be put into service or used until such facility has been effectively disinfected and
25 bacteriologically cleared. Sample results shall be submitted to the Health Department as
26 follows:
27

28 b. For a community, non-transient non-community, or ~~non~~-transient non-community well
29 clearance, a minimum of 20 consecutive workday acceptable samples are required with
30 no more than two samples taken daily. Samples shall be taken at least six hours apart.

36 **CHAPTER B (ENVIRONMENTAL CONTROL RULE II) DRINKING WATER SUPPLY SYSTEMS**

37 **Section 12 Sampling/Analytical Methods**

38 A. All water samples required under this Article for community, non-transient non-community, and
39 ~~non~~-transient non- community, water systems, including community water well and water main
40 clearance shall be taken by an employee of a laboratory certified to perform drinking water
41 analysis by the Health Department in accordance with F.S.§ 403.863 and Chapter 64E-1, F.A.C.,
